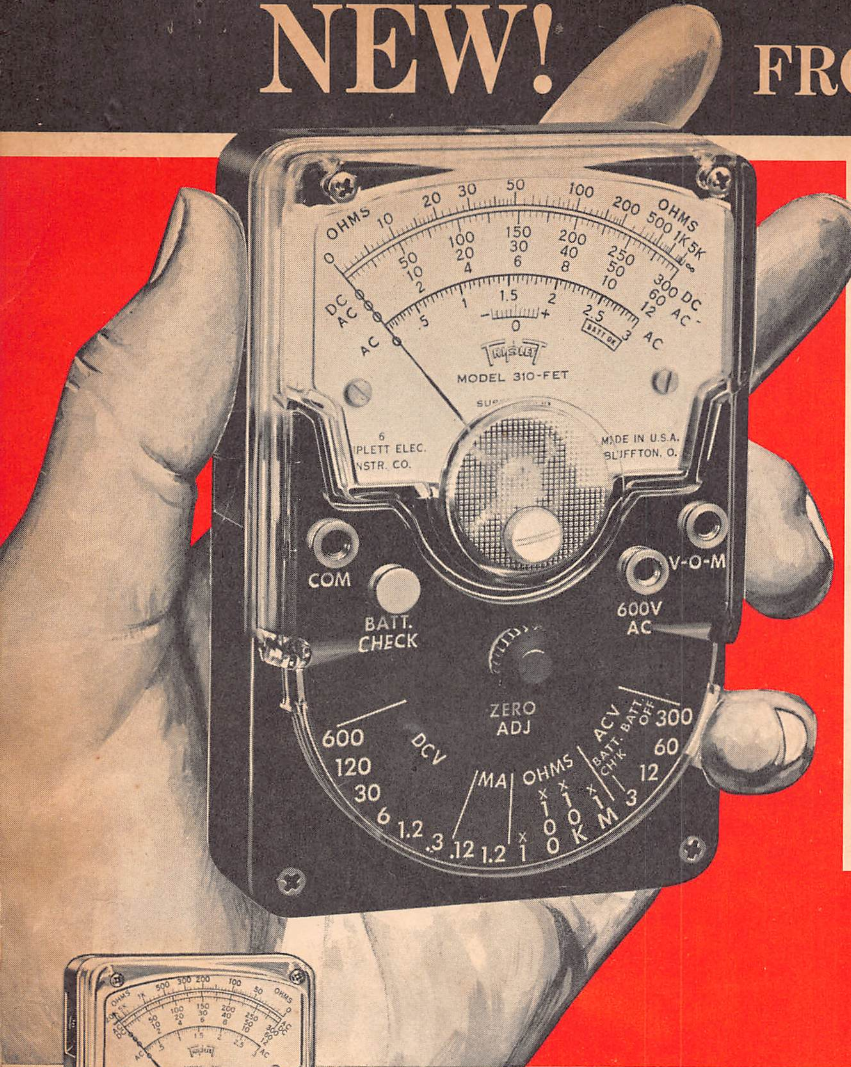
NEW! FROM TRIPLETT CORPORATION



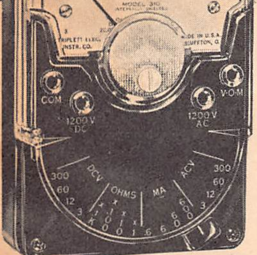
MODEL 310-FET
TRIPLETT ELEC. INSTR. CO.
MADE IN U.S.A. BLUFFTON, O.
COM
V-O-M
BATT. CHECK
600V AC
ZERO ADJ
DCV
MA
OHMS
ACV
BATT. CHK
BATT. OFF

MODEL 310 F.E.T.

1. All Solid State (FET)
2. High Sensitivity (300 mV DC fs)
3. Hand Size with single selector switch

Triplett's latest addition to the renowned 310 series is an industry classic with unerring accuracy! ± 3% DC; ± 4% AC. High sensitivity for measuring transistor bias. Four resistance ranges to 5,000 megohms. Internal battery check, provisions for Clamp-on AC ammeter and many more Triplett features. DC volts: 0-0.3-1.2-6-30-120-600 at 10 meg; AC volts: 0-3-12-60-300-600 at 5 K/v; Ohms: 0-5K-500K-50 meg-5,000 meg; DC amps: 0-0.12-1.2 ma at 300 mV. 2¾″ x 4¼″ x 1⅛″.

62F250. NET........................$70.00

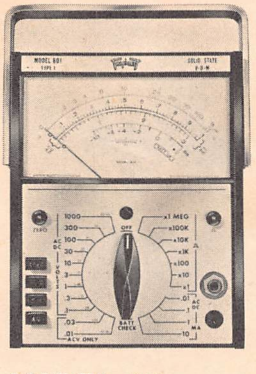


TRIPLETT'S MODEL 310 AND 310-C

The popular 310 VOM and the improved 310-C with taut-band meter are favorites among servicemen everywhere. 20,000 ohms/DC volt sensitivity with shirt pocket size for added convenience. Interchangeable test prod fits top of case to free one hand. The Model 10 Clamp-on ammeter plugs into top, a perfect combination for home appliance servicing. AC/DC ranges: 0-3-12-60-300-1200 (600, 310-C); Ohms: 0-20K-200K-2 meg-20 meg; DC current: 0-600 ua-6 ma-60 ma-600 ma. 2¾″ x 4¼″ x 1$\frac{5}{16}$″. Accessories included.

Model 310. 62F230. NET....................$44.00

Model 310-C. 62F292. NET..................$56.00



MODEL 601
SOLID STATE V-O-M
BATT CHECK

MODEL 601

Modern in design, modern in application. Resistance range includes 7 "Low-Power Ohms" positions to prevent damage to ICs. A total of 52 measurement selections with one switch and four pushbuttons. 11 meg ohm input impedance. DC: 0-.1-.3-1-3-10-30-100-300-1000; AC: 0-.01-.03-.1-.3-1-3-10-30-100-300-1000; Ohms: 0-1K-10K-100K-1 meg-10 meg-100 meg-1000 meg; AC-DC ua: 0-10-100-1000-10,000; DB: —40 to +60.

62F1768 NET......................$150.00

MODEL 600

A single, portable, low-cost unit with the right impedance (11 meg) needed for advanced electronic testing. One selector switch for convenient operation.

62F1769 NET..............................$82.00

Backed by the famous DOUBLE guarantee—the manufacturer's and Newark's!

Newark has grown with the needs of the industry by providing:

- Telex, TWX and WATTS service for instant communications
- Ultra-modern order control
- Factory OEM pricing
- Outstanding Leadership and Service for 50 years.

Newark is a AAA-1 rated company.

Count on Newark for these important services:

- Emergency department for special handling of your critical replacement needs.
- "Custom Stocking" Program tailored to your requirements. Tell us your projected requirements. We'll build our inventory around your needs.
- Fast, firm quotations from our Bid Department on quantities larger than listed, or items not shown in catalog. Credit available to rated companies. All non-catalog items must have return authorization before return.

T-Packages

-D-
Package

DTL — 930 SERIES

Add suffix "J" for flat pack; suffix "D" for Dual In-Line, or suffix "T" for 10 pin TO-15.

Type	Description	1-24	25-99	100-999
HSC930	Dual 4-Nand Gate	3.81	3.05	2.53
HSC932	Dual 4-Buffers	4.58	3.67	3.04
HSC933	Dual 4-Input Expander	3.40	2.72	2.20
HSC944	Dual 4-Power Gates	4.58	3.67	3.04
HSC945	Clocked Flip Flop	5.34	4.27	3.55
HSC950	AC Binaries	7.20	5.76	4.78
HSC951	Monostable Multivibr.	7.20	5.76	4.78
HSC962	Triple 3-Nand Gate	4.22	3.38	2.80

DTL — 2000 SERIES

Add suffix "D" for Dual In-Line Package.

Type	Description	1-24	25-99	100-999
HSM2000	Quad. Level Translator	13.00	12.00	10.00
HSM2001	High V High Curr Driver	13.00	12.00	10.00
HSM2002	Lamp Driver	16.00	14.00	12.00

AMPLIFIERS — 700 SERIES

Add suffix "T" for TO-5 only.

Type	Description	1-24	25-99	100-999
HSC702	Wide Band DC Ampl.	6.00	5.00	4.00
HSM709	High Gain OP Ampl.	15.00	13.00	10.00
HSC709	High Gain OP Ampl.	7.50	6.50	5.00
HSM710	High Speed Diff. Comp.	12.00	10.00	8.00
HSC710	High Speed Diff. Comp.	6.00	5.00	4.00
HSC711	Dual Diff. Comparator	7.50	6.50	5.00

HLT^{2}L/100-199 SERIES

Add suffix "D" for Dual In-Line Package, or suffix "T" for TO-85.

Type	Description	1-24	25-99	100-999
HSF103	Sep. Clock 35 & 50 MHE	10.17	8.15	6.93
HSF113	Com. Clock Dual J-K/F-F	10.17	8.15	6.93

HLT^{2}L/200-299 SERIES

Add suffix "D" for Dual-in-Line package, or suffix "T" for TO-85.

Type	Description	1-24	25-99	100-999
HSF253	Nand Input J-K Flip Flops	7.54	6.03	5.13
HSF263	OR Input J-K Flip Flops	7.54	6.03	5.13

NOTE: All of the above types and more are available in standard flat packs, TO-5, 14 Pin DIP.

HLT 2L-0-99

Add suffix "J" for Flat-Pack or suffix "D" for Dual In-Line Package.

Type	Description	1-24	25-99	100-999
HSG43	Dual 4-Nand Gates	4.62	3.69	3.14
HSG53	Expandable Quad 2-Input or Gate	4.62	3.69	3.14
HSG63	Single 8-Nand/Nor Gates	4.62	3.69	3.14
HSG73	Expandable Dual Output Dual 2-Nor Gates	5.62	4.49	3.82
HSG93	Exclusive OR Gates w/Complement	5.62	4.49	3.82

HLT^{2}L/100-199 SERIES

Add suffix "D" for Dual In-Line Package, or suffix "T" for TO-85.

Type	Description	1-24	25-99	100-999
HSG103	Expandable Triple 3-Inputs OR Gates	4.62	3.69	3.14
HSG113	Expandable Dual 4-Inputs OR Gates	4.62	3.69	3.14
HSG123	Expandable Single 8-Nand/Nor Gates	4.62	3.69	3.14
HSG133	Dual 4-Nand/Nor Drivers	5.62	4.49	3.82
HSG143	Quad 2-Nand/Nor Gates	4.62	3.69	3.14
HSG153	Quad 2-Inputs & OR Expanders	4.52	3.61	3.07
HSG163	Triple 2-Inputs Buss Drivers	5.62	4.49	3.82
HSG173	Dual 4-Inputs OR Expanders	4.52	3.61	3.07
HSG183	Dual 4-Inputs OR Expanders	4.52	3.61	3.07
HSG193	Triple 3-Nand/Nor Gates	4.62	3.69	3.14

HLT^{2}L/200-299 SERIES

Add suffix "D" for Dual In-Line Package, or suffix "T" for TO-85.

Type	Description	1-24	25-99	100-999
HSG213	Expandable Nand/Nor Gates	4.95	3.96	3.36
HSG223	Nand/Nor Gates	4.95	3.96	3.36
HSG233	Quad 2-Inputs Nand/Nor Expanders	4.52	3.61	3.07
HSG243	Nand/Nor Gates	4.95	3.96	3.36
HSG253	Expandable Nand/Nor Gates	4.95	3.96	3.36
HSG263	Nand/Nor Gates	4.95	3.96	3.36
HSG273	Dual 4-Inputs Nand/ Nor Gates	4.52	3.61	3.07

HLT^{2}L/0-99 SERIES

Add suffix "D" for Dual In-Line Package, or suffix "T" for TO-85.

Type	Description	1-24	25-99	100-999
HSF13	Set-Reset Flip Flops	4.62	3.69	3.14
HSF23	S-R Clocked Flip Flops	5.62	4.49	3.82
HSF33	Single-Phase S-R-T Flip Flops	6.16	4.94	4.19
HSF53	Nand Input J-K Flip Flops	6.87	5.50	4.67
HSF63	OR Input J-K Flip Flops	6.87	5.50	4.67

INTEGRATED CIRCUITS DEVICE DESIGNATIONS

When you order a Texas Instrument integrated circuit, the designation must contain three (and may contain four) parts.

1. PREFIX　2. UNIQUE DEVICE DESCRIPTION　3. PACKAGE　4. SPECIAL INSTRUCTIONS (optional)

EXAMPLE: SNR • 54H72 • F • 02

PREFIX
MUST CONTAIN TWO OR THREE LETTERS

SN	Standard Prefix
SNR	Hi-Rel processing without Group B and C
SNT	Hi-Rel processing with B and C
SNX	Preliminary Device prefix

UNIQUE DEVICE DESCRIPTION
MUST CONTAIN THREE, FOUR, OR FIVE CHARACTERS

EXAMPLES:	15930 74H72 510B 777	52709 5473 521A 5161B

PACKAGE
MUST CONTAIN A SINGLE LETTER ONLY
—F THROUGH 2

S	Flat package	Kovar	Case grounded
F	Flat package	Kovar	10 or 14 leads std.
T	Flat package	Kovar	10 or 14 leads long
L	TO-5 type	....	8 or 10 leads
N	Dual in line	Plastic	14 or 16 leads
J	Dual in line	Ceramic	14 or 16 leads

SPECIAL INSTRUCTIONS
MUST CONTAIN TWO NUMBERS ONLY IF PACKAGE DESIGNATION IS "F" OR "R"

No.	Formed leads	Insulator	Mech Pak	Tinned leads
00	No	No	No	No
01	Yes	Yes	No	No
02	No	No	Yes	No
03	No	Yes	Yes	No
04	Yes	No	Yes	No
05	Yes	Yes	Yes	No
06	No	Yes	No	No
07	Yes	No	No	No
10	No	No	No	Yes
11	Yes	Yes	No	Yes
12	No	No	Yes	Yes
13	No	Yes	Yes	Yes
14	Yes	No	Yes	Yes
15	Yes	Yes	Yes	Yes
16	No	Yes	No	Yes
17	Yes	No	No	Yes

FLAT-PACK

SERIES 7400 A TTL
COMPATIBLE HIGH SPEED DIGITAL (0° TO +70°C)

All gates of classical TTL design utilizing multiple-emitter input transistors for optimum switching speed. Compatible and interchangeable with other similar TTL logic.

TYPE ULN—2111A UNICIRCUIT
FM DETECTOR AND LIMITER

This linear device comprises a three stage limiter and a balanced product detector. Applications include TV sound channels, FM receivers, AFC systems, communication receivers, and radar etc. . . . Only one low cost single winding tuning coil necessary. Frequency range 5kHz to 50kHz.

GENERAL ELECTRIC

Hybrid circuits made by utilizing transistors and diode elements in combination with thin film resistors and capacitors. Offer optimum performance, reliability and spacesaving possibilities. All integrated circuits feature planar epitaxial passivated construction, fabricated with diffusion techniques in a single silicon eqitaxial monolithis substrate. All MOS devices are P-channel enhancement mode. In hermetically sealed packages.

OPERATIONAL AMPLIFIER — DUAL IN LINE

PA238. Economy amplifier provides performance associated with more expensive counterparts. ±6V input supply, ±5V output swing, 7000 open-loop voltage gain. Input is differential.

Type	1-9	10-99	100-999
PA238	6.75	5.40	4.05

ONE WATT AUDIO AMPLIFIER — DUAL IN LINE

PA234. Utilizes only three capacitors and three resistors for performance operation. Suitable for both battery and line cord circuits — operates from supply voltage 9V-25V. Tab on package allows for direct heat transfer to printed circuit board.

Type	1-9	10-99	100-999
PA234	2.75	2.20	1.65

ZERO VOLTAGE SWITCH — DUAL IN LINE

PA424.. A synchronous switch used to pulse thyrsitor and at ac zero voltage crossing thus eliminating radio frequency interference. Excellent for precision temperature control applications with thermistor as input device.

Type	1-9	10-99	100-999
PA424	8.30	6.64	4.98

FUNCTIONAL AMPLIFIER

D12X218. Active functional amplifier circuit featuring unity voltage gain with minimum input resistance of 50 ohms. Voltage required: 43 V. Temp. range: —25° +125°. 12 lead flat package.

MEDIUM FREQUENCY AMPLIFIER—TO-5

D12X207-2. Same as 12X207-1 above, but min. voltage required is 20 V; voltage gain with Eu = 1 mV. 400 Hz is 350/700 mV; and max output volts is 4.5.

Type	1-99	100-999
D12X207-2	60.00	40.00

● *NEW* 5-WATT POWER AMPLIFIER

PA246 monolithic power amplifier for 5 watts of continuous power to 16-ohm load. Can be operated from variety of voltages and load impedances. Contains 8 leads and 2 heat sink tabs. Leads are staggered to allow proper PC design and external heat sinking can be readily attached to tabs during flow of PC board.

Type	1-9	10-99	100-999
PA246	6.65	5.32	3.99

TWO WATT AUDIO AMPLIFIER — DUAL IN LINE

PA237. Capable of operating from a wide variety of supply voltages (9 to 27V) into numerous load impedances. Features excellent sensitivity, 8 - mV open loop, 2% distortion. Versatile circuit may also be utilized as servo amplifier or voltage reg.

Type	1-9	10-99	100-999
PA237	5.50	4.40	3.30

DIODE SHUNT QUAD — DUAL IN LINE PACKAGE

PA908. For gating and ring demodulation uses. 4 lead package.

Type	1-99	10-99	100-999
PA908	9.65	6.45	4.30

LOW LEVEL AMPLIFIER — DUAL IN LINE PACKAGE

PA230. Designed and specified for low signal audio prosucts. Supply voltage: +12V, output 10 V p-p, 7000 ioen loop voltage gain. Also excellent as general purpose dc amplifier.

Type	1-9	10-99	100-999
PA230	3.35	2.68	2.01

INTEGRATED VOLTAGE REGULATOR

D13V in TO-98 Epoxy. Regulates up to 40 volts by selection of External resistance.

Type	1-99	100-999	1000-Up
D13V	.65	.44	.36

PHASE CONTROL — DUAL IN LINE PACKAGE

PA436. For application in Triac gating when controlling resistive or reactive loads. Feedback operation provides continuous precision control. Circuit is adjustable for various input and sensitivity combinations. Operates directly from AC line.

Type	1-9	10-99	100-999
PA436	12.20	9.76	7.32

HIGH PERFORMANCE OPERATIONAL AMPLIFIER

PA223. Features differential Darlington input with input impedance of 2.5 megomhs. ±12V input supply operation with ±10V output swing. Other features include 8000 open loop voltage gain and 80-nA bias current.

Type	1-9	10-99	100-999
PA223	14.85	11.88	8.91

IF AMPLIFIER—DUAL IN-LINE PACKAGE

PA189. 80 db gain at 4.5 MHz, will also provide for 40+ db at 40 MHz in tuned circuit. Operates at voltages up to 30 V. Uses include and wide range of industrial applications.

Type	1-9	10-99	100-999
PA189	3.75	3.00	2.25

VIDEO AMPLIFIER—TO-5

D12X257. Video amplifier with 2 trans. with ft's in excess of 600 MHz. Has broadband capabilitier for frequencies up to 25 MHz. 8 lead TO-5 package.

Type	1-99	100-999
D12X257	45.00	30.00

MEDIUM FREQUENCY AMPLIFIER—TO-5

D12X207-1. Amplifier with 3 very high gain transistors and 5 thin-film resistors. 10 Ohms min. Min. of 30 V required. Noise voltage: 400-100,000 Hz @ 10 mV.

Type	1-99	100-999
D12X207-1	75.00	50.00

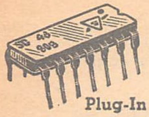
Sylvania Integrated Circuits

SUHL I AND II



Plug-In

SUHL circuits characterized into two temperature ranges: —55°C to ±125°C for military applications and 0°C to +75°C for industrial and commercial use. SUHL I circuits designed for applications up to and including 20 megacycles, with gate propagation delays within 10 nanoseconds.

Single chip high speed (20 mos) Si planar epitaxial, hermetically sealed units. Low speed-power product. Provides fan-in capabilities as high as 18. Use suffix —02 for standard flat package and suffix —03 for Plug-In package when ordering types with SF, SG, SM and SA.

Flat-Pack

1N3015*	200	12	300	13.75	11.90	10.35

* Military and Meg-a-life units available.

ORDERING INFORMATION

Specify tolerance desired by adding proper suffix to type number. When reverse polarity is desired, add "R" suffix to type number. For Meg-a-life II, level 1, add ML1 suffix; Meg-a-life II, level 2, add ML2 suffix; Meg-a-life II level 3, add ML3 to type number.

50 WATT DIFFUSED ZENER DIODES—Case 54 & 58

Standard tolerances of 5, 10, and 20% available. No suffix is 20%, "A" suffix is 10%, and "B" suffix is 5%. Reverse polarity types available—add "R" suffix to type number.
* Military and Meg-a-life units available.

MOTOROLA THYRISTORS

Devices range from plastic milliamp units to 1000 ampere radar pulse modulator types. Voltage range and package configurations are designed to meet a wide variety of applications. For more Motorola Thyristors—see preceding and following pages.

NEWARK can supply all Motorola Semiconductors.

*P Channel

MATCHED PAIRS JUNCTION N CHANNEL

Consists of two individual devices which have been carefully matched for critical applications, such as differential amplifier service. Each pair is packaged in a metal clip for pair identity.

Type	Case Pair	BVgss Volts Min.	Idss mA Min/Max	Vgs V Max	1-99	100-999	1K-Up

1 WATT ZENER VOLTAGE REGULATORS (FLANGELESS)—DO-13

These zener regulators are designed primarily for continuous feeding in automated assembly processes. All of the units are process-selected so that they may assure extremely sharp zener "knees" and excellent voltage regulation over the entire operating temperature range. These devices have ±20% tolerance. Add "A" to type number for ±10% tolerance.

POWER RANGE SELENIUM RECTIFIERS

Wide range of rectifying application includes power supplies and voltage regulation, plate voltages and filament supply, plating and electrolysis, battery charging, relays, circuit breakers and numerous communication systems.
For forced air cooling at 800 LFM, multiply all above ratings by three.

Type	Output Volts DC	Output Amps DC	AC Volts	Fig.	1-24	25-99

SCR FIRING CIRCUITS

IR's FC standardized SCR firing circuits provide hard-firing gate triggering pulse, eliminates SCR (failure). Negative gate bias of 0.7V allows full utilization of SCR's dv/dt. Magnetic amplifier isolated gate signals permit use in full-wave DC or anti-parallel AC applications. Units suitable for firing all JEDEC SCR'S rated 10 amps or more plus 40 RCS series listed on this page. FC-100 single phase unit at 120/240 volts. Size: 5″x6″x2.54″. FC-200 three phase unit at 240/480 volts. Size: 6″x9.5″x2″. FC-300 three phase unit rated at 240/480 volts. Size' 5″x6″x7.30″.

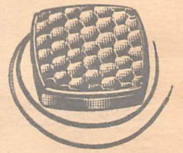
CADMIUM SULPHIDE PHOTO CELL—FIG. B



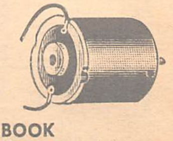
Type CS-120 "Light Sensitive" resistors for activating relays. For door-openers, burglar alarms, traffic and industrial counters, turning on lights, etc. Maximum voltage 120 AC or DC; 0.2 Watt. Shpg. wt., ¼ lb. Size: 1⅛x1⅛x3/16".

Type CS120C. 1-99 ....2.35
100-999 ....1.57

PHOTO CELL KIT

DD190C Fig. B—K-421 Kit includes 3 selenium photo, 2 silicon solar, and 2 cadmium sulphide cells. Special Value package contains four selenium photo cells with outputs from one-third to one-half volt and 0.5 to 3 milliamps in bright sunlight. Free 24 page manual.
Type DD-190C. 1-4..............**.99** 5-9..............**.99** 10-99..............**.89**

TYPE EP50C EXPERIMENTAL MOTOR



Anti-friction bearings for operating directly from S4M or two SIM solar cells. Working voltage from 0.35 to 1.50 volts.

Type	1-4	5-9
EP50	3.95	3.95

CONTROLLED RECTIFIER HANDBOOK

Type HB-40. 110 pages containing the basic theory on the principles and uses of SCR's.

SCHAUER SEMICONDUCTORS

$54.57 VALUE FOR ONLY $24.50

A 51-piece assortment of 1% tolerance, 1 watt reliable Schauer zener diodes covering the voltage range of 2.7 to 16.0V.

Kit SCH51	24.50

SILICON VARISTORS

Consists of two matched silicon junctions connected in parallel and oppositely poled. Surge: 25 amps peak ½ Hz; dissipation: ¾ watt at 25°C.; TC of 2mv/°C.

SK REPLACEMENT SEMICONDUCTORS

For replacement purposes in line-and-battery-operated portable radios, phonographs, tape recorders, TV receivers, and af Amplifiers. *Description and application apply to both items. † Means drift-field. RF, IF amplifiers are applications of the SK3006, SK3007, SK3008, and SK3011.

COMPLEMENTARY SILICON CONTROLLED RECTIFIERS

Three terminal PNPN device in TO-98 package. Offer flexibility in circuit design through use of anode gate. Feature low leakage current, low triggering current, low forward voltage drop, and high gate breakdown voltage.

Type No.	PRV and VBO (V)	Max. IDC (A) @ 100°C	Typ. Reqd. Gate Signal	Each

A9013
A9015
C1012
C1013
C1112
C1113
C3512
C3513
C5014

New potted rectifiers A1423 and A1425 are 50 Volts to 12000 Volts.

Ordering rectifier stacks: order by series type number (e.g. 4JA1011) and include required current voltage, transient voltage, max. ambient temp., phases, circuit configurations, and load. SCR series specify connection and/or supply circuit diagram.

NEWARK carries complete lines of top quality electronic equipment. Newark can supply all your needs, whether or not they are listed in this catalog.

EXPERIMENTAL/HOBBYIST ELECTRONIC COMPONENTS

Electronic components for experimenter, with schematic diagrams.

Type	DESCRIPTION	Net
GE-X1	SILICON CONTROLLED RECTIFIER. 117-volt solid state switch. Controls up to 4.7 amps.	2.60
GE-X2A	LIGHT ACTIVATED POWER switch. It will conduct up to ¼ ampere, up to 25 volts.	2.80
GE-X3	HIGH CURRENT SILICON CONTROLLED RECTIFIER. For up to 13 amps @ 50 PIV.	4.00
GE-X4	CONVENTIONAL HIGH CURRENT SILICON RECTIFIER. 20 amp rating. For up to 200 PIV.	1.60
GE-X5	HIGH SENSITIVITY SILICON CONTROLLED RECTIFIER. For special circuits up to 1.6 amps and 50 volts. Activated by extremely low signal power (a momentary sig. power of 200 micro watts or less).	2.30
GE-X6	PHOTO CONDUCTIVE CELL. Cadmium sulfide end-illuminated. Up to 250V peak. AC/DC.	1.40
GE-X7	REED SWITCH. Carries from 15 volt-amperes to micro-amps. External magnetic acuation.	.80
GE-X9	MED. SPEED, PNP TRANSISTOR. Germanium alloy. For medium power amplification and switching at low frequency.	.70
GE-X10	UNIJUNCTION TRANSISTOR. Three-terminal semiconductor. Has low value of firing current, stable negative resistance, stable firing current, high pulse current capability.	1.35
GE-X11	ZENER DIODE. Rated 8.2 volts at 1 watt.	1.80
GE-X13	DIAC—With schematic for building lamp dimmer or AC motor control.	1.60
GE-X16	SILICON CONTROLLED RECTIFIER — With schematic for building battery-operated fluorescent light.	3.45
2N107	AUDIO PNP TRANSISTOR. Alloy junction.	.75
	AUDIO PNP TRANSISTOR. Low voltage, high frequency transistor.	.75

C6109		6.2	

ZENER CHIP KIT

Offers a variety of 50 chips each of the 30 most popular zener voltages. In convenient plastic trays for easy access and physical and environmental protection.

Contents: P/N Alloy: C6100, C6101, C6102, C6103, C6104, C6106, C6107, C6108, C6109. P/N Planar: C6112, C6113, C6114, C6115, C6118. N/P Planar: C6012, C6013, C6014, C6015, C6016, C6018, C6020, C6021, C6022, C6023, C6025, C6026, C6027, C6028, C6029, C6032.

CENTRALAB

GENERAL PURPOSE REGULATORS

Typical Temp. coef. 0.03%/°C Case Type ML.

Type No.	Zener Breakdown Vz @ Izt Min.	Zener Breakdown Vz @ Izt Max.	Maximum Dynamic Zzt @ Izt (Ohms) (3)	1-99	100-Mix	100-999
RS-6	5.0	7.0	15.0	2.27	2.00	1.88
RT-6	5.0	7.0	20.0	2.27	2.00	1.88

LOW VOLTAGE DOUBLE ANODE REGULATORS

150 mW at 25°C. No suffix = ±10% tolerance.
For ±5% tolerance add suffix "A" to type number.

Type No.	Min.	Max.	Zzt @ Izt (Ohms) (3)	1-99	100-Mix	100-999
1N225 (1)	7.5	10.0	......	2.27	2.00	1.88
1N226	9.0	12.0	......	2.27	2.00	1.88
1N227	11.0	14.5	......	2.27	2.00	1.88

250mW REGULATORS

250 mW at 25°C. Standard unit ±10% tolerance.
For ±5% tolerance add Suffix "A" to type no. Case type DO-7.

Type No.	Min.	Max.	Zzt @ Izt (Ohms) (3)	1-99	100-Mix	100-999
1N702A	2.3	2.9	60.0	1.00	.90	.80

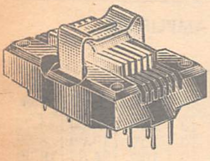
CAMBION

FLAT PACK HOLDERS



Accepts any std. 14-lead flat pack.

Molded diallyl base; raised platforms prevent moisture trapping. Available with .025" gold plated pins for soldering, or plug-in, or .025 square wire wrapped contacts. Size: 1.200" x .776" x .625" (less pins).

Stk. No.	Type No.	Contact Type	1-9	10-49	50-99

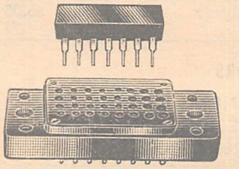
40F3997	3774-1	.025" sq. wire wrap	3.30	2.97	2.64

HIGH RELIABILITY IN-LINE SOCKETS



Molded diallyl — .100" contact spacing. Patented gold plated jacks with ribbon insert for use with .200" or .300" standard 14/16 flat pin modules. Size: 1.500" by .600"; molded height .275". Removable headers, replacable pins. For continued re-use in laboratory, R & R and design breadboarding use.

DUAL IN-LINE IC SOCKETS

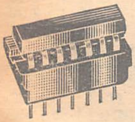

Fig. 1

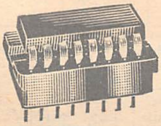

Fig. 2

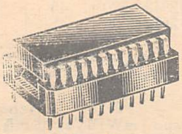

Fig. 3

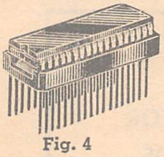

Fig. 4

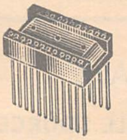

Fig. 5

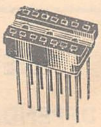

Fig. 6

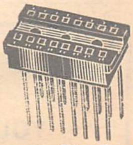

Fig. 7

High Density IC Sockets, which accept 14, 16, 24 and 36-pin dual in-line integrated circuits, are available with either wire-wrap or solder tab terminations. These new sockets may be used individually or panel-mounted for production or breadboarding applications. Features such as one-piece wire-wrap contacts, accepting round or flat leads up to .024" (0.61mm), and a one-piece molded diallyl insulator insure excellent conductivity and mechanical stability.

300 SERIES RADIAL RECTIFIER COOLERS

Radial fin coolers for rectifier or stud mounting transistor applications. Adaptable to stack arrangements. Uses standard teflon insulating washers. Accommodates press-fitted and stud-mounted rectifiers and transistors up to 11/16" hex case. Semiconductor mounting surface and one mounting foot unanodized. Type no. suffix indicates mtg. accommodations: see following page for key.

400 SERIES NATURAL CONVECTION COOLERS

Optimum fin design provides many semiconductor applications. Model NC441 with cooling area of 400 sq. in. provides thermal resistance of .54° c/w @ 100 watts. Type NC-433 has 70°C. rise at 100W power dissipation. Type no. suffix refers to mounting specs: see chart on following page.

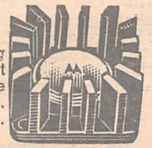
SERIES 680 CIRCUIT BOARD COOLERS



Provides optimum natural convection cooling per unit volume occupied above the circuit board. Mounting in any position is possible since it permits free air flow in any direction. All have 1.81" sq. base with 1.50" bwtn. mtg. holes. 1.3 to 1.9 oz.

THERMALLY CONDUCTIVE ADHESIVE

DELTA BOND ·152

Type 152. High conductivity adhesive used: As general adhesive. for bonding semi-conductors to chassis heat sinks, fabricating heat sinks or thermal linds, for permanent bonding of all materials with highly thermal conductive interface. Porous and nonporous surfaces. Excellent dielectric strength. Bond shear strength, 1" overlap psi, 30 immersion in water unaffected. Temp. range —70°F to +300°F.

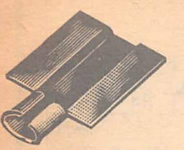
HEAT-SINK FOR TO-92 TRANSISTOR



Type 292. Heat-Sink accomodates most TO-92 plastic transistors for heat dissipation. Finish: black immersion. Natural convection characteristics show that for power dissipation of .20 watts: collector lead temperature rise above ambient is 18°C. Made of type 6061-T6 Aluminum.

Stock No.	Type	Size	100 in each Package Price Per Package 1-4	5-9	10-24	25-49

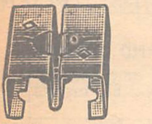
SNAP-ON CIRCUIT BOARD HEAT SINKS



Series 140 supplements the Series 200 Featherweight Heat Sinks. Types 140, 141, and 142 fit popular press fit diodes and SCR's as well as JEDEC TO-8. Case dia. ranges from .480 to .505. Provides thermal resistance as low as 10° c/w. Material: highest thermally conductive aluminum. Finish: black anodize is standard. Wt.: 140—.14 oz.; 141—.20 oz.; 142—.42 oz.

Stock No.	Type	Size	1-499	500-999	1000-2499	2500-4999

KURZ-KASCH

SPECK-O-LITE

The amazing Speck-O-Lite takes advantage of a new breakthrough in the science of optics: the fiber optic light guide. The Speck-O-Lite can effectively bend light around corners, take light into tiny crevices, and slide light through narrow slits that completely frustrate conventional lighting devices. Use the shock-proof Speck-O-Lite to illuminate impossible-to-reach parts in a sophisticated assembly; read code markings on small parts without removing them from the recesses of an enclosure; light enclosed components from the inside if you have an opening as small as 1/8" thick.

Photocells are hermetically sealed in glass cases and are available with cadmium selenide and cadmium sulfide sensors. Rugged mechanical construction, small size and light weight provide ease in mounting. Wide range of characteristics and high voltage capability provide a low noise, completely ohmic light dependent variable resistor, useful over a wide range of voltage and illumination. Cadmium selenide cells, having faster switching speeds are especially suitable for chopper and other control or switching applications requiring operation up to one kilocycle per second. Color response covers the visual light range and extends well into the infra-red. Cadmium sulfide cells, having a lower temperature coefficient, are especially suitable where stability over a wide temperature range is required. The improved temperature stability and more linear response to illumination makes this type particularly good for applications requiring better stability in hostile environments.

(*Have cadium selenide sensitive material, remaining photocells have cadmium sulfide).

BAUSCH & LOMB

FIBER OPTICS "LIGHT WIRES"

Permits transmission of light beams around corners and thru intricate bends. Numerous applications exist in aerospace R & D, photography, electro-optics, automation, and production systems. Extremely useful in optimizing photocell performance by channelling light onto photosensitive surfaces; may be used as "transmission lines" for modulated light signals, eliminating the need for complex, delicate systems of lenses and prisms. Each "wire" is made of a bundle of approximately 1,100 to 16,000 tiny 40μ diam. fibers; each fiber consists of a core covered with a cladding of slightly lower index of refraction —light is channelled from one end of the bundle to the other by a process of total internal reflection. Because of this core/clad combination, dirt, oil, tar, and most other contaminants will have practically no adverse effect on light transmission. To provide mechanical protection, the bundles are encased in PVC or crush resistant aluminum tubing and furnished with brass end fittings. Will transmit the visible and near-infrared portions of the spectrum, but are not practical in the UV region. Temp. range: —40 to +200°F.

EXPERIMENTAL KIT

Special kit for experimenters, designers and engineers. Explore first-hand the wide range of applications for Fiber Optics. Kit contains four standard light wires (1 each 32-01-06, 32-02-12, 32-03-18, and 32-13-24) plus ten feet of continuous light wire, 12 ferrules, and crimping tool, for fabricating custom-made light wires of any desired length.

- Ideal replacement for Switches — Relays — Potentiometers

Four terminal optoelectronic device which performs a variety of control functions, providing noise-free control of AC or DC signals over a wide dynamic range without transients or contact (or wiper) chatter. Since there are no moving parts, the Raysistor is exceptionally rugged and has inherently long life in typical applications as variable resistors, solid state switches, relays and voltage or signal isolators. Unit operates on the principle of controlled light acting on a photoresistive element. No electrical or mechanical connection exists between the control and signal circuit. * With Socket.

RAYTHEON PHOTOCELL

Hermetically-sealed solid-state light dependent resistor using a cadmium selenide photosensitive material designed for use in optoelectronic control circuitry. Fast switching speed suitable for chopper and other control and switching appliances requiring operation up to one kilocycle. Coupled with a high voltage capability, provides a very low noise variable resistor which is ohmic over a wide range of voltage and illumination. The TO-5 package permits use of standard mounting hardware.

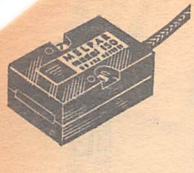
MELPAR, INC.

PHOTOELECTRIC READER



Consists of light source, lens and photocell. Utilizes the advantages of detection by reflected light. Lamp, 6v at 0.2 amp; dc recommended; nominal life 10,000 hr at 5.4v. Photocell; nominal input, 20vdc. Max. input, 300 vdc. 50 mv max. dissipation. Nom. response: 7250 angstroms, std. Maximum counting rate on std. unit; 300 counts per second. Versatile; counts, cues, sorts and inspects. Features small size (0.6 cu. in.), and insensitivity to ambient light.

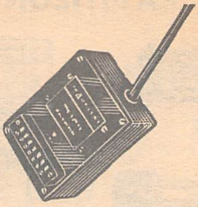
PHOTOELECTRIC CONTROL UNITS



Transistorized photoelectric control units provide high reliability at low cost for automatic control systems using the companion photoelectric readers 150, and 200A. These control units feature long life, ease of maintenance and highly simplified installation. In one compact unit are contained a power supply, amplifier and controlled switching.

Model 155A. Control unit companion to the 150 photoelectric reader. Input power: 115V, 60HZ, 6W. The control relay is SPDT, 115V 1A non-inductive. The maximum operating rate is 1000/Min. Complete with 5' cord. Case size: 4" x 2⅞" x 1½".

Model 205A. Control unit companion to the 200A photoelectric reader. Input power: 115V, 60HZ, 17W. The control relay is SPDT, 115V 1A non-inductive. Maximum operating rate 1000/Min. 5' cord included. Case size: 6¼" x 3¾" x 2".

SERIES LIGHT L10 CHOPPER

Economical light chopper used for light beam modulation, pulsing, scanning, sweeping, and control. Exclusive features: Compact size, jeweled bearing, lower power input, wide angle of excursion (up to 20°), optical quality, high reflectivity and replaceable mirror and bearings. Specifications: Input power: Sine wave, 1½ v. (typical). Power consumption: 25 milliwatts. Mirror finish: aluminized front surface or optical mirror. Mirror size, 1 Cm^2. Frequency to 500 Hz std. Size 1²⁹⁄₃₂" x 1¹⁵⁄₃₂" x .8".

Stk. No	Description	1-3	4-9	10-24	25-49	50-Up
99F854	L10 Chopper	55.95	47.95	38.95	33.95	29.95

TUNING FORK OSCILLATORS

A combination of tuning fork and high gain amplifier circuit which generates a sq. wave output with the application of dc voltage. Accuracy; ±.1% @ 0 to 65°C std., —40° to +100° operational. Input voltage: 12VDC. Output: Square wave, approx. 50% p-p min. of output voltage into 10K external load. The terminals are solder hooks which can be cut off to pin for printed circuit mounting. Typical applications: lab. std., test equipment, motor control, timers, etc. Stable, rugged and reliable.

The 10HDN6 is 1²⁹⁄₃₂" x 1¹⁵⁄₃₂" x 1²¹⁄₃₂".
All others are 1²⁹⁄₃₂" x 1¹⁵⁄₃₂" x .4".
* Divided to 60HZ from 480 HZ.

Stk. No.	Model	HZ	1-9	10-24	25-49	50-Up

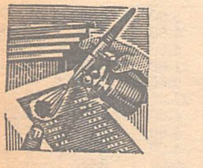
MEL-INK PERMANENT MARKING COMPOUND



Typical uses include identifying nomenclature on printed circuit boards, sheet metal chassis, and most components. Non-conducting.

Type M-300. Hard-setting epoxy with a viscosity suitable for machine and hand stamping, as well as silk screening. Prevents smearing of stamped information on completion of the curing cycle. Excellent solvent resistance.

N120CG-11L	430	62.7	27	7.45	6.25

STANDARD SOLAR CELLS

Operating and storage temp. range —65°C to +175°C. Speed of response 10 microseconds or less depending on load resistance. Spectral response 0.4 to 1.15 microns, peak at 0.85 microns. Measured at tungsten light source with a color temp. of 2800° K @ a light level which corresponds to 100 mw/CM^2 of sunlight as correlated by means of a standard solar cell. Cell test temp. is 28°C.

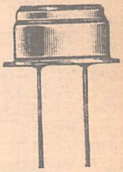
GENERAL ELECTRIC

PHOTOCONDUCTIVE CELLS



Hermetically sealed after evacuation and back filled with dry air to reduce the moisture content to approx. .015%. Cells come in three basic sizes, four power ratings, and multiple resistance ratings. Wide range enables the designer to select a maximum power dissipation of 75, 250, 300 or 600 mw. By using cells to operate many devices directly, amplifying stages can be eliminated and overall circuits greatly simplified. Cells have very high sensitivity and spectral response peaks in the visible light range. Near maximum response obtained over large portion of the spectral region. All are in glass-metal packages. Have flexible leads and small size to dissipation ratio. No external shields required. May be used for annunciators, anemometers, camera aperture control. * Dia. excludes flange.

† Plastic encapsulated (not hermetically sealed). * cadmium-selenide device.

PHOTOCONDUCTIVE CELL-LAMP COMBINATION

Photoconductor-lamp combination includes cadmium-sulfide (PL5C1 is cadmium-selenide) photoconductive cell and a variable illumination source enclosed in a light-tight package. Photoconduction is controlled by varying the voltage to the light source. Intended to be used for circuit isolation as a potentiometer free of moving-contact noise, and for low-level switching.

Stk. No.	Type	Lamp Volts Current	Max. Volts	Resistance 20%V	Resistance 90%V	Temp.	1-249	250-up

DRY REED SWITCH

Contains a pair of magnetic overlapping, contact bearing cantilever reeds sealed in a glass tube filled with dry inert gas. Life expectancy 20 million cycles. Operating temperature —65° to 150°C. Shock without false operation. 40G's, except DR100, 15G's. Length, with leads 3.21", Dia. .215". Contacts; normally open. Max. voltage 250 Volts.

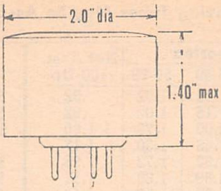
PAM-1 PHOTOCELL AMPLIFIER MODULE

Specifications @ 25°C Ambient

Input: 30VDC (center tapped) ±15MA
Output: 3V/vW or 6V/ft. C.
Sensitivity: Below 0.001 footcandles
Linearity error: ....2% to 10 fc.
Photometric response: 3V/μW (with 1
Rise time: ....100 microseconds
Temp. Coefficient: ....—2%/°C
Ambient Temp.: ....—25°C to +65°C



PAM-1 consists of a matched selenium photocell and a high gain amplifier which provides a short-circuit load for the photocell, causing linear operation. The output voltage is determined by the externally connected feedback resistor. The spectral response matches the sensitivity of the eye, but has considerable UV response. Sensitivity is equal to silicon photodiodes and superior to most vacuum or gas phototubes. This sensitivity coupled with the high gain amplifier provides a significant power level from this device.

VACTROL PHOTOCELL LAMP CONTROL MODULE

Package capable of circuit board mounting, for electronic amplifier use. Epoxy sealed metal enclosure. .100" standard lead centers. Minimum off-res: 100 megohms. Min. oft Resis on VT12002N is 1 meg. Dia. 9/16". VT-6005 equal to the Clairex CLM4006; VT10030 like the CML5012.

ALL SOLID STATE VACTROL

The first light emitting diode/photoresistor control (LED-PC). The LED Vactrol utilizes a high efficiency light emitting diode to achieve high performance at a relatively low signal power. Operation with adequate resistance change down to 1 milliwatt of input power. Light-to-dark ratio of 1000:1 or greater. Operation at 75 milliwatts input power will permit a 40,000-hour life for the LED. No filaments to vibrate; high shock resistance. Available in TO-8 hermetically sealed enclosure or smaller axial configuration. Response time of photocell is proportional to input power. Vf for LED is 1.5VDC. Hermetically sealed model VT-005-8; axial configuration model VT-030-18. Size: 61F1148—Mod. TO-8; 61F1149—.220 dia. x .250 axial.

SELENIUM PHOTOVOLTAIC CELLS

Constructed of steel Selenium, molecular layers of CdS and CdO. #30AWG vinyl coated wire leads on unmounted cells. May tolerate 100°C. "L" in type indicates soldered leads. Type A—long-lived, most resistant to chemical fumes, more sensitive to shorter wavelengths; Type B—for higher current output and less fatigue. * indicates 100 Ft-C, Ohms, 75"F, light source 28508K. ** means Epoxy (clear). *** Hermetic, blass to metal case.

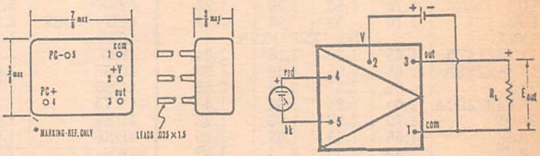
PHOTOCELL VOLTAGE MULTIPLIER



Model PVM-1. This amplifier when used with any of the special Vactec photocells, converts it to a constant current source. Combination of cell and PVM makes a solid state equivalent of gas or vacuum phototube. Large voltage changes can be readily obtained with high load resistances. Frequency response from DC to 15KHz available with small area cells. Low supply voltage and current drain make this unit ideal for battery operation. Input: 3-15VDC @ 200μA, Output: 4μA/fc/In^2 active cell area, Response: up to 10 usec., Peak Spect. Range: 5750°A, Temp. range: —25°C to +65°C.

Stock No.	Type	1-9	10-99	100-999
61F1137	PVM-1	3.50	3.00	2.75

PHOTOCELLS FOR USE WITH PVM-1

All cells furnished with 6" #30 AWG lead wires. Cells less than 0.045" thick and are coated with clear epoxy.
Other cell sizes available on request. Peak spectral response occurs at approx. 574 millimicrons of wavelength.

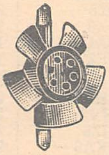
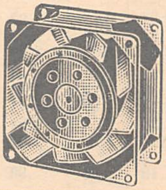
PAMOTOR MINIATURE AXIAL FANS



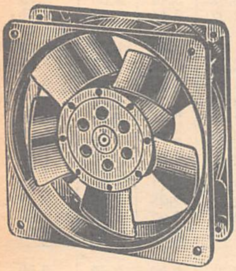
Model 4700



● *NEW* MODEL 8500 SHADED POLE

Ultra-compact 3⅛" fan. Low noise level of 28.8 db. SIL. Ideal for tight dimensional applications where performance and cost are prime considerations. Shaded pole type, 43 CFM. Wgt. 18½ oz.

Stk. No.	Type	Hz	RPM	1-9	10 24	25-49	50-99	100-249
57F1038	8500	60	3200	14.25	12.95	11.65	10.35	9.70



Model 4500

Long life—20,000 + operational hours. Continuous Duty at 45°C without maintenance. Higher air delivery at greater static pressures. All metal construction. Impedance protected 50-60-400-cycle operation. Universal 4⅛" mounting on all 4½" models. Conforms to applicable portions of Mil Specs. All fans shown below are U.L. Listed.

3½" INDUCTION TYPES

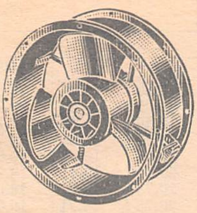
IMC MAGNETICS CORP.



CONDOR FAN

● *NEW* MODEL 10 CONDOR FAN

Model 10. Lightweight, 10" dia. and 3.5" depth design makes for easy mounting inside or outside systems enclosures. Integral venturi and skeleton assembly is sturdy die-cast aluminum equipped with long-life stainless steel ball bearings, zinc plated, steel finger guard, and fully insulated, 24" plug and cord set. 115 volts, 50/60 Hz. with standard terminal block, temp. range from —20°F to +140°F.

DC BOXER

● *NEW* DC BOXER FANS

Integrally mounted solid state module converts a DC input to drive a reliable AC motor. Mounted inverter, 3¾" long x 1" wide, means no extra connections or additional fasteners. Used as an intake or exhaust fan. Oper. temp. —20°F to +180°F for ball bearing types, —10°F to +150°F for (*) sleeve bearing types. Uses 4—#6 screws for mounting and is $4\frac{11}{16}$" square and 1½" wide.

IMC Boxer Fan

IMC Boxer — U.L. APPROVED CONSTRUCTION

Aerodynamically designed impeller delivers 115 cfm free air from any operating position, 15% more than comparable fans. 3⅝" square and 1½" deep with rugged all-metal frame for greater heat dissipation and longer fan life. Heavy duty terminals, easily accessible. Shpg. wt. 2 lbs.

STANDARD BOXER U.L. APPROVED

IMC MINI BOXER FAN

Model MWS2107F. IMC bearing design assures constant lubricant flow, extra long life, and cool, quiet operation. Provides a low profile cooling. Mini Boxer Fan can be mounted inside of the unit around utilizing the flanges at either end. No filter or screen kits available. 115 VAC, 1 phase, 60 hz. Only 3⅝" square and 1½" in depth with a unit weight of 1.6 lbs.

FE Series Fans

IMCair PROPELLER FANS—MODELS F AND FE

For applications where high air flow and low noise operation is required. Precision-built shaded pole motor. Flush mounting with shaft in any operating position. All single phase. Size: Model FE8, FI8, 10" dia. x 2½" deep—$5\frac{13}{16}$" with motor clearance. Models FE6, F16 8⅛" dia. x 2" deep—4½" with motor clearance. For operation from 115 volt, 50-60 cycles. Shpg. wt. Models FE6 and F16: 3 lbs. Models FE8 and F18: 5½ lbs.

B Series Blower

IMCair CENTRIFUGAL BLOWERS — Models B2 and B3

Designed for applications where low air flows are required at relatively high pressures. Compactly designed, metal housings will not distort under heat. Continuous duty operation, single phase shaded pole motor with bearing life of 10,000 hours at 125° F. Size: B2, ⅞" h. x 4¾" w. x 3½" d. B3, 5⅝" h. x 5⅞" w. x 5" d. For operation from 115 volts, 50-60 cycles. Shpg. wt.: B2, 2½ lbs.; B3, 3½ lbs.

NEWARK CAN SUPPLY
ALL YOUR TUBE NEEDS

National Electronics Special Purpose Tubes

READOUT TUBES

Cold cathode neon glow discharge tubes for in-line display of numbers, letters or symbols Red-orange neon glow has best readability even under high ambient light. Simplicity, ruggedness and long life for effective display at low cost. Readout tubes are the only active display that will not fade with age. Manufactured under license from Burroughs Corp. Std. Life 90 day warranty. Long life 2 years warranty.

RCA Industrial & Special Purpose Tubes

INDUSTRIAL RECEIVING-TYPE PREMIUM TUBES

PREMIUM TUBES. For critical industrial and other equipment requiring exceptional stability of tube characteristics, long tube life, and reliable performance. RCA Premium Tubes, superior to their corresponding commercial prototypes, are subjected to special test and controls on critical characteristics, environmental test (such as shock, fatigue, vibration, altitude) and also to special life test.

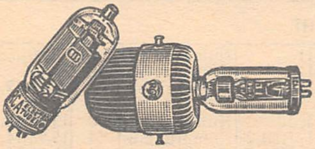
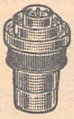
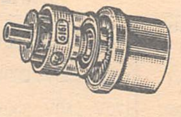
RCA VACUUM POWER TUBES FOR CW APPLICATIONS—TYPICAL CLASS C TELEGRAPHY SERVICE (CCS)



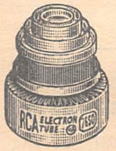
891R



6146A



6161



7650

RCA manufactures one of the world's largest lines of power tubes. The complete line ranges from small, low-power, glass-envelope types to huge, super-power, ceramic-metal types.

CAMERA TUBES — VIDICONS

FEATURES

- Resolution—Up to 1100 TV lines limiting resolution or 60% response to 400 TV lines.
- Spectral Response—Panchromatic with high sensitivity in all chrome channels
- Highest sensitivity and lowest lag of any commercial vidicons
- Clean pictures—Due to stringent spot critieria

RCA Type	Application Notes
4478	low-cost vidicons for non-critical closed circuit applications
7038, 7735B	broadcast-quality pick-up for studio and closed-circuit applications
8507A	separate mesh variant of the 7735B featuring high resolution and high signal uniformity . . . primarily for military and industrial applications
8572	separate mesh variant of 7038 featuring high resolution and signal uniformity; for broadcast film cameras
4493	live color pick-up in TK-42
4494, 4495	transistorized camera
8480/V1, 8134/V1	for color film pick-up in transistorized TK-27 . . . no other tube type will do

VIDICONS

For TV film studio pickup service and closed-circuit TV applications. Available in deflection and focus methods, ruggedized or non--ruggedized tubes, conventional or low power "dark heaterrs", photo--conductive surfaces, and tube size.

LONG-LIFE BIALKALI PHOTOCATHODE—IMAGE ORTHICONS

- **High sensitivity over the visible spectrum**
- **Electronically conducting glass target**

Type 8673. High capacitance target assembly and designed specifically for color or black & white telecasting at the light levels available in color TV studios.

Type 8673 (Black & White).. **1800.00**
Type 8673/S (Color)...1800.00

- **Improved "anti-ghost" image section**
- **Field mesh connection**

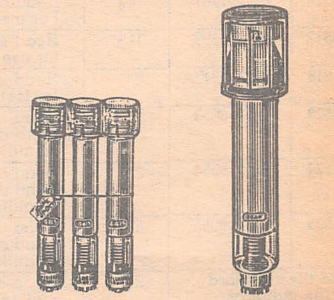
Type 8674. Has higher sensitivity than 8673 and is intended for color and black & white studio or remote TV pickup at light levels available in black and white TV studios.

Type 8674 (Black & White).. **1800.00**
Type 8674/S (Color) 1800.00

RCA CAMERA TUBES

A broad choice of tube design features are available: field or non-field mesh design; glass, thin--film semiconductive, or special long-life targets; precision construction; anti-ghost image section design; microdamp construction; tube size; and matched sets for color pickup.

ORTHICONS



For Color Pickup at Black-and-White Studio Lighting Levels

Unmatched Picture Quality in Black and-White Pickup

IMAGE ORTHICONS FOR LIVE BLACK-AND-WHITE TELEVISION

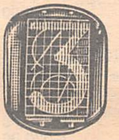
DATAVUE NUMERICAL INDICATOR TUBES



Reliable, in-line visual digital readout tubes, which display singly numerals and preselected symbols such as + and — signs. Datavue tubes are gas-filled, cold-cathode tubes. 10 individual metallic cathods formed in the shape of the numerals 0 to 9 and one common anode. Cathode and anode are connected to base pin terminals. DC voltage applied between anode and one cathode causes cathode to glow. Only selected number is visible. Life expectancy is 200,000 hours or more. End or side mount.

VIDICONS

Tube Type	Description	1-4
GL-7038	For film pickup applications . . . monochrome or color . . . a direct replacement for the 6198A	170.00
GL-7038v	For use in Chroma channel of the GE Model PE24 camera.	170.00
GL-7325	High sensitivity for live pickup . . . lower lag at low light . . . ideal for industrial use	170.00
GL-7735A	Highest sensitivity, lowest lag at low light levels . . . for studio or remote pickup	150.00
GL-7735B	Hightest sensitivity, lowest lag at low light levels, for studio or remote pickup, has higher resolution.	170.00
GL-7697	For cameras with automatic sensitivity control . . similar to 7735A	170.00
GL-7226	Low heater power . . . for transistorized cameras . . . good live pickup	315.00
GL-7262A	Low heater rating of 0.6 watt . . . excellent sensitivity and low lag at low light	215.00
GL-7263A	Specially designed to withstand severe shock, vibration and high humidity	370.00
GL-8484	High Sensitivity, high Resolution of 7325	170.00
GLZ-7911	Low Cost Domestic, For General Servacance	75.00
GLZ-7929	Replacement tube for chroma channels RCA TK 42 cameras	
	Color matched set: red, blue, green	3165.00
GL-8134	Replacement tube for RCA closed circuit TV cameras	210.00
GL-8134V	For use in chroma channels RCA TK 27 cameras	370.00
GL-8507	Separaie Field Mesh 7735A	190.00
GL-8541	For transistorized cameras . . . similar to GL-8507 except 0.6 watt rating . .high sensitivity, low lag	310.00
GL-8572	Broadcast film pickup Sep. field mesh of 7038.	215.00
GL-8572v	Luminance Channel GE Camera Model PE240	215.00
GL-8604	Similar to 8572, except low heater power.	310.00
GL-8573	Live industrial—high sensitivity, short length, low heater power. Sep. field mesh.	275.00

VIDICONS FOR COLOR BROADCASTING

Tube Type	Description	1-4
7038V	Selected for Chroma PE24 & PE240	170.00
8134V	Film chain special for chroma TK27	370.00
8572V	Luminance channel of PE240 or 3 channel TK26	215.00
Z7929	Replaces 4493, 4494, & 4495 in TK42 (R.G.B. selected)	1055.00

LEAD OXIDE 1" VIDICONS

Tube Type	Description	1-4
Z7946	Version of 8134—can be color matched	1820.00
Z7870	Version of 8507A with little or no modifications.	1775.00
Z7869	Version of 7735B-High sensitivity-low lag	1725.00

Newark Can Supply All

6C21	Pulse-modulator triode. Radiation and forced air cooled. 8.2V 18A Fils. 30kV max. pl. v. 15A max. pulse pl. curr., 300W pl. diss.	121.00	....	....	....
100TH	High-mu pwr. triode. Full ratings to 40 MHz 5V, 6.3A Fil. 100W plate diss.	26.00	....	....	....
304TH	Med.-mu pwr. triode. Up to 1200W class C with 53W drive. No forced air below 40 MHz 5 or 10V, 25 or 12.5A. Fil. 3000V max. on pl. 300W pl. diss.	83.00	78.85	....	....
304TL	Low-mu version of 304TH.	83.00	78.85	....	....
450TH	High-mu pwr. triode, up to 1800W class C with 46W drive, cooled by pl. radiation and convection. Ratings to 40 MHz 7.5V 12A Fil. 6000V max. on pl. 450W pl. diss.	103.00	97.85	....	....
450TL	Low-mu version of 450TH.	103.00	97.85	....	....
592/3-200A3	Med.-mu pwr. triode. Ratings to 150 MHz. Cooled by radiation and forced air. 10V 5A Fil. 3500V max. on plate 200W plate dissipation.	63.00	59.85	....	....
750TL	Med.-mu pwr. triode. 7.5V 23A Fil. 10kV max. on plate. 750W plate dissipation.	248.00	....	....	....
25T	Med.-mu triode. Full Ratings 60 MHz 6.3V 3A Fil. 2000V max. pl. v. 25W plate diss.	43.00	40.85	38.70	....
35T	High-mu triode. Full Ratings to 100MHz 5V 4A Fils. 2000 max. pl. v. 35W plate diss.	47.00	44.65	42.30	....
1000T	High-mu pwr. triode. 3000W class C 60W drive. Forced air cooled. 7.5V 16.5A Fil.	172.00	....	....	....
5867A	Pwr. triode, 350 W PL .Diss. 5V. 15A. fil.	32.00	30.40	28.80	....
6696A	Hi Pwr. triode,, 60 KW PL. Diss. 13V. 220A fil.	1105.00	1049.75	....	....
7211	Same mech. as 2C39 but 1/3 larger elect. 6.3V 1.3A Fil. 100W pl. diss.	75.00	71.25	67.50	63.75
7289/3CX100A5	Same as 3CX100A5.	25.50	....	....	....
7698	Same as 7211 except has no air cooler on anode.	75.00	71.25	....	....
7815/3CPN10A5	Same as 3CPN10A5.	25.50	....	....	....

TETRODES & PENTODES

Type	Description	1-4	5-18	19-49	50-99
4-65A/8165	Pwr. tetrode. Full Ratings to 150MHz 6V 3.8 Fil. 3kV max. on pl. 65W pl. diss.	29.50	28.03	26.55	....
4-125A/4D21	Rad. beam pwr. tetrode. Ratings to 120 MHz 375W class C with 2.5W drive. 5V 7A Fil. 3000V max. on pl. 125W plate dissipation.	40.00	38.00	36.00	....
4-250A/5D22	Compact pwr. tetrode. Forced air cooled. Full Ratings to 110 MHz 1kW Class C with 2.5W drive. 5V 14.5A Fil. 4000V max. on pl. 250W pl. diss.	48.00	45.60	43.20	....
4-400A/8438	Compact pwr. tetrode. Forced air cooled. Full Ratings to 110 MHz 1100W Class C with 6 W drive. 5V 14.5A Fil. 4000 V max. on pl. 400 W pl. diss.	48.00	45.60	43.20	....
4-1000A/8166	Rad. beam pwr. titiode. Forced air cooled. Ratings to 110 MHz 3400W Class C with 15W drive. 7.5V 21A Fil. 6000V max. on pl. 1000W pl. diss.	135.00	....	....	....
4CX250B/7203	Compact pwr. tetrode. Air cooled. 6V 3A Fil. 2000V max. on plate. 250W pl. diss.	35.60	33.82	32.04	....
4CX250K/8245	Compact pwr. Tetrode. Coaxial construc. for cavity oper. Forced air cooled. Ratings to 500 MHz. Useful to 1500 MHz 6V 3A Fil. 2kV max. on pl. 250W pl. diss.	70.00	66.50	....	....
4CX250R/7580W	Rugged compact pwr. tetrode. Forced air cooled. Ratings to 500 Mc. 6V 3A Fil. 2000V max. on plate. 250W plate dissipation.	44.50	42.28	40.05	....
4CX300A/8167	Pwr. tetrode. Air cooled. 6V 3A Fil. 2500V max. on pl., 300W pl. diss.	54.00	51.30	....	....
4CX350A/8321	Like 4CX250B but higher gain and power. Ratings to 500 MHz. Forced air cooled. 6V 3.6A Fil. 2000V max. on plate. 350W pl. diss.	48.50	46.08	43.65	....
4CX350F/8322	Same as 4CX350A/8321 except has 26.5V 800 MA Fil.	51.50	48.93	....	....
4CX1000A/8168	Pwr. tetrode. Forced air cooled. Excellent high gain and low distortion Ratings to 110 MHz 6V 10A Fil. 3000V max. on plate. 1000W pl. diss.	200.00	....	....	....
4CX1000K/8352	Ident. to 4CX1000A, but gives better UHF performance to over 400 Mc.	210.00	....	....	....
4CX1500B/8660	Best for low I.M. distortion linear 6V F.I. 3KV. plate.	205.00	....	....	....
4CX3000A/8169	Pwr. tetrode. Ratings to 150 MHz 10V 48.5A Fil. 3KW pl. diss.	420.00	....	....	....
4CX5000A/8170	High pwr. tetrode. Forced air cooled. 16KW class C with 150W drive. Ratings to 110 MHz 7.5V 78A Fil. 7500V max. on pl. 5000W pl. diss.	495.00	....	....	....
4CX10000D/8171	Electrically ident. to 4CX5000A/8170, but larger anode radiator to reduce cooling air requir. or permit up to 10KW pl. diss.	575.00	546.25	....	....
4E27A/5-125B	Pwr. pentode with neutralization requir. simplified or eliminated. Ratings to 75 MHz 375W class C with 2W drive. 5V 7.5A Fil. 4kV max. on pl. 125W pl. diss.	50.00	47.50	40.50	....
4PR60B/8252	Pulse mod. tetrode. Replaces 715C and 5D21. Supersedes 4PR60A. 300KW pulse pwr with less than 1KW drive. 26V 2A Fil. 20kV max. on pl. 60W pl. diss.	115.00	109.25	....	....
4PR65A/8187	Tetrode for pulse mod., amp., or osc. 6V 3.8A Fil. 15kV max. on pl. 65W pl. diss.	43.00	40.85	38.70	....
4X150A/7034	Compact pwr. tetrode. Air cooled. 6V 3A Fil. 2kV max. on pl. 250W pl. diss.	23.15	21.99	20.84	....
4X500A	Pwr. Tetrode for VHF. 500 W. PL. Diss. 5V. 14A. fil.	127.50	....	....	....
7203/4CX250B	Identical to 4CX250B/7203.	35.60	33.82	32.04	....

UHF-TV POWER AMPLIFIER KLYSTRON

4KM100LA	4 cavity, 25 KW output, for channels 14 to 36.	9030.00	....	....	....
4KM150LA	4 cavity, 50 KW output, for channels 14 to 36.	11550.00	....	....	....

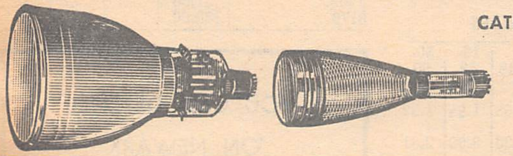
CATHODE RAY TUBES



Line width measured at the center face by the shrinking raster method at the current or brightness specified. Reference MIL-E-1, Par. 4.12.6.1. The brightness shown for 3" and 5" round tubes is for 2"x2" raster size. Useful scan is limited on this axis to a value less than full screen dimension. All voltages are measured with respect to cathode.

Simpson Panel Meters

• *NEW* CENTURY SERIES

Annular panel instrument construction in clean-cut modern design. Century Series panel instruments have rugged phenolic cases and glass windows. Movements have "stay accurate" dependability. DC movements have spring-backed pivot and jewel. AC movements have self-shielding Annular, *recitfier, or **magnetically damped iron vane. Damping is achieved by moving a metal vane through a magnetic field. This motion induces currents in the vane which sets up magnetic fields opposing those of the stationary magnets thus tending to bring the pointer to rest. Models 2122 & 2152 measure 2½". Models 2123, 2153, & 2143 measure 3½". Models 2124, 2154, & 2144 measure 4½". Model 2121 measures 1½".

● *NEW* DIGITAL PANEL METER

• **ACCURATE —0.1%, ±1 DIGIT**
Model 2800. Accuracy ±1% (F.S.), ±1 digit. Resolution 1 part in 1000. 5 readings per second, continuous. Non-blinking display. 3 readout digits. Made of integrated circuits and solid state components (except readout tubes). 100% number "1" automatically lights to the left of digits to indicate overrange. When measured value exceeds overrange capacity, the "1" flashes-preventing erroneous readouts. Reverse polarity indicated by light to the right of other digits. Greater than 90 dB at Hz with 1K-ohm unbalance. Temperature range +150c to +35°C.

ELECTRO-MECHANICAL COUNTERS MODELS 103-104

Four-Digit Counters, conservatively rated at 10 Counts per second. Are reset to 0000 with a single push-button control. The black matte finish bezel is made from tough thermosetting materials which withstand high impacts. These counters are built to operate under actual field conditions of vibration, humidity, and extreme temperatures. Minimum pulse duration is 50 millisec. "on" and 50 millisec. "off." Size (HWD), 1.84" x 2.14" x 2.28".

● *NEW* BOLD VUE PANEL METER

An answer to customer requests for a three hole mount with bold appearance. Easy to read numerals and is self-shielded. Accuracy ±2%. Terminals 10-32 studs. All models are supplied with necessary mounting and terminal hardware. Molded black phenolic case with high temperature plastic cover—black trim. Shpg. Wt. 1222—10½ Oz., 1223—12½ Oz., 1252—10 Oz., 1253—12½ Oz.

DC GALVANOMETERS

Top-quality Simpson panel meters meet exacting requirements. Models 1227 and 1327 Wide-Vue type with 2.5" and 3.04" scale length respectively and self-shielding type movement. Model 27 has Iron-Vane type external movement. When ordering for use on steel panel, specify panel thickness and add $1.65 for recalibration. Model 27 scale length 1.8". All are accurate within 2% F.S., have rect. faces. Range 50-0-50. Average shipping wt., 1 lb.

Wide Vue Panel Meters

Simpson

These panel meters have 25% fewer parts thus reducing chance of failure; built to conform to Simpson's rigid quality and performance standards. Performance tested for equivalent of 30 years of actual use with a single failure. Higher sensitivity with lower resistance; high accuracy with better repeatability. Accuracy ±2%. Spade pointer with case constrcction of molded black phenolic base with high temp. black plastic cover. Supplied with mounting and terminal hardware. Shipping weight: 6 oz. (1227 T), 8 oz. (1327 T), 10 oz. (1329 T).

Simpson Panel Meters

1½" WIDE-VUE PANEL INSTRUMENTS

1212 and 1214 have the Simpson self-shielded movement (calibrations not affected by stray magnetic fields). 1212 accurate to 2% of full scale. 1214 accurate of 3% of full scale at 25°C. Both models mount in 1.50" dia. holes. Size: 1.76"x1.76"x1.32". Scale length is 1.5" at 90° Arc (38.1 mm). Standard calibration either magnetic or non-magnetic panel with lance type pointer. Base constructed of molded black phenolic plastic with high temperature cover. All models are supplied complete with the necessary mounting and terminal harware. 8-32 studs are used for terminals. Average shipping weight, 3½ oz.

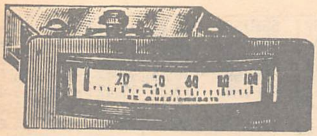
EDGEWISE PANEL METERS



Core magnet meter movement. Self shielded. Needs ½ the panel area of usual 2½" meter; yet comparable scale length (1⅞). Complete mtg. hardware. DC acc.: 2% of full scale. Standard scale — Black numbers on a white background. Dustproof, molded lucite case. Accurate comparative readings by mounting meters side by side. Saves space—makes every square inch count. Quick, simple mounting. Meters are supplied complete with mounting hardware. Terminals: Solder (ammeters, stud). Shpg. wt., 5 ozs.

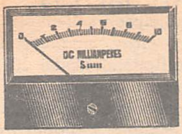
Panel Meters Simpson

"DESIGNER" SERIES



Model 523

Breaking away from traditional panel-meter styling, these instruments have space-saving rectangular faces. On crowded panels, where height is limited, a clean, crisp, uncluttered design is presented. Rugged, dependable pivot - and - jewel movements provide ± 2% full-scale accuracy. Knife-edge pointers permit extra-precise readings. All models come in molded black phenolic cases with glass windows, and are supplied with all necessary mounting and terminal hardware. Dimensional data: Model 523 (3½" nominal width) requires only 2.438" panel height, and occupies 1.811" behind-panel depth; scale length is 62 mm. Model 524 (4½" nom. width) is 2.84" high and 1.811" behind-panel; scale length 90 mm. Shipping wt.: 11½ oz. for Model 523, 12 oz. for Model 524.

RUGGED SEAL CONTACTLESS METER RELAYS

MILLIAMPERES DC
Simpson

Set points are adjusted thru external, front-panel gear drive. Set points are indicated by pointers. Sensing is accomplished by an infinite life lamp and photoconductors. A solid-state switching circuit and DPDT slave relay are internally provided for each control point. Control relays open in event of power failure.
Slave relays will switch 10 amps at 115 VAC, resistive load. Meter is unaffected by control point setting. Calibration accuracy is ±2% of full scale. Control point differential: within 0.5% of full scale. DC power for control circuitry is provided by an external power supply furnished with each double control relay; operates from 115 V, 50-500 Hz AC; single control models have self-contained power supply. Average shipping wt., 1 lb.

3½" ELAPSED TIME PANEL METERS

Widely used by research labs, manufacturing plants, broadcasting stations, etc., to keep life and performance records based on operating time. Meters use self-starting synchronous motors. They indicate up to 99999.9, then recycle and begin again at 00000.0. Model 55-3½" round. Model 57-3½" rectangular. Case depth for all models: 2⁹⁄₁₆".

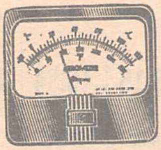
MODEL 29 AND MODEL 3324 4½" PYROMETERS



Model 29

Model 3324

Model 29 standard bakelite. Model 3324 for extreme conditions. Compensated for temperature changes and include copper circuitcuit compensation. Calibrated for use with iron constantan thermocouples. Pyrometers of —150 to +250°F (—100 to +120° C) are calibrated for 5 ohm thermocouple resistance. All other units are calibrated for 10 ohm thermocouple resistance. Furnished with an external adjustable series resistor. Shpg. wt.: ½ lb.

THERMOCOUPLES

All thermocouples are iron-constantan, calibrated to 5 or 10 ohms, ±1% per table.

TYPES 21221 and 21224. Iron constantan thermocouple wire in stainless steel overbraid for rugged service application.

TYPES 21222 and 21223. Glass cloth overbraid. Suited for most general purpose use or for permanent mounting in protected sheaths or conduit. Shipping weight: ¼ lb.

LABORATORY QUALITY AC INSTRUMENTS

Manufactured to high standards of accuracy to insure long life and excellent performance. All instruments listed below have moving iron vane type movements—no rectifiers are used. Reasonable accuracy with any waveform; with sinusoidal input the accuracy is guaranteed to ± 3% of full scale. External resistors furnished with meters having a range of 500 volts or higher. All models mount in 2¾″ holes. Other dimensions same as DC counterparts. Mounting template and hardware furnished with all meters. Average shipping weight, 1 lb.

FREQUENCY METERS

Each vibrating reed responds to a different frequency. Input frequency is indicated by reed with greatest swing. All operate from 100-130V; with accuracy of ±.3% or better. All have 3½″ molded case. Shpg. wt. 12 oz.

55F685. Type 31-FX. 5 reeds, 58-62 hz. **NET**......................24.85
55F686. Type 34-FX. 9 reeds cover 56-64 hz. **NET**......................28.65
55F687. Type 33-FX. 9 reeds cover 380-420 hz. **NET**......................35.80

FREQUENCY METERS

34-FB

Series FB. Case design with the time-tested accuracy and reliability of the J-B-T vibrating reed frequency meter. Uses include control panels of Total Energy Systems. Scale is designed for maximum ease of reading to the full limit of accuracy of the instrument, ±0.3% or better of the frequency being measured. Permanently calibrated and do not require subsequent adjustment. Temp. compensations are not necessary, as frequency change per °F is only .0075%, negative. Operating volts of 100-130.

55F785. Type 30 FB, 10 reeds, cover 58-62 hz. **NET** 33.00
55F786. Type 31 FB, 5 reeds, cover 58-62 hz. **NET**..................28.85

Panel Meters

D.C.MICROAMPERES

G SERIES PANEL INSTRUMENTS

Five sizes; 1½", 2½", 3½", 4½", and 5½" models with black molded plastic cases and clear molded plastic fronts. An all new meter design that features flexibility and interchangeability, with optional mounting bezel for behind panel mounting.

DC instruments have the famous Triplett BAR-RING Movements. Provide a dominant scale with plenty of dial area for multiple scales. DC scale lengths: 5½", 5.00", 4½", 4.035", 3½", 3.163", 2½", 2.536", 1½", 1.48". AC scale lengths: 5½", 4.25", 4½", 3.43", 3½", 2.688", 2½", 2.155", 1½", 1.15".

Now you can make all types of electrical measurements right in your own lab or shop set-up. Five-way binding posts. Rugged case and movement construction safeguards against rough handling. Overload protection of all models, guards against electrical damage from misuse. Case dim. 4¼″x3⅞x 4¼″.

Panel Meters

TRIPLETT EDGEWISE 3½-4½ PANEL METERS

0 10 20 30 40 50
D.C. MICROAMPERES

Minimizes panel space, has the performance of a conventional meter. BAR-RING movement allows meter stacking to give maximum instrumentation in a minimum space. Microamp meter ranges are of taut band construction. Anti-parallax pointer designed to minimize reading error. Scale Length: DC, RF and all AC types, 3.87" (Model 420-E), 2.75" Model 320-E).

DC MILLIVOLTS

For use where repeatability, resolution, and freedom from reading errors are mandatory. Have ⅞ inch high seven bar segmented display for better readability. Both 3 and 3½ digit DPM's require only 1½" behind the panel with remotely mounted power supply and can be front or rear panel mounted. Standard features are autopolarity, T²L/DTL compatible BCD output, ±0.1% of reading ± 1 digit accuracy, 1000 megohm input impedance, 100db common mode rejection, and 30 db normal mode rejection. Input connections are made by either screw terminals or standard printed circuit card connector. BCD uses printed circuit connector. Includes front panel mounting hardware. Size: 4½"Wx3"Hx3⅝"D behind the panel.

CONTROL DESCRIPTIONS

ON-OFF CONTROLS

Models 503-KH (Single set point) and 503-KD (Double set point). Compacks packaged complete with power supply, control circuitry and load relays coupled to an Optical Meter Relay. Screw type terminal connections are at rear of meter barrel. (ill.) All circuit components wired fail safe below set point on KH and between set points on KD. Units easily converted from automatic on-off control to push button reset latching circuit. SPDT relay contacts-load rating: 5 A. resistive at 115 VAC. Dial arc: 4". *Taut Band movement.

‡ AC Load Compack Meter range is 47 Ma AC, matching secondary of current transformers (below). Dial reads 0-150% Load. Operates with any transformer listed. Use to monitor or control by measuring motor lead. Be sure to order appropriate transformer for each unit. Above 50 Amps. two transformers are required; the full load range plus a 5 amp. unit (55F4622) to step down between the large transformer and the meter. Wt. 2 lbs.

ON-OFF TEMPERATURE CONTROL

Models 603-KH (single set point) and 603-KD (double set point). Same circuit description as 503-KH & KD with addition of electrical cold junction compensation, automatic thermocouple break protection & copper error correction. Medium resistance thermocouple actuated pyrometers. Taut Band. Damped against vibration. Dual Fahrenheit-Centigrade mirrored scales. Dial arc 5". Adjustable for thermocouples 0-10 ohms. For control or alarm applications. Wt. 2 lbs.

TIME PROPORTIONING-TEMPERATURE CONTROL

Model 603-KTP. Compensation and Thermocouple break protection same as 603-KH & KD but control circuit provides proportional control from relay output. Ratio of relay on time to "off" time proportional to deviation from set point. PR Band approx. 3%. Time cycle settable to 5, 10, or 15 seconds. Capable of straight line control better than ±1 degree F. Taut Band, damped against vibration. Wt. 2 lbs.

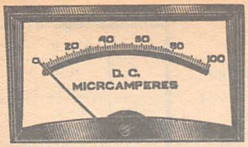
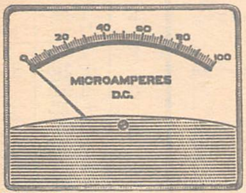
api Panel Meters



STYLIST. Crisp clean lines for easier readings. Panel hides bottom third of meter, increasing dial area.



PANELIST. Features rugged anti-static plastic case. Standard meter dimensions.

SUPER CALIBRATED TAUT BAND PANEL METERS

This listing offers the largest available selection of Taut Band meters in two different calibration types: 0.5% Tracking and 1% Accuracy. Choice of 4½ in. or 5½ in size. All have high sensitivity self shielding bar ring movements, Taut Band suspension, frictionless design allows near perfect repeatability. Easily converted from front panel mount to recessed Stylist mount with bezel kit.

TRACKING VS ACCURACY

Most electronic meter applications require better tracking (electrical linearity) instead of full scale accuracy. Tracking is a meter's ability to divide a full scale indication. Example: a 100 micro-amp. 1% tracking meter with a 100 division scale. Used in a VTVM may require 102 micro-amps to indicate full scale. Exactly ½ that full scale indication (51 micro-amps) should put the pointer at 50 divisions ±1 and 25.5 micro-amps at 25 divisions ±1. Tracking is more important in any application where zero or full scale indication is electrically set; tachometers, pH meters, thermistor bridge temp. meters, etc. Meters with good full scale accuracy are used for absolute measurements like volts, amps, thermocouple temp. readings, etc. 502-I & 602-I are 1% accuracy. 502-II and 602-II are 0.5% tracking, 2% accuracy. All have mirrored scales and knife edge pointers.

MOD METER

Detailed lettering instructions are enclosed. Meters supplied with 100 division blank scales and will operate with any of scales listed. A lettering kit below allows production of finished scales in 10 minutes. Rugged taut band construction. Black phenolic cases.

1% tracking movements in all DC ranges. 2% on AC. Scales slide quickly into a sealed capsule which accurately positions scale and seals the movement from contamination. Makes possible a drastic reduction in meter inventory. Use multiplier resistors, current shunts, or transformers to produce an infinite number of voltmeters and ammeters from just 3 or 4 Mod-Meters. Accepts either plain or mirrored scales, choice below. 47 maAC meter requires use of AC trans. on facing page.

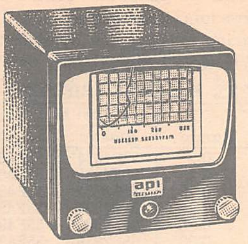
Panel Meters — Recorders api

MINIATURE GRAPHIC RECORDER



Model 110. Features frictionless taut band movement. Inkless meter recorder with built-in access window, disengageable clutch for integral chart reading. Standard chart speed is 1 in. per hour; 63 foot chart provides 31 day records. Use with shunts multiplier resistors, current transformers for voltage, current reading. 2% DC accuracy; 3% on AC. Adjustable for up to 10 ohms, lead resistance 2% of accuracy. Operates on 115 VAC, 3 watts panel cut is 4.375 x 4.06". Size 4¼" wide x 4" high x 7½" deep.

MODEL 80 VOM

For portable or bench service, 1% VOM. Ranges: DC volts, 5KV/1KV/250/100/50 25/10/2.5/1/.25 (at 20K ohms/volt): AC volts, 5KV/1KV/500/250/50/10/2.5 (at 5000 ohms/volt) DC current, 10/1 amps 100/10/1ma/50ua; ohms. 5 ranges from 2K to 20 meg-ohms; DB scales, —10 to +10DB .1% accuracy on ohms and DC scales; AC scales, 1.5%; 1 & 5KV scales, 2% DC and 2.5% AC.

62F1085. Type 80-9008001. **NET 105.00**

MODEL 81 DC VOLTMETER

Ranges: 1000/250/100/50/25/10/5/2.5/1/.25 at 20,000 ohms/volt. Accuracy is ± 1% (except ± 2% on 1000 volt range).

62F1086. Type 81-9008102. **NET**............ **87.00**

MODEL 980 MARK 11 ANALYZER

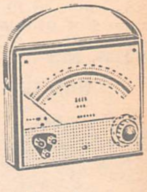
Features: Spring back jewels for maximum shock resistance. Fused resistance ranges, fully insulated crackproof case, precision components. Ranges: D-C Volts: 1.6, 8, 40, 160, 400, 800, 4000-at 20,000 ohms/volt. A-C Volts: 1.6, 8, 40, 160, 400, 1600-at 1,000 ohms/volt. DB Range: —15 db to +54 db (in 6 ranges). D-C Micoamps: 80, D-C Milliamps: 1.6, 8, 80, 800. D-C Amps: 8. Ohms: 5 range, 1k to 10 Meg full scale, 25 ohms to 250 k center scale. Accurate within 2% d-c; 3% a-c. Size: 7 9/16" x 6¼" x 3" - 192 x 159 x 77 mm. Scale Length: 4.63". Weight: 2 lbs., 8 oz.

62F476. NET............ **61.00**

Combination cover and stand. Stores all test leads.

62F1142. NET............6.50

MODELS 911, 912



A-C or D-C. Features: Combination portable/panel instrument. Large 7.2" mirror-back scale with knife edge pointer. Easily read scale with maximum natural illumination. Self-shielding mechanism with spring back jewels. Large, sure-grip knob on range switch. Rugged, compact case. Accuracy: ±1% of full scale value on d-c voltmeters, milliammeters (±2% of full scale value on 300, 1000 v. d-c); ±2% of full scale value on recitifer type a-c voltmeters 10-through 300 volts. ±3% of full scale value on rectifier type a-c voltmeters for 1000 volt range and 3 volt range above mid-scale.

Model 911. DC-VM. Range: 1000/300/100/30/10/3/1 volts @ 20,000 ohms/V.
62F1229. NET............ **89.00**

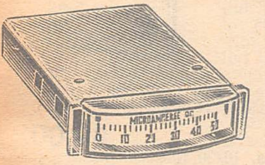
THIN LINE PANEL METER



Magnet is inside moving coil. Resulting inherent shielding allows mounting on magnetic or non-magnetic panels without need for adjustment, as well as the ability to stack meters side-by-side without any interaction.

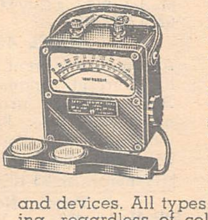
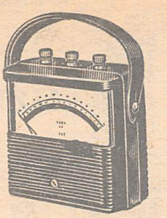
SUNLIGHT ILLUMINATION METER



Model 756-9901003. A portable instrument for light measurements requiring a high degree of accuracy over broad range of light values. Ideal for research and routine work as a master instrument for checking other light measuring instruments and devices. All types of commercial lighting, regardless of color composition, can be read directly—no correction factors are necessary. The VISCOP filter corrects for color, the Cosine filter for angle of incidence. Incorporates ranges of 0-120/1200/120000 foot-candles. Requires only 1 PHOTONIC cell equipped with a quartz filter so that ultra-violet portion of spectrum is included in the light measured. Includes carrying case.

62F1401. NET **566.50**

PORTABLE METERS



Model 901. Features a curved, shadow reducing, wide angle window that is non-breakable and specially treated against electrostatic effects. Self-shielded permanent magnet moving coil type. Accurate within 0.25 of 1%. Has 5½" hand calibrated mirror scale and knife edge pointer. Size: 7½x3¼x3⅝". Wt. 5 lbs.

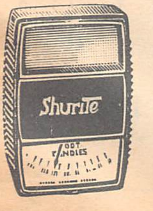
SHURITE



LIGHTING LEVEL INDICATOR

Model 7902-FC. Handy pocket-size meter, 3¼"x2⅛"x1⅛", for checking lighting level of various work areas. Simply place meter on working surface, and it quickly shows if the light level is adequate for efficient operation, or if eye strain or fatigue may result because the level is too high or too low. Also used by custodial maintenance staffs, lamp and fixture manufacturers, and others concerned with providing suitable lighting. With certain modifications the indicator has applications in some phases of photography. The light meter was developed in colaboration with utility members of Edison Electric Institute for their light promotion courses.

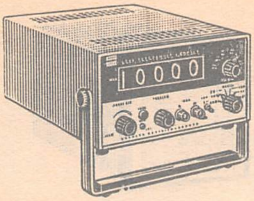
Your Dependable Source For All Your Electronic Needs

● *NEW* DIGITAL ELECTRONIC COUNTERS

- **ADJUSTABLE DISPLAY TIME**
- **SELF-TEST CIRCUITRY**
- **SIX TIME BASIS**
- **DIRECT FREQUENCY READOUTS TO 20 MHz**

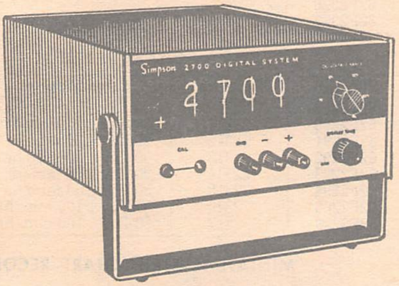


Model 2724-2725. Versatile, multi-function instruments, designed to provide accurate and fast digital readouts. Panel switch allows the operator to run a fast, complete and automatic check of counter's logic circuits. Have digit overrange indication. Ideal for use on production lines, in laboratories, or on test benches. Provide accurate measurements. Direct readout of frequencies from 5 Hz to 20 Hz in 6 switch-selected ranges. Two inputs are provided for making comparisons of frequencies. The ratio between the two frequencies appears as a direct digital readout from 1 to 19,999 (or 1 to 199,999 with 5 digit model). Readouts from 300 microseconds to 0.2 sec, internal clock is crystal controlled for precise accuracy. Separate inputs are provided for each two pulses, time differential between pulses appears as a direct digital readout.

62F2314. Model 2724. Four Digit Readout. **NET** **450.00**

62F2315. Model 2725 Five Digit Readout. **NET** **525.00**

DIGITAL MEASURING SYSTEM



Model 2700. An outstanding combination of features. Basic unit has 4 DC voltage ranges capable of precise measurements from 0.0001 to 1000.0 volts. Plug-in units for DC current, AC voltage, resistance, and capacitance measurements will be available as soon as they are announced by the manufacturer. Convenience features include push-button front panel calibration check and automatic polarity selection (with indication). The 2700 is small and light weight, and its components and well-engineered design assure reliability. The circuit utilizes Integrated Circuits, and field-effect-transistor input. The four read-out lights are of long-life (200,000 hours) design. Accuracy is within ±0.05%, ±1 digit. Adjustable display time permits reading rates up to 5 per second. Ranges of basic unit: (DC voltage), 0-1.00-10.00-100.00-1000.0 volts full scale. Size: 4x8¼x11 inches. Shipping Weight: 9 lbs.

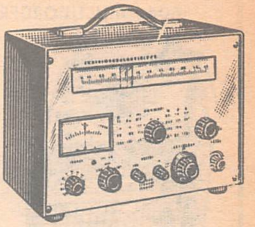
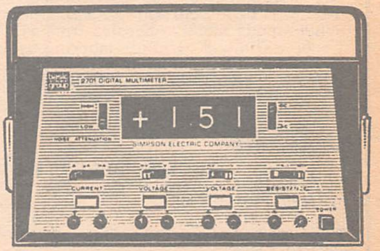
- **ACCURATE**



Model 2785. Precision multi-purpose bridge for measuring capacitance, inductance, resistance and "Q". Powered by two long-life 9-volt batteries, built-in generator provides all the voltages needed for its wide range of measurements. Generator operates at the standard test frequency of 1kHz. External voltage input jack provided for testing components at other frequencies. DC used for all resistance measurements, with voltage directly from the batteries, or rectified from the generator for those ranges requiring higher voltages. Even with its wide-range versatility, 2785's long slide-rule dial and sensitive galvanometer make it smiple and fast to use.

62F2318. Model 2785 .... **350.00**

DIGITAL VOM



Model 2701. Volt-ohm-milliameter displays AC and DC voltage in six ranges, AC and DC current in 9 ranges, and resistance in 7 ranges . . . all at the touch of a button. Even unskilled personnel can make fast, accurate measurements with this VOM. Simply set the magnitude switch. Then press the button—reading appears as a three digit number, complete with polarity sign and decimal point. No errors; no time-consuming scale interpolation. Like all Simpson VOM's, the 2701 is built for rugged dependability and maximum convenience. Solid state circuitry assures minimum maintenance problems. Decimal point automatically switches over three decade ranges. The Adjust-A-Vue handle folds down to use as a stand. The 2701 is replacing conventional VOM's in many laboratories, test bench, and production line applications. Ranges and specifications are as follows: AC and DC volts, 0.01 mV to 600V in 6 ranges. AC/DC current, 100 nanoamperes to 999 milliamps in 7 ranges. Resistance, 10 ohms to 999 megohms in 8 ranges. Accuracy: ±0.2% of full scale. Has built-in noise attenuation (high and low ranges). Size: 5½"x10"x10". Shipping weight: 16 pounds.

62F2268. NET **835.00**

● *NEW* PLUG-IN FUNCTION MODULES

Accuracy of plug-in modules: ±0.05% of reading (except 10 Meg. Ohms. range of resistance module: ± 1.0% of reading). Accuracy of 2700 system after interchanging plug-in module: ± 0.1% of reading (without recalibration). ± 0.05% of reading (with recalibration).

Model 22901. Range resistance 100—10,000 Ohms.
62F2316. NET **100.00**

Model 22903. Range DC 1 Microamp to 1 Amp.
62F2317. NET **100.00**

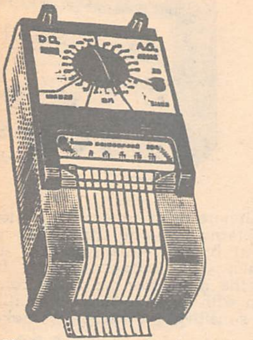
PRECISION MILLI OHMMETER

Model 1699. This instrument was designed to accurately measure low values of resistance. It determines the value of an unknown resistance by comparing it with a known standard internal resistance. The usual low-resistance measurement errors are avoided by using test leads terminating in Kelvin Clips coupled with a unique circuit which has separate current and volatge paths. This results in ±1% of full scale accuracy—even on the 0-0.05 ohm range. Ranges: 0-0.05-0.1-0.25-0.5-1.0-5.0-10.0-50.0 ohms. Size: 11⅜"x7⅜"x3¼". Shipping weight: 6 Pounds.

62F1189. NET **175.00**

Simpson Chart Recorders

604 "MULTICORDER" RECORDING MULTIMETER



- 22 Ranges—AC and DC
- Three Chart Speeds
- Inkless Recording

Accurately measures and permanently records a wide range of voltage and current values. The ideal instrument for university and industrial research labs, and other situations where permanent records of varied measurements are needed. Inkless recording using fast sequential impressions on pressure-sensitive paper—no pen-and-ink maintenance problems. Three chart speeds: 1"/3"/12" per hr.; impressions made every 2 sec. High torque, shock-proof taut-band meter movement. Ranges: DC volts: 0-.1, 5, 2.5, 10, 25, 100, 250, 500, at 20,000 ohms/v. AC volts; 0-10, 25, 100, 250, 500 at 5000 ohms/v. DC microamperes: 0-50, 250; DC ma: 0-1, 5, 25; DC amps: 0-1, .25, 1.0. AC current: 0-2 ma. Chart drive: self-starting synchronous motor, operates from 115 VAC 60 cps. Chart paper width, 2.3". Unique marking system indicates range in use, avoids confusion. Accuracy of recording: ±2.5% F.S. AC response flat from 15-10,000 cps. Temp. deviation: 1% of reading per 10°C., max. Size: 9¾x4¾x4. Complete with No. 7500 test leads and two rolls of chart paper. Wt. 5½ lbs.

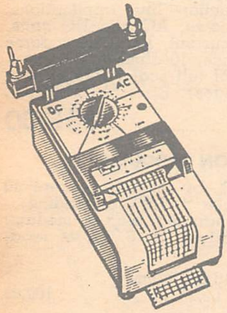
MULTICORDER 605



The 605 multicorder has dependable inkless recording. Low-cost chart paper has specially formulated hard wax surface, which will not blur or fog with age. Trace is made with fast sequential impressions. High torque taut-band movements are shockproof, for accurate recording and visual readout. These multi-range recorders, with three built-in chart speeds, eliminate the need for separate instruments. One switch selects the range desired with both the range and the measured value permanently recorded. The 605 has 24 ranges. Ranges: DC millivolts: 0-12-30-60. DC volts: 0-3-15-60-300-600. AC volts: 0-6-30-150-300-600. DC uA: 0-600. DC mA: 0-1.5-3-6-30-150. DC amperes: 0-1.2-6. AC mA: 4-3-15-60-300. AC amps: 0-1.2-6. Accuracy: 2.5% of full scale. Identical in all other respects to the Model 604 at left.

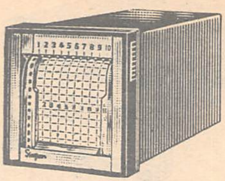
MINIATURE 10 CHANNEL EVENT RECORDER



Model 2755. Simultaneously records the on/off status (rather than magnitude) of 10 separate sources. Inkless, pressure sensitive chart paper continuously passes the 10 recording pens. Any function which is convertible to an electrical value can be recorded. Input signals for each of the 10 pens are connected to the corresponding numbered terminals on the rear of the instrument. The paper moves at a precisely known rate of speed. All 10 channels record simultaneously and continuously. This make it possible to determine the exact time an event took place. The normally furnished chart speed is 2 mm/hr. which can be increased 6 times at the flick of a switch. Other gear assemblies are available left and below for chart speeds up to 600 mm/hr. After data has been recorded on the chart, it is visible in the window of 76.2 mm of travel. It is then wound on the built-in take-up reel. 60 Hz. Size: 3.78" x 9" x 3.78". Shipping weight: 5 pounds.

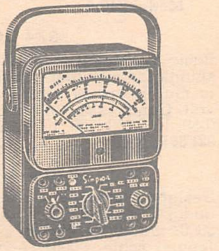
ROLL-TOP SIMPSON 260 RT

Lightweight, carry-anywhere unit, same as Model 260 above, but has bakelite roll-top cover and convenient test-lead compartment. Shipping weight, 9 lbs. Note: "Add-A-Tester" adapters (listed below) cannot be used with the roll top model.
62F303. NET **73.00**

See Simpson accessory listing for cases and test leads for above units

OVERLOAD PROTECTED 260-5P—TAUT BAND



A virtually "goof-proof" overload protected version of the world famous 260 VOM. The 260-5P incorporates electronic circuit protection which senses overload conditions and trips a protective relay. The entire tester is protected — even when 110 volts is applied to the 1 milliamp or 50 milliamps range, no damage is caused. No chance of "fooling" this protection, either as with some other "burnout proof" V.O.M.'s. It can't be reset — even momentarily — until the overload has been removed. A "must" for labs, schools, shops or wherever mortality rate of V.O.M.'s is apt to be high. Complete with test leads and operator's manual. Size: 5¼ x 7 x 3⅛. Wt. 9½ lbs.
62F1191. NET **97.00**
Model 260-5PRT. Roll top case and taut-band meter movement.

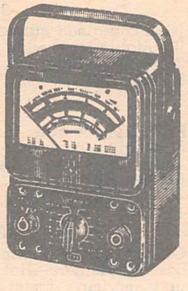
270-3 INCREASED ACCURACY VOM

- **Taut-band Movement**
- **Knife-edge Pointer**
- **Temperature Compensated**
- **Mirror Scale**



30-range multi-scale instrument. Includes all of the excellent features of the world-famous 260, plus a mirrored scale; knife-edge pointer; and printed circuit. It offers dependability and repeatability, ruggedness, and the higher accuracy necessary for many production and laboratory applications. The instrument has an easy-to-read 4½" meter at top of front panel. 3 operating controls and 8 circuit jacks are located directly below the meter. 7 DC voltage ranges (at 20,000 ohms per volt) are: 0-250 MV, 2.5V, 10V, 50V, 250V, 1000V, and 5000V. 6 AC ranges (at 5,000 ohms per volt) include: 0-2.5V, 0-10V, 0-50V; 0-250V. 0-1000V, and 0-5000V. 4 AF output voltages with 0.1μf internal series capacitor are 0-2.5V, 0-10V, 0-50V, 0-250V. Three resistanceranges: 0-2000 ohms center), 0-200,000 ohms (1200 ohms center), and 0-20 megohms (120,000 ohms center. 4 volume levels include —20 to +10 db., —8 to +22 db., +6 to +36 db., and +20 to +50 db. Variable resistance to ohmmeter circuit is used to compensate for aging of internal batteries. Heavy bakelite case is black with reinforced walls for maximum durability. Entire instrument slips inand out of case in one piece. Size: 5¼x7x3⅛". Shpg. wt., 4.2 lbs.

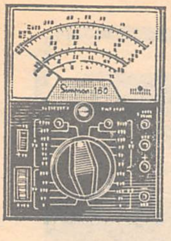
Simpson Test Equipment

SIMPSON 160 "HANDI-VOM"



This compact version of the world-famous 260 gives you the ranges, conveniences, and sensitivity of a full-sized VOM in a palm-sized package. Self-shielded taut-band movement assures high accuracy and freedom from influence of external magnetic fields. Recessed range switch never gets in the way. With diode overload protection, and polarity reversing switch — may be safely operated by inexperienced personnel or students. Low DC voltage ranges make this tester ideal for solid state R&D and troubleshooting. Ranges: DCV: 0-¼, 1, 2.5, 10, 50, 250, 500, 1000 at 20,000 ohms per volt; ACV: 0-2.5, 10, 50, 250 500, 1000 at 5000 ohms/V; DC microamps: 0-50; DC ma: 0-1, 10, 100, 500; DB: —20 to +10, —8 to +22, +6 to +36, +20 to +50 ("O" reference: 1 mw into 600 ohms); resistance: x1, x10, x100, x1000, x10K (30 ohms center-scale). Accuracy: ±3% FS on DC ranges, ±4% on AC. AC frequency response is flat within +1 DB 30-1 mhz on the 2.5 and 10V ranges, to 150 khz on the 50V range, and to 50 khz on the 250V range. Size, only $4\frac{9}{16}$ x $3\frac{5}{16}$ x $1\frac{3}{4}$; wt., 12 oz. With leads.

371 AC VOLTMETER

Designed primarily for testing voltages applied to motors, heating equipment and many other industrial applications. Accuracy: ±3% of full scale. 0-150, 0-300, 0-600 volts. Size: 3x5⅞x2½". Shpg. wt., 3 lbs.

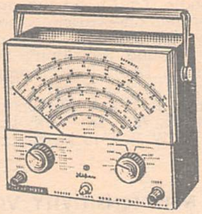
62F360. NET.................................... **39.00**

375 DC AMMETER

Provides a complete range from a fraction of an amp to 2.5 amps without the necessity of using auxiliary external shunts. 0-1, 2.5, 5, 10, 25 amps. 3x5⅞x2½". Wt., 3 lbs.

62F362. NET.................................... **39.00**

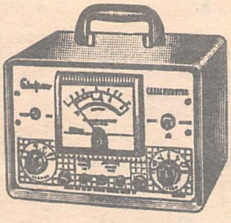
SOLID STATE VOM



Model 313. Has input impedance of a VTVM combined with convenience features of a battery operated VOM. So stable, it's rarely necessary to touch the zero or ohms adjustment knob. Saves the time and frustration of calibration after each range change. The FET input handles large overloads without damage, and the taut-band meter movement is varistor protected from even 200, 000% overloads. The 313 uses just 1 9-volt transistor radio battery for over 300 hours of operation. A switch allows the battery condition to be checked constantly, and a "power on" indicator is provided. Another feature you'll like is the large, 7 inch scale, designed for fast accurate readouts. Ranges: AC and DC volts: 0-0.3-1-3-10-100-300-1000. DC milliamps:0.01-1-10-100-1000. Resistance: Rxl, x10, x100, xlk, x10k, x100k, x1Meg, 10 ohm center scale. Accuracy: ±3% of full scale on both AC and DC. Input impedance: 11 megohms on all ranges. Supplied with leads, istlating probe, battery, and manual. Sizes: 7¾" x 6¾" x 3¾". Shipping weight: 5 lb

62F2273. NET **125.00**

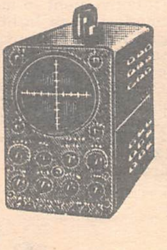
383A "CAPACOHMETER" CAPACITOR CHECKER



In-circuit capacitor leakage tester utilizes a pulse technique to detect many "marginal" capacitors. Measures the leakage resistance of defective paper, micra or ceramic capacitors; indicates directly the capacitance of good ones over a range of 10.0 mf to 10.0 mf. All measurements are made under load conditions. Avoid tedious adjustment of bridge circuitry and balancing controls. Borderline capacitors which cause costly "callbacks" are detected immediately with the pulse test. Operates from 105/125 VAC, 50-60 cycle. Comes complete with test leads. Shpg. wt. 12 lbs.

62F345. NET **150.00**

466 5" PORTABLE OSCILLOSCOPE



A small, handy scope designed to take on practically any radio-TV service job. Vertical amplifier: ±1 db 15c to 100kc; 6 db down at 250 kc, usable to 1 mc. Maximum vertical deflec. sensitivity: 30 mv/inch. Sweep range: 15c to 80 kc. Maximum input voltage: 400 v. peak. Calibrating voltage (at 117.5 VAC source voltage) 1 v. peak-to-peak, ±10%. Horizontal amplifier has flat response within ±1 db, 15c to 20 kc; down 6 db at 100 kc. Maximum horizontal deflection sensitivity 150.7 volt/inch. Sensitivity with Z-axs (intensity) modulaiton: 20 volts rms extinguishes beam. Input resistance (with attenuator set at xl) 0.1 megohm (with attenuator at x100) 0.5 megohm input capacitance, 40 mmf. Operates from 117 VAC 50/60 cycle, 50 watts. Supplied complete with input cable No. 0100 and operator's instruction manual. Unit weighs 19 lbs.; shpg. wt. 40 lbs. Size: 7⅞"x12"x16⅛".

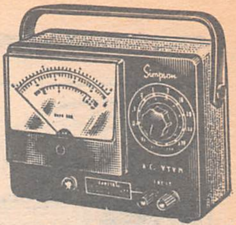
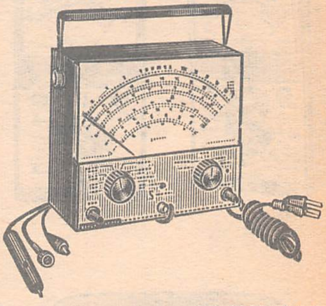
715 HIGH SENSITIVITY AC VTVM



Sensitivity: 10 millivolts full scale on lowest range. Input impedance: Minimum of one megohm at 1 KC. Frequency response: flat within one decibel between 10 cps and 400 KC. Meter scale provides DB markings on both the voltage range positions. AC rms volts 0-0.1, 0.03, 0.1, 0.3, 1.0, 3.0, 10, 30, 100 and 300. Decibels: total range, —52 to +52 DBM (at Zero DBM, reading is one millivolt across 600 ohms). Scale reads —12 DB to +2 DB. Accuracy on all ranges: ±5% of full scale. Unit requires 110-125 VAC, 50-60 cycles. 7½"W x 5½"H x 3"D. Gray hammertone finish. Complete with operator's manual, and shielded input cable. Shpg. Wt. 3 lbs.

62F1182. NET **84.00**

312 EXTRA HIGH IMPEDANCE WIDE SCALE VTVM



The input resistance of this instrument is 16 megohms, not 11 megs as in most other VT-VM's. 40% higher input impedance means 40% less circuit loading and correspondingly greater accuracy in readings. Extra-large, easy to read seven-inch scale. Has 500 mv scale to meet today's solid state testing requirements. Specially designed circuit protects the meter against burn-out. Voltage ranges DC-0-500 mv, 0-1.5; 5, 15, 50, 150, 500. 1500 volts at 16 megohms input resistance; AC RMS; 0-1.5, 5, 15, 50, 150, 500, 1500 volts at 1 meg minimum input impedance; peak-to-peak; 0-4, 14, 40, 400, 1400, 4000 volts. Resistance ranges: R x 1, x 10, x 100, x 1K, x 10K, x 100K, x 1 meg. 10 ohms center scale. Accuracies are ±3% of full-scale value on all voltage ranges, ±3% of arc on resistance. Frequency responce is flat ±3% from 51 cps to 3 megacycles on AC voltage ranges through 150 volts; with special RF probe, range can be extended to 250 mc. Operates from 105/125 VAC, 50/60 cycles. Modern smartly designed case measures 7¾ x 6¾ x 3⅜". Comes complete with No. 0150 AC/ohms/DC probe and operator's manual. Wt. 4¾ lbs.

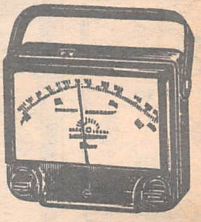
TEMPERATURE METERS

388-3L THERM-O-METER



The Therm-o-meter measures the temperature of air, gases, liquids, or solids by means of thermocouple type leads from —50°F to +1000°F. Both Fahrenheit & Centigrade readings can be made in 15 to 30 sec. and up to a distance of 7½'. A selector switch on the 388-3L connects any one of the three leads into the meter circuit. The lead wires are small enough to pass through a closed door and gasketing. The meter movement is self-shielding, A compensator circuit automatically corrects room temperature effects from 60 to 100° F. With one general purpose lead. battery, and operator's manual. 7$\frac{15}{16}$x6x2$\frac{15}{16}$". Shipping weight. 4 lbs.

62F350. NET **84.00**

DUAL RANGE THERM-O-METER

Model 389-3L may be used to measure temperatures of gases, liquids, or solids in many fields; frozen food packaging, ice manufacturing, freezer storage, refrigeration, photo processing, air conditioning, and numerous others. Using the three leads, readings may be made in three different locations at once. There are two ranges. A low from —50°F. and a high from 100°F to 250°F. Accuracy is within 3°F in any position, near center of scale within 2°F or better. Compensation for room temperature effects. Large easy to read 7" meter. Self shielded core magnet, minimizes heavy electrical interference. Includes sensing probes with thermistors, tip and 15' lead, and batteries. Black bakelite case. 7$\frac{15}{16}$x6x2$\frac{15}{16}$". Wt., 6 lbs.

269-3 TAUT-BAND VOM

- **Taut-band meter movement**
- **2% DC accuracy, 3% on AC**
- **Overload protection on all ranges**
- **Mirrored scale eliminates parallax**

Has a self-shielded taut band meter movement that gives better repeatability, plus faster pointer action. This meter movement is combined with a mirror scale; and knife-edge pointer, eliminating parallax errors. Large, readable scale is over 6" long. Accuracy is ±2% DC and ±3% AC, with new range coverage. One switch selects all 27 ranges. Battery replacement is quick and easy with the snap-on compartment. And the 269-3 is protected from overloads with a replaceable 1.5 ampere fuse at the input, and a veristor at the meter movement. Sensitivity is 100k ohms/volt on DC and 5k ohms/volt on AC. The available ranges are as follows: DC volts: 0-1.6-8-40-160-400-800-1600-4000, AC volts: 0-3-8-40-160-400-800, DC microamps: 0-16-160, DC milliamps: 0-1.6-16-160, DC amps: 0-1.6-8, DB scale, (1Mw-600 ohms): —12 to +45.5 in 4 ranges. Resistance: 0-200-20k-200k-2meg-20meg-200meg. Comes complete with No. 00115 test leads, 4000 volt DC probe extension, and comprehensive operator's manual. Size: 6"x7½"x3". Shipping Weight: 5 pounds.

HAND-SIZE VOMS

Models 208 and 209. Hand-size VOM's feature built-in AC current ranges. Separate inputs for voltage and current make volt-amp measurements as easy as flipping the range switch. Four lead input also makes it convenient to measure a DC voltage and its AC component. For continuity checks both models have light-up indicators for quick "yes" or "no" answers. One linear scale is used for all current and voltage ranges for clear and easy readouts. Shock-proof core magnet movement which is unaffected by stray magnetic fields. DC accuracy is ±1.5% of full scale. AC accuracy is ±2.5% of full scale. Sensitivity of the 208 is10,000ohms/volt on both AC and DC; the 209 has a sensitivity of 1666 ohms/volt ranges. Range: **Model 208** — DC volts 0-0.6-3-12-60-300-600; AC volts 0-12-60-300-600; DC ma. 0-.6-6-30-120-600; DC amps 0-3; AC ma. 0-.6-6-30-120-600; AC amps 0-3; Ohms R x 1, x 100(28cntr). **Model 209** — DC volts 0-3-12-60-300-600; AC volts 0-12-60-300-600; DC ma 0-6-30-120-600; DC amps 0-3-12; AC ma 0-6-30-120-600; AC amps 0-3-12; Ohms R x 1 x 100(44cntr.). Size: (both units), 6" x 3⅝" x 1 11/16". Shipping weight, 1½ lbs.

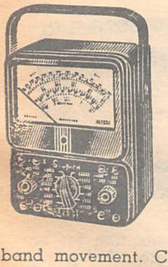
255 VOM WITH TEMPERATURE SCALE



Ideal for heating and utility servicemen. This tester includes the VOM functions of the popular model 260, as well as providing a temperature measurement range of +100 to +1050°F. Has low millivolt drop on the DC ranges; ideal for checking transistorized equipment. DC ranges: 0-50, 0-250 millivolts; 0-2.5, 0-10, 0-50, 0-250, 0-1000 volts; 0-50 microamperes (with both 50 and 250 mv drop); 0-1, 0-10, 0-100, 0-500 MA with 50 mv drop. AC ranges: voltage: 0-2.5, 0-10, 0-50, 0-250, 0-1000; amps: adapter available to read to 500 amps. Resistance ranges: 0-2K, 0-200, 0-20 megohms. Diode-protected taut-band movement. Complete with test leads, 5 ft. thermocouple lead and operator's manual. Size: 5¼ x 7 x 3⅛"; shipping weight 3½ lbs.

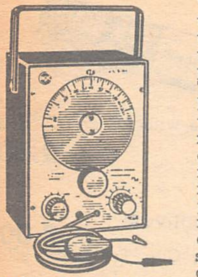
RCA Test Equipment

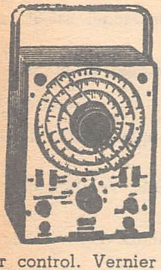
TRANSISTORIZED SINE/SQUARE-WAVE AUDIO SIGNAL GENERATOR



WV504A. Idealy suited for service, industrial laboratory, and educational applications. Frequency range extends from 20 to 200,000 Hz. Stable signal with an amplitude variation not exceeding ± 1.5 db. Total harmonic distortion of sine wave less than 0.25%. Can be used in a wide variety of applications including the direct measurements of frequency response characteristics of audio amplifiers, and testing speakers and enclosures. In addition instrument can be used in finding impedance of LC combinations and in determining the frequency or speed of vibrating or rotating bodies. Includes attached, shielded output cable, simple one scale dial. Complete with instruction manual. Size: 7¾x5¾x4¾. Shpg. 3 lbs.

62F1656. Factory wired and tested. **NET**.. **95.00**

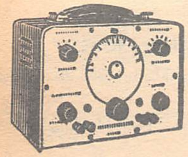
RF SIGNAL GENERATOR WITH SWEEP FEATURES



Model WR-50B. Designed for maintenance. troubleshooting and instructional purposes. Provides an accurate source of CW or amplitude-modulated signals from 85 KHz to 40 MHz. Suited for aligning and signal tracing AM, FM, Hi-Fi and Citizens' Band and amateur radio receivers. A 400 Hz output provides a practical means for checking audio amplifier circuits. Built-in crystal calibrating oscillator circuit with front panel crystal socket. Permanently attached shielded RF output cable. Built-in DC blocking capacitors. Two-step RF attenuator switch plus a continuously variable attenuator control. Vernier tuning. Sweep output is provided at 455 KHz and 10.7 MHz for sweep alignment both AM and FM IF circuits. A return-trace blanking circuit is included to provide a zero reference line. Width 5⅜", height 7¾", depth 4¾", weight 5 lbs.

62F086. Model WR-50B. Factory wired and tested. **NET 65.00**

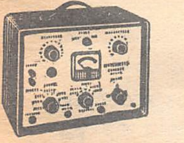
SINE/SQUARE WAVE AUDIO SIGNAL GENERATOR



Model WA-44C. For measurement of frequency response characteristics of audio amplifiers, and testing of loudspeakers and enclosures or finding impedance of LC combinations. Switch selection for sinewave or squarewave output. Simple one-scale dial. Separate 60 Hz line frequency output for intermodulation distortion measurements. Wide frequency range, 20 Hz to 200,000 Hz. Less than ½ of 1% distortion over the audio-frequency range. Operated from a 50/60 Hz, 105-125 volt source; covers in four bands a range from 20 Hz to 200,000 Hz. The circuit of the sine-wave function consists of a "Bridged-T" oscillator with a cathode follower output stage. The square-wave output is developed by using the sine-wave oscillator output to drive a clipping and shaping circuit. Produces a stable signal with an amplitude variation of not more than ±1.5 dB. Total harmonic distortion is limited to 0.5% over the range of 30 Hz to 15 KHz. Width 10¹¹⁄₁₆" height 7", depth 6⅛". Weight 10 lbs. With instruction booklet.

62F013. Model WA-44C. Factory wired and tested. **NET**.... **98.50**

STEREO FM SIGNAL SIMULATOR



Model WR-52A. Designed to generate signals required for service, alignment, and maintenance of mono and stereo FM receivers and multiplex adaptors. Provides the following signals: Composite stereo output for either right or left channel; FM stereo output for either channel, 100 MHz FM carrier is adjustable to permit selection of a quiet point in the FM band, RF deviation is adjustable 0-75 KHz; Monaural FM output (a switch is provided to disable the 19 KHz oscillator for low-distortion mono output); 100 MHz sweep output to check receiver RF/IF alignment (sweep rate is 60 Hz, sweep width is adjustable 0-750+KHz; Audio signals of 400 Hz, 1 and 5 KHz. Crystal-controlled 19 KHz and 38 KHz signals for multiplex circuit adjustments; 67 and 72 KHz output signals for SCA trap circuit adjustments; special internal test signal to check phase adjustment of stereo signal. Direct unterminated cable is used with composite stereo and audio signal outputs, and a terminated caple for RF output to 75 or 300 ohm antenna input. Complete with connecting cables. Size 13½x10x8"; shpg. wt., 21 lbs.

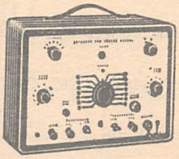
62F1785. Factory wired and tested. **NET**........................ **248.00**

CRYSTAL-CALIBRATED MARKER GENERATOR

Model WR-99A. Supplies a fundamental frequency RF carrier of crystal accuracy for use in aligning and trouble-shooting TV (color and black and white) and FM receivers and other electronic equipment operating in the range of 19 to 260 MHz in 8 bands on fundamental frequencies. Built-in crystal calibrator, heterodyne detector, amplifier and speaker provides calibrating beates at 1 MHz or 10 MHz intervals throughout entire tuning range which is covered by 8 bands. A built-in 4.5 MHZ crystal provides necessary accuracy for alignment of intercarrier-if amplifier and discriminators. At least 0.1 volt output VFO ranges; 0.05 volt crystal frequencies, into a termination of 90 ohms. Provides signals for adjusting vertical or horizontal linearity. Precision matched impedance/resistance pad attentuator, 0-60 dB in 5 db steps. Special modulation input available for re-transmission. Provision for use as Heterodyne Frequency Meter. Provides dual markers 4.5 MHz apart for bandwidth checks and RF alignment. Triple markers for sound-if alignment and bandwidth checks. Adjustable dial pointer for accurate registration with crystal-calibration check points. With RF output cables and instruction booklet. Wt. 21 lbs.

62F054. Model WR-99A. Factory wired and tested. **NET**...... **256.50**

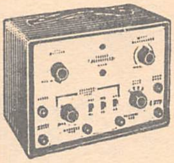
TELEVISION/FM SWEEP GENERATOR



Model WR-69A. For visual alignment of both TV and FM receivers. Has preset switch positions for all VHF TV channels, the FM broadcast band, and TV video, chrominance, and IF frequencies. VHF output is on fundamental frequencies only; no beat notes or harmonics are used. Exceptionally good linearity is provided by a precision vibrator capacitor. Continuously adjustable sweep width and flat output make for accurate sweep response displays. Special sample-voltage terminal on panel permits use with marker-adder units in alignment. Dual-piston attentuator provides smooth even attentuation over 60 dB range for TV and FM channels and 70 dB range for IF and video. IF/Video output frequency continuously tunable from 50 KHz to 50MHz in 6 ranges. Sweep-frequency bandwidth continuously adjustable from 50 KHz to 20 MHz on IF/Video and FM; 12 MHz max. on TV channels. Return trace blanking. Two continuously adjustable bias voltages, 0 to —12 volts, available on front panel. Width 13⅝", height 10", depth 7". With Instruction Booklet and Cables. Weight 16 lbs.

62F071. Model WR-69A. Factory wired and tested. **NET**..... **295.00**

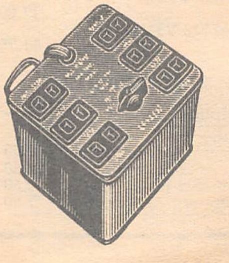
RF/IF/VF MARKER ADDER



Model WR-70A. For RF, IF, and video sweep alignment of both color and black and white TV receivers. Provides sharp, easy-to-read markers for alignment. A choice of four different marker shapes is available, permitting use of marker type best suited to the response curve. Designed for use with conventional marker and sweep generators and the WR-59 and WR-69 series TV sweep generators. Marker signal is added to the sweep-response curve after the sweep signal is taken out of the receiver under test. Eliminates or reduces distortion of sweep curve by the marker. Permits trap alignment without marker "suckout." Hi-Q markers — high in amplitude, narrow in width. Power supply voltage stabilized for rock-steady trace display. With instruction booklet and four coaxial cables. Wt. 8 lbs.

62F072. Model WR-70A. Factory wired and tested. **NET**.... **96.00**

ISOTRAP AND AUTOTRANSFORMER



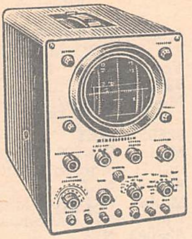
Model WP-26A & WP-25A. Designed for us as either adjustable isolation transformer or adjustable autotransformer to facilitate testing. Provides instant high-low-medium line-voltage testing, Minimizes shock hazards, prevents damage to test equipment. Heavy duty rotary switch adjusts primary to match line voltage over range of 105 to 130 volts steps. Size 5¾"x4⅜". Weight 15 lbs.

62F047. WR-25A delivers 275VA. **NET**.................................. **27.50**

62F1666. WP-26A delivers 400VA. **NET**..**40.00**

5" OSCILLOSCOPE

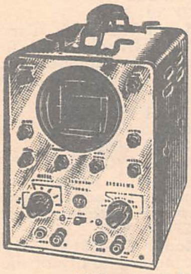
- **Flat response from 10 Hz to 4.5 MHz**
- **Solid State Power Supply Circuit**



Model WO-91C. Reliable, heavy duty, precision instrument especially suited for use in production and servicing both black and white and color TV receivers, monitors, broadcast equipment, TV distribution systems, hi-fi systems and communications equipment. A multi-scale graph screen makes peak to peak voltage measurements as easy as with a VTVM. Applications include waveforms analysis, square wave testing, and observation of circuit and vacuum tube characteristics. A 2-stage sync separator makes it easy to check TV horizontal and vertical sweep synchronization. Has Solid State power supply circuit. Complete with WG-300B Direct/Low cap. probe and cable, ground cable, alligator clip, clip insulator, green-graph screen, instruction book. Size: 9x13½x16½". Ship. wt., 35 lbs.

62F056. NET **269.00**

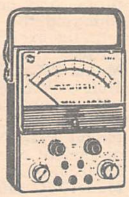
SUPER PORTABLE OSCILLOSCOPE



Model WO-33A. This 3" Oscilloscope is the "all purpose" scope. All bandwidth you need for servicing color TV, video broadcast monitors and cameras; and for square-wave testing of audio and ultrasonic equipment. All the gain you need for low-level audio work. With vertical amplifier in narrow-band position. Sensitivity is 3 RMS millivolts/inch; bandwidth within —3dB, 20 Hz to 150 KHz. Wide band position: sensitivity 100 rms millivolts/inch; bandwidth within —3dB, 5.5 Hz to 5.5 MHz. Sweep circuit; sawtooth range from 15 Hz to 75kHz sync; external, ± internal; line sweep —160° adjustable phase; sync range to 4.5 MHz. Size: 6½x8¾x10¼". Shipping wt. 16 lbs.

62F049. Model WO-33A. **NET.** **139.00**

IN-CIRCUIT/OUT-OF-CIRCUIT TRANSISTOR TESTER



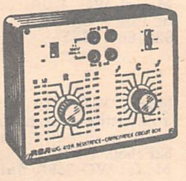
Model WT-501A. Tests both low and high power transistors, and has both NPN and PNP sockets to allow convenient transistor matching for complimentary symmetry applications. Tests out-of-circuit transistors for DC beta from 1 to 1000, collector-to-base leakage as low as 2 microamperes, and collector-to-emitter leakage from 20 μa to 1 amp. Special low-impedance circuitry assures reliable in-circuit testing. Collector current adjustable from 20 microamperes to 1 ampere in four ranges, permitting most transistors to be tested at rated current level. A complete DC Forward Current Transfer Ratio Curve can be plotted. Three color-coded test leads are provided for in-circuit testing, and for out-of-circuit testing of transistors that will not fit into the panel sockets. Batteries are not included. Size: 6⅞" x 5¼" x 3⅛". Shipping weight: 3 lbs.

62F1655. NET **66.75**

Model WG-414A. Clip probes. Set of 3 for use with WT501A. Special clip-on connectors and thin flexible shafts for connection to transistor elements on circuit boards.

62F093. Set of 3. **NET** **13.50**

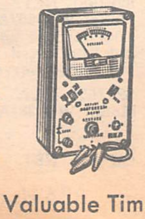
RESISTANCE/CAPACITANCE BOX



Model WG412A. Provides a convenient selection of standard resistor and capacitor values availiable separately or in series/parallel RC combinations. Has 36 resistors ranging in value from 15 ohms to 10 megohms, and 18 capacitors with values ranging from 100pf to .22μf. Size: 6⅞"x 5⅜"x2⅜". Ship. wt.: 2 lbs.

62F2302. NET **30.00**

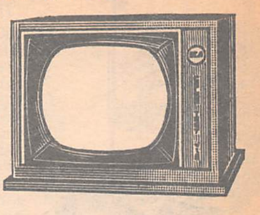
TRANSISTOR/DIODE CHECKER



Model WC-506A. A compact, battery operated instrument providing quick, simple, checks of relative gain and leakage levels of out-of-circuit transistors. Tests PNP and NPN types. Panel switch provides checking high leakage types. Includes a transistor socket, color coded test leads, and a large meter with a single red/green scale. Also checks diode front/back ratio. Size: 3¾" x 6¼" x 2". Shpg. wt. 1 lb.

62F2303. NET **18.00**

RCA MARK II COLOR TEST JIG



Model 10J102. May be used with associated cables for servicing RCA 90° rectangular receiver chasis, as well as round receivers manufactured within the past ten years. An automatic degaussing assembly gives you the same quality feature found in all late model RCA TV color chassis. Rubber channeled hand holds. Rugged, cobalt gray baked enamel finish cabinet is completely assembled, and ready for operation.

99F2001. Model 10J102. **NET** **99.50**

MODEL 10J102 CABLES

Model 13B111. Kinescope socket etxension cable for use with CTC17 and CTC19 Color TV Chassis to connect to the RCA Color Test Jig. 11A1015A.

57F2003. NET. **4.80**

Model 13B112. Deflection yoke extension cable for use with CTC17 and CTC19 Color TV Chassis to connect to RCA Color Test Jigs.

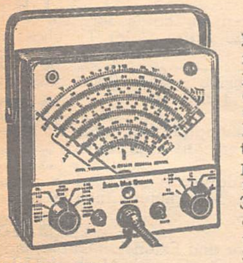
ULTRA-SENSITIVE DC MICROAMMETER

- **Six direct-current ranges for measuring current from 0.0002 to 1000 microamperes.**
- **Voltage drop for full scale deflection only 0.5 volts.**
- **Low Drain Tubes**

Model WV-84C. Application: a battery operated vacuum tube microammeter designed for measuring minute direct currents, for making current and voltage measurements in electrolysis and corrosion investigations, and for checking currents in light meters, ultra-violet and infrared detectors, and spectrophotometric devices. When used with the external multiplier resistors, it may be used as a voltmeter or megohmmeter. Size: 8¾x10¾x6½". Ship. wt, 10 lbs.

62F006. NET **110.00**



SENIOR VOLTOHMYST

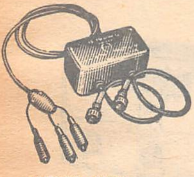
Model WV-98C. Provides direct reading of peak-to-peak voltages of complex waveforms found in video, sync, and deflection circuits. Measures 0.2 to 4200 volts in 7 overlapping ranges, RMS values of sine waves from 0.1 to 1500 VDC, 0.2 Ω to 1000M Ω. Input resistance: 11 megohms. Freq. response: up to 250 MHZ with WG-301A ±1db from 30 Hz to 3MHz (1.5 and 5 VAC ranges). Electronic protection against burnout. Size: 7x6½x3¾". Shpg. wt. 8 lbs.

62F-060. NET **88.50**

VIDEO MULTIMARKER

Model WG-295C. Provides seven simultaneous absorption-type markers at accurately preset frequencies for marking video response curves. Markers 0.5 MHz, 1.5 MHz, 2.5 MHz, 3 MHz, 3.58 MHz, 4.1 MHz and 4.5 MHz. Each marker is identified by touching a corresponding contact on case. Connects between IF/VF output. Size 7x5½x4½". Shpg. wt. ½

62F044. NET **33.50**



RF MODULATOR

Model WG-304B. An accessory used to check the overall frequency response of TV receivers from antenna to picture tube grid. Permits modulation of an R. F. signal from a marker generator. Size: 7x5½x4½".

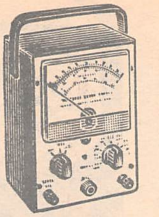
RCA

AC VACUUM-TUBE VOLTMETER



Model WV-76A. A high-sensitivity ACVTVM for hi-fi and other audio applications. Designed for measuring AC voltages from 0.0002 volt to 500 volts over the frequency range of 10 Hz to 1.5 MHz. Offers nine overlapping AC voltage ranges from 10 millivolts to 100 volts full scale. Provides approximately 38 dB gain throughout the frequency range from 10 Hz to 500 KHz with probe in "Low-Cap" position and 10 Hz to 1.5 Hz with probe in "Direct" position. Probe and cables are supplied. In "Direct" position probe measures up to 100 volts; in "Low-Cap" position, probe can be used to measure up to 500 volts or +56 dB. Size: 5⅜x7⅜x4¾". Ship. wt. 6 lbs.

62F088. Model WV-76A. **NET.** **90.00**

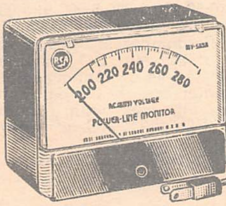
VOLT-OHM MILLIAMMETER

Model WV-38A. Extra large 5¼" meter. Protected meter movement. Has an input resistance of 20,000 Ω/V on DC; 5,000 Ω/V on AC; ±3% of full scale on DC, ±5% of full scale AC. Regular scales: 2.5, 10, 50, 250, 1000, 5000 VAC/VDC; 50 μ amp, 1, 10, 100, 500 mA, 10 amp (DC); plus extra scales of 250 mV and 1 volt DC. Resistance ranges 0-20 meg Ω in 3 ranges. Size 5¼"x6⅞"x3⅛". Ship. wt., 4 lbs.

62F052. Model WV-38A. **NET.** **52.00**

62F053. Model WG-270A. Carrying case. **NET.** 5.25

POWER LINE MONITORS



WV503A

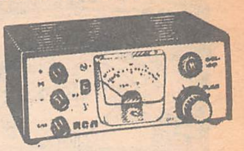
Models WV-120A and WV-503A. Designed for use where it is important to know power-line voltage at all times. Provides a continuous accurate indication of the AC line voltage without the inconvenience of handling probes and switches or the necessity of switching to one of several scales to select the proper meter reading. Used in conjunction with a variable isolation transformer; both monitors can be used on AC power-lines with frequencies from 25 to 400 hz, and feature 2% accuracy at center scale. Shpg. Wt. 2½ lbs.

62F1657. Model WV-120A. 120 volts. **NET** **18.50**

62F058. Model WV-503A. 240 volts. **NET** 18.50

● *NEW* MODEL WP700A & WP702A

WP-700A



WP-702A

Dual unit with two complete electrically isolated power supply sections. Continuously adjustable output from 0 to 20 volts; max. rating of 200mA. Input 105-135V AC, 50-60 Hz. Electronic short-circuit protection. Front-panel overload-indicator lamps signal when max. current condition is approached. Front panel voltage and current meter for each section. Excellent line and load regulation. Negative feedback regulator circuit. Five-way terminals for DC plus, DC minus, and ground. Size: 6x12x3". Shipping wt., 4 lbs. 13 oz.

92F000. WP-702A. **NET** **87.00**

62F001. WP-700A. Same as WP-702A but single unit, 4x6½x3", 2 lbs. 11 oz. **NET** 48.00

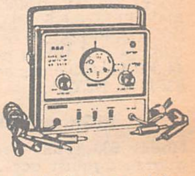
● *NEW* MODEL 703A

Output voltage from 0 to 20 volts at current up to 500 mA. Current limited to prevent damage to power supply. Front-panel overload-indicator lamp. Front-Panel meter for voltage and current levels. Three convenient 5-way output terminals (DC+, DC—, GND). Three-wire AC power cord., 5¼x8½x3¼".

62F002. WP-703A. **NET** **58.50**

62F003. WP-704A. Same as WP-703A but with output voltage adjustable from 0 to 40 volts at current levels up to 250mA. **NET** 58.50

"CHRO-BAR" SOLID-STATE COLOR BAR GENERATOR



Model WR-502A. A solid-state, battery operated color bar generator, designed to provide the test signals required for adjusting convergence, color-phasing, matrixing, purity, and linearity of color television receivers. Patterns generated include color bars, dots, crosshatch, vertical lines, horizontal lines, and blank raster. The crystal calibrated solid-state circuitry is especially designed to provide stable patterns with no flicker. The instrument includes switches for killing the color guns of the picture tube. Leads are provided to the tube pocket. A 4.5 MHz sound carrier is added to the color pattern in the "PATTERN & SOUND" function. Size: 6½" x 7" x 4". Shpg. wt. 5 lbs.

POMONA

DC VOLTAGE TEST PROBES WITH BUILT-IN METER

Test probe featuring a built-in voltmeter. Easy to make high voltage adjustments; unit is small enough to fit in tool box or caddy. Ground the test probe instrument by attaching alligator clip to chassis, contact test probe tip to high voltage anode, read voltage from the built-in meter, and adjust as required. No batteries. Sensitivity 20,000 ohms/volts (50 ua) movement Accuracy: ±3% full scale. Handle is made of high impact thermo plastic. Probe: high impact polystyrene. Length: 14¾" overall. Wt. 8 ounces.

Stk. No.	Type	Volts	Mult. Res.	Net

KURZ-KASCH

● *NEW* LOGIC PROBE

Now — check logic levels on various integrated circuit equipment systems at a glance. Takes power supply from tested equipment. Leads attached to logic board. Readout displayed through two circular windows in end of probe. "True" logic voltage level or "1" (2-6.5 VDC) illumination window marked "1" Zero level logic 1 vdc or less) illuminates the "0" window. "Infinity" as improper logic level, or disconnected pin or wire, is indicated by blanking both windows. Presence of symmetrical wave forms cause illumination of both windows. 9⁄16" dia., 5¼" long, 26¾" leads with pin terminal connectors. Input Impedance is greater than 150,000 ohms for logic "1" level. LP-500 goes from pocket to job instantly.

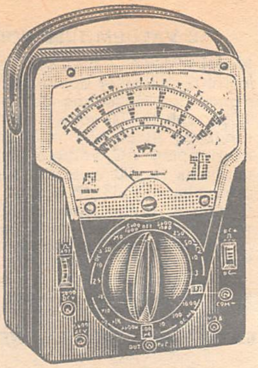
Model 630-PLK



Model 630-PL

HIGH IMPEDANCE VOLT-OHM-MICROAMMETER

Model 630-M. The input impedance of a VTVM with the convenience of a VOM. The 630-M's sensitivity is derived from the singular achievement of its basic 0-1 DC micro-ampere movement. The 630-M incorporates no amplifiers, has no zero drift, no warm-up, and no power requirements. 1,000,000 ohms per volt, DC for greater accuracy on high resistance circuits. 20,000 ohms per volt AC 1 u-a Suspension Meter Movement: no pivots, bearings, or rolling friction. Extremely rugged. Greater sensitivity and repeatability. 61 ranges, usable with frequencies through 100 Khz. Temperature compensated. ±1½% DC accuracy, ±3% AC. Current measurements from 20 nanoamperes. Voltage measurements from 5 mv. VDC: 0-.6-3-12-60-300 at 500,000 ohms/volt. 0-.3-1.5-6-30-150 at 1,000,000 ohms/volt. 0-1200 at 125,000 ohms/volt. 0-6-600 at 250,000 ohms/volt. VAC: 0-3-12-60-300-1200 at 10,000 ohms/volt. 0-1.5-6-30-150-600 at 20.000 ohms/volt. DB: —20 to +63 in 10 ranges. DC MICROAMPERES: 0-1 at 300 MV. 0-60-600 at 300 MV. 0-120 at 600 MV. DC MILLIAMPERES: 0-6-60-600 at 300 MV. 0-1.2-12-120-1200 at 600 MV. DC AMPERES: 0-6 at 300 MV. 0-12 at 600 MV. OHMS: 0-1K-10K-100K (4.4-44-440 at center scale). MEGOHMS: 0-1-10-100 (4400-44,000-440,000 ohms center scale.) Shpg. wt. 5 lbs.

HIGH ACCURACY VOLT-OHM-MILLIAMMETER

Model 630-APLK. Transistorized Electronic Switching Circuit guards against accidental burnouts! Comprehensive overload protection. Polarity reversing switch and suspension Meter Movement. One selector switch minimizes chance of incorrect settings. Transistorized overload sensing device does not load circuit under test, eliminating possibility of damaging circuit components. Rugged 0-50 microampere suspension type movement. Diode network across meter protects against instantaneous transient voltages. Automatically checked by using X100K ohms range. One 20 position range switch turns in either direction to obtain desired range. Special meter shorting feature on "OFF" position for high damping when moving tester. Accuracy ±1½% on DC, ±3% AC. Flush mounted controls, jacks and meter. DC VOLTS: 0-2.5-10-50-250-1 000-5,000 at 20,000 ohms/volt 0-0.25 at 100 microamperes. AC VOLTS: 0-3-10-50-250-1,000-5,000 at 5,000 ohms/volt. DC MICROAMPERES: 0-100 at 250 Mv. DC MILLIAMPERES: 0-10-100-1,000 at 250 Mv. DC AMPERES: 0-10 at 250 Mv. Ohms: 0-1,000-10,000 (4.4-44 at center scale). Megohms: 0-1-100 (4,400-440,000 at center scale). Output Volts (AC): 0-3-10-50-250 at 5,000 ohms/volt: jack with condenser in series with AC ranges. Case: Molded, fully insulated; 3 11/32" x 5½" x 7½". Shpg. wt., 5 lbs.

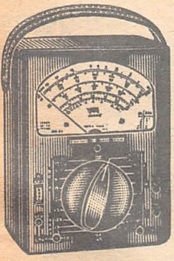
VOLT-OHM-MILLIAMMETER



Model 630

Model 630. Reads DC volts to 6,000 in six ranges at 20,000 ohms/volt. AC volts in corresponding ranges at 5000 ohms/volt. DC current ranges are: 0-60 microamperes. 0-1.2-12-120 mils. 0-12 amps. Measures ohms 0-1.000-10,000 and megohms 0-1-100. Also reads db from —20 to +77 in six ranges. One switch selects any range. 5½" scale; 50 microamp movement. Resistors are precision wirewound or carbon film. With batteries test leads. 3 7/32"x5½"x7½". ±2% DC, ±3% AC accuracy. Shipping weight 4½ lbs.

62F212. NET **61.00**

Deluxe Model 630-A. Laboratory version of Model 630 VOM above. Has same ranges and sensitivity but comes equipped with 4⅜" mirror scale and knife-edge pointer. ±1½% DC, ±3% AC accuracy.

62F211. NET **71.00**

VOLT-OHM-MILLIAMMETER

Model 630-PLK. Transistorized relay circuit provides protection from burn-outs; overload sensing device does not load circuit under test. Life of transistor circuit battery is nearly that of shelf life. Automatically checked by using X100K ohms range. 20 position range switch turns in either direction. Patented Bar-Ring Movement provides self-shielding; not affected by stray magnetic fields; usable with frequencies through 500 hz Sensitivity: 20,000 ohms VDC, 5,000 ohms VAC. Resistors directly connected to switch to form a simplified unit. Jacks located on lower corners of panel, permitting greater accessibility to control knob. Banana type leads for low-contact resistance at jacks. Leads are 50 inches long, test prods with removable alligator clips. DC Volts: 0-2.5-10-50-250-1,000-5,000 at 20,000 ohms/volt; 0-0.25 at 100 microamperes. AC Volts: 0-3-10-50-250-1,000-5,000 at 5,000 ohms/volt. Decibels: —20 to +11 +21, +35, +49, +61, +75; "O" DB at 1 MW on 600 ohm line. DC Microamperes: 0-100 at 250 Mv. DC Milliamperes: 0-10-100-1000 at 250 Mv. DC Amperes: 0-10 at 250 Mv. Ohms: 0-1000-10,000 (4.4-44 at center scale). Megohms: 0-1-100- (4,400-440,000 at center scale). Output Volts (AC): 0-3-10-50-250-1000 at 5000 ohms/volt; jack with condenser in series with AC ranges. ±2% DC, ±3% AC accuracy. Size: 3 11/32"x5½"x7½". Shipping weight, 5 pounds.

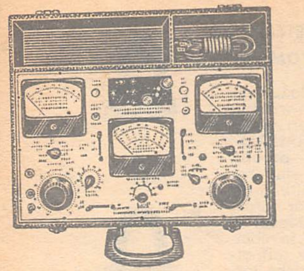
Test Equipment

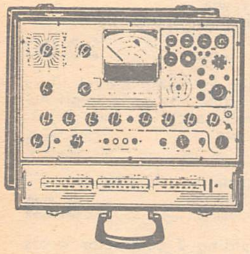
TRANSISTOR ANALYZER



Model 3490A. Tests DC beta, AC beta at 1kHz, leakages, alpha, reach thru voltage, saturation voltage, floating potential. The 3490's flexibility allows both plotting of characteristic curves and setting up of nearly any type of test. It features 3 independent power supplies, collector currents to 30A., input currents to 3A., separate input and collector meters, variable tetrode voltage, continuous coverage without skips, and free transistor tabulation. Also tests zener diodes, scr's etc. Wood case, 18x15x8". Shpg. Wt., 30 lbs.

62F202. NET **441.00**

TUBE ANALYZER



Model 3444A. This tester measures true Gm without any extra compensating factors. In addition it offers a combination of unique test advantages as follows: Checks plate current cutoff. Checks gas under operating conditions. Checks rectifiers under load. Checks thyratron firing voltage and grid current. Checks dual section tubes with only one lever movement. Provides shorts and leakage measurements from 0-10 megohms. Provides cutoff measurements on voltage amplifiers. No adaptors necessary. Case-wood, gray leatherette covered, 15x18x7. Hinged, removable lid, accessory storage compartment, and removable roll chart. Shpg. wt. 30 lbs.

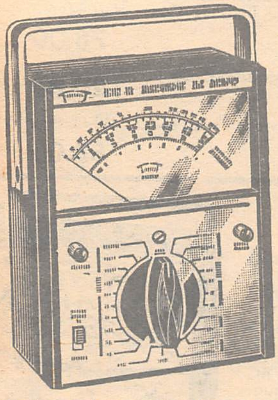
MODEL 600 SOLID STATE VOLT-OHMMETER



Model 600TVO. Lightweight and transisorized test instrument which has the portability of a VOM with the high input impedance of a VTVM, wide freqency ranges and low cost battery power. Features include: a brushed aluminum front panel with black range markings; molded case of high impact material; a carrying handle of extruded aluminum which doubles as a stand; removable back permits easy access to the working circuitry. One compact probe is used for all functions. The probe has a built-in switch which places a resistor in series with the instrument on DC voltage readings. The easily readable meter is 5" wide, Typical battery life is 4000 hours, in normal operation. Battery complement consists of: 3—1.5 V batteries (1 D, 2 AA) and 1—9 V transistor battery. Batteries included. Frequency range: 15 hz to 2 Mhz. 11 Megohm resistance on all DC ranges except .4 and .8. AC impendance is minimum of .75 megohms. Plug-in ground lead insures good grounding of the circuit under test. Ranges: DC—0-0.4-0.8-1.6-4-8-16-40-160-400-1600; AC—0-4-8-16-40-160-400-800; Resistance—0-1,000-10,000-100,000-1 Meg.—10 Meg. SOLID-STATE VOM.

Model 601. Lightweight, portable, battery operated all solid state V-O-M with push-button function switches and field effect transistorized circuitry providing 11 megohm impedance on all AC and DC ranges. The 601 has an accuracy of ±2% of full scale on DC and ±3% on AC. Frequency responce on AC ranges is 50 to 50K Hz. It also permits the operator to have at his disposal 7 conventional and 7 low power ohms ranges. The "Low Power Ohms" feature is designed to prevent electrical damage to IC's. In circuit resistance measurements can be easily made without the usual diode or transistor loading. In use, 75mv is applied across the device under test and max power applied is .1 mW. A total of 52 selections including "off" and "battery check" can be accomplished using the single range switch. The unit is furnished complete with batteries and leads. Ranges: Volts, AC & DC, 0-.1-.3-1-3-10-30-100-300-1000, (plus 0-.01-.03 AC); Ohms, 1-10-100-1k-10k-100k-1meg (10Ω center scale); Current, 0-10-100uA-1mA-10mA; Size: 6 1/2x5 1/8x3 1/8". LIQUID CARBONIC

ULTRASONIC LEAK DETECTOR

- **Translates ultrasonic sounds in the 36,000 to 44,000 cps range into audible sounds**
- **Probe and circuit case each operate on a 9 volt battery — life expectancy up to 1 year.**
- **Highly mobile . . . carries anywhere easily! Well suited for leak detection in hard-to-reach areas.**
- **Main circuit case weighs just 14 ozs.**
- **Detector effective up to 75 feet.**

Pressure turbulance sounds created by leak are detected, translated and amplified into audible signals. A 6 inch tubular probe locates the source of the leak, pinpointing it by changes in the sound level. Probe does not react to sounds from above, below or to the rear. Only frontal sounds activate the unit. The compact and lightweight amplifier unit may be carried in shirt pocket. A volume control is located on top of the unit for easy adjustment. The highly sensitive microphone in the unit responds to sound from 36 to 44 kilocycles per second. Detector incorporates dual transistorized circuit. There is a self-contained power supply in the circuit and, because of the low drain, gives approximately 100 hours of continuous operation. The Ultrasonic Detector is extremely effective in checking equipment using gas, under pressure, at high temperatures. Can also be used to locate mechanical difficulties in pipes involving valve action or bearing irregularities in moving machinery; for determining restrictions in pipes where fluid is moving; or any other disturbances causing sound in the 36-44 kilocycle range. The detector is effective up to 75 feet from sound source. Probe and circuit case are in long wearing aluminum case. Entire unit includes headset, amplifier, probe and connecting cables. Two batteries power unit (not included). Narrow field adapter (not included) is used when it is necessary to pin point difficult to locate leaks. Shipping weight 2 lbs.

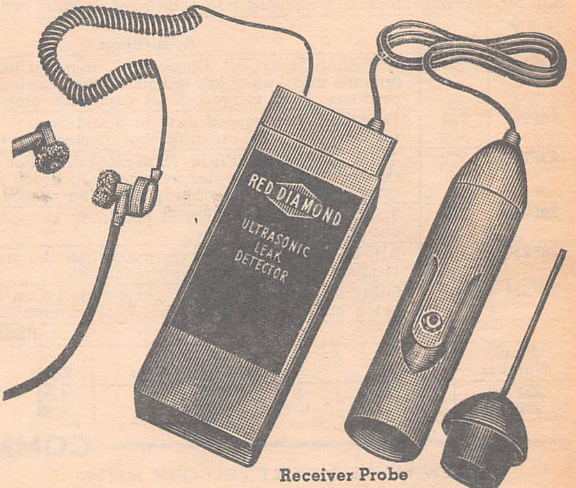
49F368. Eveready 216. **EACH** .... .48



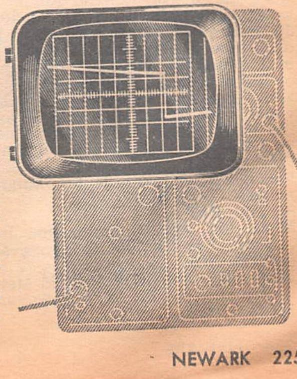
SIMPLE A-B-C OPERATION

1. Insert cable plug into rear jack of probe—plug at other end of cable into jack on top of amplifier. Plug headphones into amplifier.
2. Depress red "detect" button.
3. Rotate volume control unit the sound is heard.
4. Move probe back and forth. Sounds or leaks can then be pin-pointed. From changes in sound level heard through headphone, detection of leak is determined quickly, easily!

NEWARK carries complete lines of top quality electronic equipment Newark can supply all your needs, whether or not they are listed in this catalog.

EDNA-LITE

IMAGE EXPANDER



Model OS-STV-2. Stereoamic Oscilloscope Image Expander attaches simply, quickly to all standard 5" lab type oscilloscopes, including Tektronix. Hewlitt-Packard etc. Size: 8x8x6". Shpg. wt., 9 lbs.

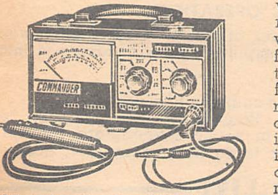
COMMANDER

● NEW FET FIELD EFFECT VOLT-OHM METER



Model 870. A highly sensitive voltmeter designed to accurately measure a wide range of AC/DC volts, resistance and db. Uses the field effect transistor to maintain the constant high impedance found in a vacuum-tube voltmeter. An indispensable tool to anyone requiring accurate reading of low voltages in transistorized equipment. Has the portability of a VOM with the accuracy and input impedance (10.6 Megohms) of a VTVM. Measures 1/10 to 1,000 volts DC, full scale, in 10 over-lapping ranges within ±2% accuracy. 1/100 to 300 volts RMS, full scale, in 10 overlapping ranges within ± 3% accuracy. —40 to +50 db in 10 steps of 10 db each. Resistance from 10 ohm center scale to 10 megohms center scale within ± 3 degrees of arc in 7 overlapping ranges. Input impedance of 10.6 megohms. Battery life: in excess of 1,000 hours. Features single-unit probe with built-in DC/AC-OHMS switch and shilded cable. Tool pocket built into lid for storage of probe and adjusting tools. Sturdy luggage-type case in soft black finish. Size: 9¼" x 5¾" x 6⅜". Shpg. wt. 5 lbs.

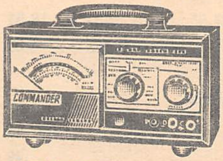
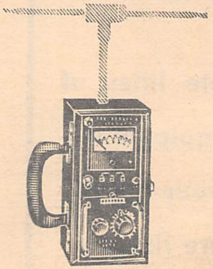
● NEW FET TRANSISTOR TESTER



Model 830. Pinpoint defective transistors and diodes in all solid state products — radios, stereo units, tape recorders. Determines PNP and NPN type at turn of knob. Measures AC Beta, DC Beta and Gm accurately. Measure supply voltages with an accurate 100 V voltmeter. Portable. Luggage type case. Size. 9¼" x 5¾" x 6⅜". Shpg. wt: 3 lbs.

62F2154. NET **79.95**

● NEW FIELD STRENGTH METER



Model 840C. Used to accurately measure radio frequency signals in AIR, TWIN LEAD or COAXIAL CABLE. Compact, completely transistorized and battery operated. Handles both VHF and UHF, and makes absolute measurements in microvolts per meter. All silicon transistor circuitry guarantees stable, reliable operation. Phone jack on front panel permits you to hear the amplified audio signal for positive station identification. (less modules). Ranges: O u volts to 100,000 u volts in four ranges. Selectivity: 50 db at ± 3 MHZ. Shpg. wt: 3¼ lbs.

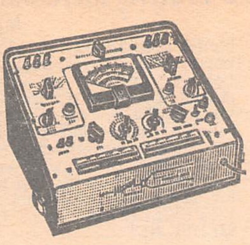
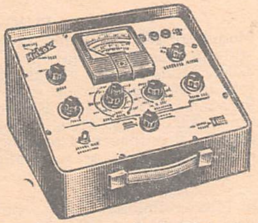
PORTABLE TRANSISTOR TESTER



Model 870. Measures large signal DC Beta on power transistors as well as small signal AC Beta on low and medium power transistors. Collector test current is variable up to 2 amps, permitting Beta measurements on power transistors rated at 5 amps or more. Tech Spec: Beta ranges 0-100 & 0-300, extendable to 600. Beta test collector voltage variable from 0-5 volts. Accuracy within 5% for both AC & DC Beta. Ic variable, 5 ma up to 2 amps. Vce variable, 0-5 volts. Input sensitivity of A-C bridge circuit amplifier is 50 millivolts peak-to-peak or 17.6 millivolts Rms for full deflection of meter. Meter overload protection. Requirements—115 volts AC, 40 watts. Size: 7⅞x11¾x14½". Shpg. wt., 22 lbs.

62F149. NET........ **425.00**

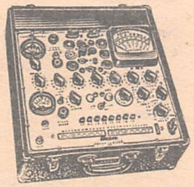
DYNAMIC BETA IN-CIRCUIT TRANSISTOR TESTER



Model 890A. Measures AC Beta with equal accuracy in or out of circuit. Measures parameters: AC Beta; Rin (transistor input resistance); Z Ohms (base-emitter circuit impedance); Ic. Measures AC Beta, Ic and Icbo out-of-circuit. In-circuit AC Beta measurement accuracy ±5% (150 ohms minimum circuit impedance). Utilizing on AC bridge principal with the transistor input circuit elements as one arm of the bridge, the total impedence is nulled. With the circuit impedances as low as 150 ohms, this effectively removes these elements from the circuit. Useful for incoming inspection of transistorized products and sub-assemblies. Beta Ranges: 0-50, 0-100, 0-200. Furnished complete with test cable. AC Test Signal: Variable 1000 HZ sine wave-calibration setting at 5 ua. Meter protected against overload. Portable carrying 6½"H, 9"D, 10¾W. Wt. 8 lbs.

62F102. NET........ **235.00**

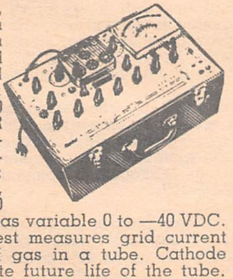
HIGH SPEED GM TUBE AND TRANSISTOR TESTER



Model 6000A. Tests all new tubes. Instant line adjust and automatic short indication. Covers 3,000 to 15,000 µmhos in 3 ranges. Shows gas evaluation. Able to determine the reserve capacity of tubes which could cause trouble in the future. Filament voltage from 0.6 to 117 volts in 19 steps. Complete with removable socket plate that accommodates practically all tubes in use today. (7-pin, octal, local, 7- and 9-pin noval, Novar, Compactron, Nuvistors, 10-pin "headers.") Inter-element leakage registered instantly on 5 neon lamps, identifying elements involved. Red leatherette portable case size: 16¾"x11¾"x7½". Panel gold anodized. For 105-125 VAC, 60 HZ, 40 watts. Shpg. wt., 21 lbs.

62F171. NET........ **297.50**

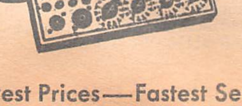
PORTABLE LAB TUBE TESTER



Model 539C. Tube sockets: 4, 5, 6, 7-pin, octal, loctal, 7, 9, and 10-pin miniature, 7-pin inline and 8-pin miniature. Compactron, Novar, 5 and 7-pin Nuvistor. Socket savers provided for 7 and 9-pin and octal. Gm ranges: 60,000; 30.000; 15,000; 6000; 3000; 600 micromhos. Rectifier diode and VR ranges. Inter-element leakage indicated on meter or neon lamp, sensitivity: 50 megohms. Test voltages: filament, 0-117 VC in 18 steps; signal, .025, 0.5, 1, 2.5 RMS; plate, 66 and 150 VDC; screen, 56 and 130 VDC; fixed bias variable 0 to —40 VDC. Self bias terminals on panel. Gas test measures grid current detecting the most minute amount of gas in a tube. Cathode reserve can be determined to indicate future life of the tube. Three 1% accuracy Hickok meters: Gm. VR voltage and leakage; line voltage; twin range bias meter. Size 16¾Wx18⅜Lx7½"D. For 105/125 VAC, 50/400 HZ, 40 watts. Black leatherette, portable case. Shpg. wt., 35 lbs.

62F133. NET........ **625.00**

HICKOK ADAPTER



Model CA-5. Adopter for testing compactrons, 10-pin "headers," 9-pin novars and 5 and 7 pin Nuvistors. For use with all current Hickok manual tube testers. Wt., 6 lbs.

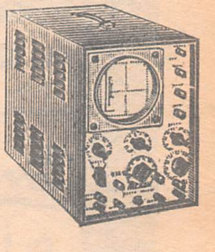
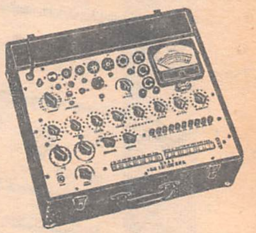
WIDE BAND SERVICE TECHNICIAN'S OSCILLOSCOPE



Model 677. Has pre-set horizontal and vertical sweep positions. Vertical amplifier has frequency response flat to within 3 db from 5 hz to 4.5 Mhz. Sensitivity 40 MVRMS. Horizontal amplifier has response within 3 db from 5 hz to 350 khz. Power input: 117VAC, 50/60 hz, 90 watts fused. Size: 14"x19½"Wx18½"D. Shpg. wt., 36 lbs.

62F1750. NET........ **269.50**

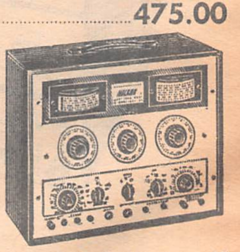
INDUSTRIAL AND COMMUNICATIONS TUBE TESTER



Model 752A. Tests VR tubes for firing point, regulating voltage, and current range. Tests 4, 5, 6, 7-pin, Octal, Loctal, 7, 9, and 7-pin in-line and 8-pin round subminiature acorn, Compactron, Novar 5 and 7-pin Nuvistor tubes. Gm ranges: 0-1500; 3000; 6000; 15,000; 30,000 micromhos. Inter-element leakage indicated on meter, sensitivity 10 megohms. Test voltages: Filament, 0-117 VAC in 19 steps; signal, 0.25, 0.5, 1.25, 2.5 VAC; plate, 75 and 150 VDC; screen 56 and 130 VDC; Grid bias variable 0 to —40 VDC; extra negative supply, —40 VDC; diode test, 20 V RMS; 0Z4 test; 287 V RMS. Cathode activity/life test. Self-bias test jacks on panel. Bias and line fusing. Illuminated meter and roll chart. Roll chart lists over 1600 types. Power requirements: 105-125 volts 50-60HZ, 40-70 watts. Complete with leads and instructions. Size: 16¾Hx18⅜Wx7½"D. Shpg. wt., 27 lbs.

62F198. NET........ **475.00**

AM-FM SWEEP AND MARKER GENERATOR



Model 288AX. Provides the necessary signal voltages for servicing AM and FM receivers as well as TV receivers. A crystal controlled 100khz and 1000khz oscillator provides an accurate frequency standard. A wide choice of frequency ranges, sweep widths and methods of modulation. High output voltage permits visual stage by stage alignment of IF stages, limiter, and discriminator on both AM and FM receivers. Self contained decibel meter —10 to +38 db. Sweep synchronizing voltage is brought out to front panel. Output control; vernier control w/decade steps of 1, 10, 100. Pwr. requirements: AC 110v, 50-70 hz. Complete w/crystal, cable assm., meter leads, instruction book, 16x13x7". Wt., 33 lbs.

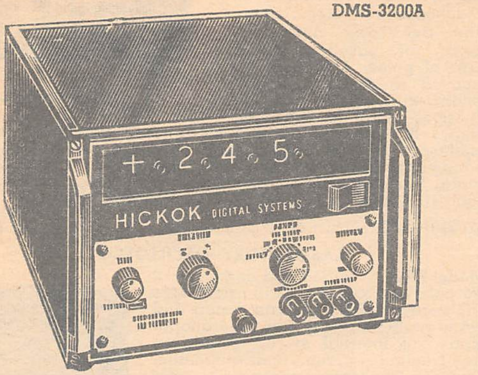
HICKOK Digital Test Equipment

FULLY SOLID STATE TRANSISTORIZED DIGITAL MEASURING SYSTEM

DMS-3200A



SHOWN WITH DP-100 DC VOLTMETER

MAIN FRAME

Model DMS-3200A. Main Frame contains digital display system power supplies for frame circuitry and plug-in units. Access port for plug-ins of DP series. Three-digit display makes maximum use of accuracy capability of analog-to digital converts in the system. Counter has response of 5 MHz, assuring reliable count and read-out of input pulse trains. Critical voltages zener-regulated. Combination of die-cast front and rear panels along with heavy duty aluminum sides provides lightweight housing. Top and bottom sections can be removed for access to components circuit board. Size: (HWD) 6⅞x9⅝x 12⅞". Wt., 10 lbs.

62F1761. NET.. **375.00**

Model DMS-3200P. Same features as the DMS-3200A plus, non-blinking display through use of buffer-storage circuitry. 10 line decimal data provided with decimal location, polarity, wrong polarity indication, over-range indication and print command data.

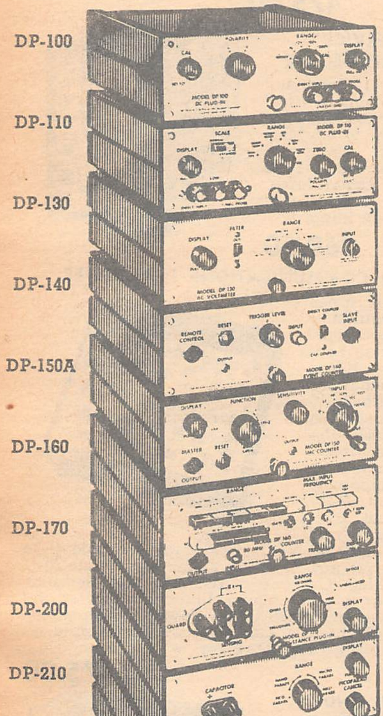
62F1550. NET.. **465.00**

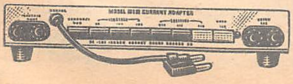
PLUG-IN MODULES

Model DP-100. Voltmeter plug-in provides digital display of DC voltage from 0.1 millivolt to 1000 volts when used with DMS-3200A Main Frame. Accuracy specification of ±0.1% F. S. No loss in accuracy for up to 60% over range. Five ranges: 0.00 to 9.99 millivolts; .000 to .999 volts; 0.00 to 9.99 volts; 00.0 to 99.9 volts; 000.0 to 999 volts. Excellent AC rejection for accurate and rapid 100 millisecond reading time. Photo chopper stabilization assures no drift or zero offset. Size: 3"H x 8¼"W x 10⅛"D Shpg. Wt. 3½ lbs.

62F1762. NET.. **475.00**

- **Add plug-in modules for variety of applications**
- **Slips into main frame for one unit convenience**





Type DP110 DC Plug In Microvoltmeter. Used with Hickock DMS Frame. Digital display of DC voltages, from 1 microvolt to 1000 volts. Accuracy ±.05% of ±1 digit. Resolution: .01% of reading (using 1000% overrange capability.) Floating input circuitry, Automatic polarity, Full data display, High AC rejection, and over-load protection. Wt. 4¾ lbs. Size same as above.

62F2125. NET.. **475.00**

Type DP130 AC plug-in voltmeter. Used with the DMS 3200A, or 3200P frame. AC voltages from 10 microvolts to 1000 volts in six ranges. Input circuitry is protected by high voltage and built-in filter, front panel switch provides noise rejection in low frequency measurements. Range frequency: 22 Hz. to 1.0 MHz. Accuracy: ±0.1% of reading ±1 digit. Wt. 3¼ lbs. Size same as above.

62F2116. NET.. **395.00**

Model DP-140. Event counter and slave plug-in unit, the DP-140/DMS-3200A permits display of a totalized count of events in production counting applications. Random events can be converted to pulses and counted and displayed with system. As a slave plug-in, a multi-pin connector on the panel of the DP-140 permits it to be driven from a DMS-3200A/DP-150A combination. When operated in this way, decimal point location is automatically positioned and readout is directly in hz and Khz. Sensitivity: 100mv minimum. Includes an interconnection cable. Size: same as ,above. Weight: 2¾ lbs.

62F1766. NET.. **100.00**

Model DP-150A. 1 Mhz Counter plug-in. Provides a digital display of frequency and period measurements when used with DMS-3200A Main Frame. Sine waves, square waves, pulses, or other complex waveforms, with frequencies of 00.1 hz up to 1.0 Mhz and periods of 0.1 msec. to 999 sec. may be measured thru infinite scaling. Overrange capability allows up to 7-digit resolution, slave output also permits use with a second Main Frame/DP 140 Slave Plug-in combination to provide full 6-digit simultaneous display. Provisions for event totalizing and manual reset. Input 10mv Rms 1 megohn shunted with 40 pf, overload protected. Has 10mv Rms. internal check at 1 hz, 1Khz, 100Khz. Incorporated I'Cs and descreet components. Accuracy: ±.005% ±.0005% Size same as above Wt. 3½ lbs.

62F1763. NET.. **255.00**

Type Dp-160. 80 MHz Counter used with DMS 3200A or 3200P Main Frame. Front switch permits readout of any 3-digit sector of 7-digit input signal being measured. Signal attenuator is provided to minimize overloading. AC or DC coupling in selector switch. Built in self test provisions. Indicator lamps simplify trigger level adjustment.
Range: 00.1 Hz to 80.0 MHz, Accuracy ±0.00005% of reading ±1 digit, Sensitivity: 20.0 Mv., Resolutions: up to 7 digits. Size same as above Wt. 3 lbs.

62F2127. NET.. **395.00**

Model DP-170. Ohmmeter Plug-in, when used with the DMS-3200A Main Frame, provides digital display of resistance measurements from .001 ohms to 1,000 megohms in 10 ranges. Accuracy 0.1%. Four terminals are provided so that lead resistance does not cause inaccuracies on extremely low measurements. In addition a guard terminal is provided so that spurious leakages in components are automatically balanced out. Size and weight same as DP-100.

62F1764. NET.. **295.00**

Model DP-200. Capacity meter plug-in when used with the DMS-3200A Main Frame; provides digital display of capacity measurements from 1 pf to 9,999 mf. In eight ranges. No loss in accuracy for up to 40% overrange. Accuracy 0.1%. Size and weight same as above.

62F1765. NET.. **295.00**

Type DP 210 Time Interval Meter. Provides digital display of time interval or period measurements from 10 microseconds to 999 seconds with accuracy of ±.0005% of reading ±1 digit. Input impedance: 1 megohm shunted by 20 pf. High input sensitivity: measures signals as low as 20.0 millivolts rms (0 to peak—30 millivolts.) small size - 3"x8¼"x10⅛" (HWO). Wt. 3 lbs.

62F2128. NET.. **295.00**

Model D310 Current Adapter. Provides digital display of DC current measurements from 0.1 naopmpere to 10 amperes, with an accuracy of ±0.15% of reading ±1 digit, and resolution up to four full digits. Floating input: 10,000 megohms isolation between input ground and chassis ground or power line ground. Ground to chassis break-input down voltage protection. 3000 volt range: .0001 microamps (0.1 nanamp) to 9.99 amperes. Sizes: 1 5/16"x⅝"x11½. Wt. 3½ lbs.

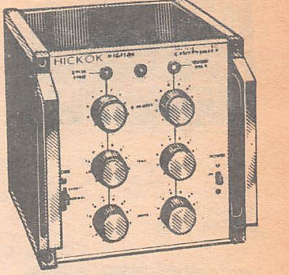
62F2129. NET.. **100.00**

• NEW DIGITAL SET POINT CONTROLLER

- **Addition of PR 4900 Digital Printer to DMS 1050 combination offers simultaneous data print-out capability.**

Model DMS 1050. When used with Hickok DMS3200 Digital Measuring System, can start and/or stop operation of any peripheal function at pre-determined measurement values. Operator sets front panel knobs to last number in "accept" range. Automatically, thereafter, any measurement which falls above or below upper and lower-set point numbers will activate a relay. Front-panel tally lights indicate corresponding contact closure, giving operator visual indication of whether measurements are falling within accepted band. Can be used with any device which provides ten-line decimal data outputs. Two controllers may be used in tandem to extend normal three-digit control to six-digits. Response is adequate to permit operation with nearly all nominal measurements of DMS Digital Measuring System. The only limitation occurs in frequency measurements where 1MHz response when operated as a 3 digit controller, 100 kHz response when two units are used as a 6 digit controller. Data input; Parallel Entry, Positive Logic. "O" state from 0 to +0.4v. "I" state greater than +0.9v but less than 4.0v. Nominal source requirement 1v at 200 microamps. Low power consumption —2 watts. Operates from either 115v or 220v power source, 47 to 400 Hz. All solid state design for long-term reliability, 6½" wide and 6⅞" high. Wt., 6¼ pounds.

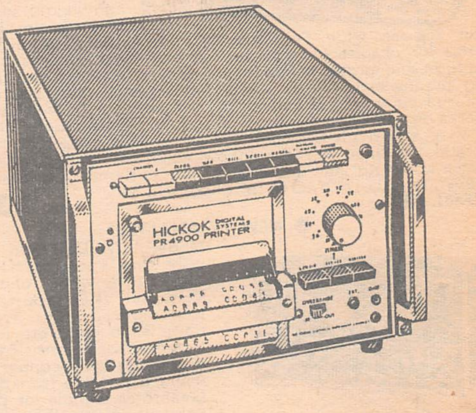
62F2130. NET **295.00**



MODEL PR 4900 IC DIGITAL PRINTER

Model PR 4900. Digital Printer provides print-out of up to 10 columns of digital information from one or two independent sources. The printer is complete with integrated circuit, all solid state electronics permitting it to operate directly from low-voltage, low-level logic outputs. Both circuit boards and print wheel mechanisms are in modular plug-in form, thus providing the user with a variety of column, channel, and input code operations. Inputs may be taken from Two independent sources simultaneously or singly as preselected by a front panel push-button switch. The print command is also selected by the operator, permitting him to choose print command as external, manual automatic or at calibrated time intervals. Maximum print rate from external command pulses is one line per second. By adding the appropriate decoding board, BCD 1248 or 1224 codes may be used to drive the unit. Print is either by pressure sensitive paper, or by inked impression on standard paper. A replaceable ink cartridge provides 250,000 lines of printing on standard 3½" adding machine type paper rolls. The printing mechanism slides out from the front of the unit to permit changing of paper rolls and ink cartridges with ease. The PR 4900 Digital Printer is electrically compatible with the DMS 3200P Main Frame component of HICKOK'S DMS-3200A Digital Measuring System. Therefore the two units can simply be connected by a standard P300-3 cable to make the combination operational. A "P" type DMS Main Frame must be used since only that model supplies printer outputs.

• MAY BE USED WITH ANY DEVICE WHICH PROVIDES TEN-LINE DECIMAL OR BCD CODED DATA OUTPUTS



SPECIFICATIONS AND FEATURES

- gives 4-digit print-out of DMS System thru printout of "overrange" or "overspill" digit.
- also useable with other sources having digital outputs; input logic level compatible with those of many commonly used test instruments of other manufacturers.
- accuracy identical to input device used.
- eliminates need for a second printer—prints data from two independent sources simultaneously.
- operator can select print command source from front panel
  "AUTO"—prints each time source takes a reading
  "TIMER"—prints on a preset time interval basis
  "EXTERNAL"—printing actuated by remote control pulse
  "MANUAL"—prints each time button is pressed.
- single channel units easily changed to dual channel units in the field through the use of plug-in additions.
- easily read printed characters .10" wide x .16" high.
- pressure sensitive paper option permits printing without ink.
- "slide-out" printer mechanism makes paper and ink replacement a simple, front-panel task.
- low-voltage, low-power data inputs permit operation directly from standard logic circuitry; data input—parallel entry, 10 line decimal (or BCD with decode board), positive logic "0" state must be less than +0.4 V and greater than —4.0 V "1" state must be greater than +0.9 V but less than +4.0 V. Nominal source requirement 1V at 200μA. Print Command: activated on positive going portion of +2.0V or —4.0V pulse. Minimum rise time (positive going portion) 10V/usec.
- data source inhibited during print cycle, 1.5V holdoff signal.
- rapid transfer time—17 miliseconds.
- small size: 9 ⅝"W x 6⅞"H x 14⅜"D, incl. handles and feet.
- lightweight, only 21 pounds.
- low power requirements—115/230 VAC ±10% 50/60 Hz, 35 watts.

MODELS AND ACCESSORIES

Model PR 4900-04. SINGLE CHANNEL INPUT, 4-COLUMN PRINTER. Three columns of digit data and one column of code data (polarity, overrange, and decimal point location). 10 line decimal input to digit columns, code input to code columns. Less ink, paper, and connecting cable.
62F1551. NET **760.00**

Model PR 4900-05. Same as above but with additional digit column (prints "overspill" of fourth digit).
62F1552. NET **870.00**

Model PR 4900-44. Same as PR 4900-04 but with dual channel input capacity. Two sets of 4-column printout from 2 independent sources
62F1553. NET **1040.00**

Model PR 4900-55. Dual channel input, dual 5 column printer. A dual channel version of model PR 4900-05.
62F1554. NET **1290.00**

Model P 100. Fourth digit plug-in assembly. Use to field convert PR 4900-04 to PR 4900-05.
62F1555. NET **130.00**

Model P-104. Second channel plug-in assembly. 4-column, use to field convert PR 4900-04 to PR 4900-44.
62F1556. NET **300.00**

Model P 105. Second channel plug-in assembly, 5-column, use to convert PR 4900-05 to PR 4900-55.
62F1557. NET **440.00**

Model P 220. Decode board plug-in. Use to convert any PR 4900 Printer to accept BCD 1248 code inputs instead of ten-line decimal. (Four column printers will give 3-digit print-out. Five column printers will give 4-digit printout. Code columns require separate input signal coding.
62F1561. NET **140.00**

Model P 230. BCD 1224 decode board plug-in. Same as P 220 but for use with 1224 code.
62F1562. NET **150.00**

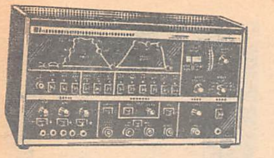
Model P 300-3. Interconnecting cable, 3 foot. Cable with connectors used to connect PR 4900 printer with DMS Digital Measuring System main frame.
62F1558. NET **35.00**

Type P 401. Ink cartridge.
62F1559. NET **10.50**

Type P 402. Print-Out paper, (ink imprint), roll.
62F1560. NET **1.00**

B&K Test Equipment

● *NEW* SOLID SWEEP/MARKER GENERATOR



Model 415. 15,750 hz filter enables user to view I-F and chroma response curves without disabling the horizontal output stage of a receiver under test. This can be done with a minimum of horizontal frequency "grass" superimposed on the oscilloscope patterns. Unity gain through instrument into oscilloscope to eliminate intermediate steps for calibration purposes. Built-in low frequency compensation to eliminate pattern errors resulting from use of an oscilloscope with poor low-frequency response. Sweep freq. rate 60/sec.

62F566. NET **349.95**

COLOR GENERATOR

Model 1245. For quick and easy checking and adjustment of: convergence, demodulator alignment, color sync, color fit, horizontal and vertical size, linearity and overscan. Small, lightweight solidstate. Dots only one raster line high and .25μ sec. wide. Free of retrace lines. Station quality waveforms for obsolescence protection and least convergence time through minimizing needs for brightness, contrast and fine tuning readjustment. Precise waveforms permit accurately setting color of killer control without a B&W telecast. Built-in gun killer works on any picture tube. Output is at RF with more than 5,000 μ V of signal on Channel 3, 4 or 5. This generator provides crystal-controlled keyed rainbow color bar display; dot cross-hatch horizontal line and vertical line patterns. Size 2⅞" x 8½" x 8⅞". For 105-125 VAC 60 Hz. Shpg. wt., 3 lbs.

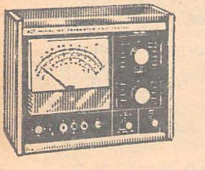
62F561. NET **139.95**

● *NEW* TV ANALYST

Model 1077. Designed to simplify and speed servicing of black and white and color, VHF and UHF, tube type and transistorized TV receivers. Supplies a complete test pattern or other patterns by means of a flying spot scanner system using a positive transparency. Generates signals for point-to-point signal injection anywhere in a TV receiver. RF outputs at all UHF channels-VHF channels-plus IF 20-48 Mhz. Outputs at 4.5 Mhz with 1000 hz audio for TV sound analyzing. Outputs for sync, video, chroma, and audio. Provides low impedance output for analyzing transistorized as well as tube type receivers. Low impedance calibrated bias supply. Horizontal and vertical signals. Weight approximately 30 pounds.

62F555. NET **379.95**

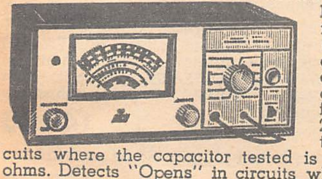
● *NEW* DYNAMIC TRANSISTOR/FET TESTER



Model 162. Tests transistors and FET's in and out of circuit. Provides three transistor leakage tests for the purpose of discovering failures not found in other transistor testers. Simplified test procedure in testing transistors in and out of circuit. High sensitivity meter for accurate leakage tests. Collector current: 100 microamps to 1 ampere in steps of 10. Collector voltage: constant 1½ volts. Beta 1 to 50 and 10 to 500. Leakage: 5 ranges in steps of 10. GM: 0 to 50,000 microhms. (Readings to 5000.) Leakage: 5 ranges in steps of 10. GM: 0 to 50,000 microhms. Wt. 6 lbs. 12 oz. with batteries.

62F597. NET **99.95**

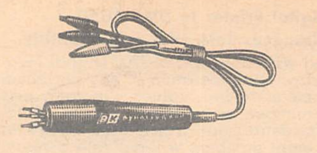
B & K CAPACITOR ANALYST



Model 801. Measures capacitance and leakage resistance both in-circuit and out-of-circuit. Designed to operate on 105-125 volts 60 cycle AC, but will operate from 90 to 140VAC after a 2 min. warm-up. Can detect "shorts" in normal circuits where the capacitor tested is shunted by more than 25 ohms. Detects "Opens" in circuits where the capacitor tested is more than 25 pfd or shunting resistance is more than 50 ohms. Unique circuit determines how capacitor stores energy and returns it to the circuit. Spots marginal electrolytics that need replacement and predicts the life expectancy of electrolytic capacitor of 3 volts or more. Meter movement is protected against overloads. Easy to test low-voltage transistor circuit capacitors as well as those in vacuum-tube circuits. Electrolytic tests up to 2000 mfd, using a balanced bridge. One knob makes it easy to select the desired function and range. Simplified internal design, easily portable. Size: 5½"x12¾"x6¾". Weight, 8¾ lbs.

62F588. Model 801. NET **109.95**

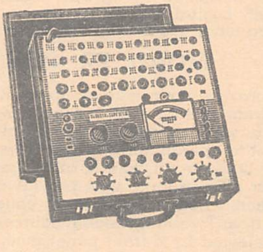
● *NEW* DYNA-FLEX 3-POINT PROBE



Model FP-3. First practical way to test transistors, diodes, IC's and other compact components mounted on printed circuit boards. Makes positive, non-slip contact with three termination points at one time with one hand. Each needle point tip is spring loaded, and automatically adjusts to any spacing from 1/32" to 5/8". Point probes resistance less than .005 ohm.

62F567. NET **12.95**

DYNAMIC MUTUAL CONDUCTANCE TUBE TESTER



- Multiple socket selection
- Simplified switch selection

Model 707. Provides multiple socket selection to quick check most TV and radio tubes. Simplified switch selection. Includes provisions for future new sockets. Tests all types of tubes. Automatic compensation for line voltage variation. 4½" meter with "Replace-Good" scale. Lists common tube types on socket panel. Complete reference chart in cover. 7, 9, and 10 pin straighteners on panel. Checks each section of multi-section tubes separately. Tests for all shorts, grid emission, leakage and gas. Grid emission test is adjustable, with sensitivity to over 100 megohms. Makes quick "life" test. Professional, dynamic mutual conductance tube tester that combines multiple-socket speed with high Gm accuracy. Size: 16⅛" x 15¾" x 5⅞". For 105-125 V., 50-60 Hz. A.C. Shpg. wt., 15½ lbs.

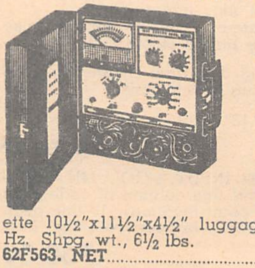
62F589 .... **199.95**

DYNA-JET TUBE TESTER

Model 606. This multiple socket design has reduced the number of settings for testing each tube from 17 required in many other types of testers to only 4. You can test for all shorts, grid emissions, leakage and gas; and check cathode emission the accurate way—under simulated load conditions! With the really portable Model 606, you won't reject the good tubes, and you'll quickly find the bad ones, reducing call backs, selling more tubes, and increasing service profit. You'll find "tough dogs" and weak tubes with the exclusive adjustable grid emission test, which has the sensitivity of over 100 megohms. Molded tube sockets have phosphor bronze contacts for long, trouble-free life. Simplified heater voltage setting with power-on indicator. Each section of a multiple section tube is checked. Size 11" x 8½" x 4⅞". Operates from 105-125v., 50-60 Hz. A.C. Shipping wt. 8 lbs.

62F562. NET **84.95**

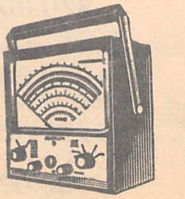
CRT TESTER AND REJUVENATOR



Model 465. Tests and rejuvenates black & white and color TV picture tubes without removing tube from set. Provides correct filament voltage (0-13 v.) for all tubes. Tests and rejuvenates all hi G-2 and low G-2 tubes including those requiring a G-2 voltage as low as 25 volts. Tests new rectangular color tubes. Corrects each color gun separately. Uses DC on all tests. 4½" meter and neon bulb indicators for easy reading. Leatherette 10½"x11½"x4½" luggage type case. For 117 VAC, 50/60 Hz. Shpg. wt., 6½ lbs.

62F563. NET **94.95**

"PROFESSIONAL" VTVM

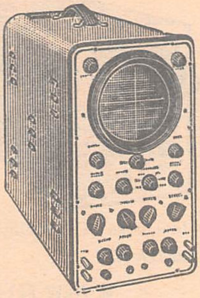


Model 177. DC Volts: ±0-0.5, 1.5, 5, 15, 50, 500, 1500. AC Volts: (RMS) 0-0.5, 1.5, 5, 15, 50, 150, 500, 1500. AC Volts: (peak-to-peak) 0-4, 14, 40, 140, 400, 1400, 4000. Response: ±1db, 40 Hz to 3 mHz. Resistance: Full Scale: 1K, 10K, 100K ohms; 1, 10, 100, 1K, 10K, 100K megohms. Mid-scale: 10, 100, 1K ohms; 1, 10 megohms. Input Resistance: 11 meg (1 meg in probe). Accuracy: ±3% full scale DC, & 5% full scale AC. Zero center scale. Single AC/OHMS/DC test probe with switch and ground lead. VTVM has metal case and carrying case with handle. Operates on 117V 50/60 Hz. Size: 7⅛ x 7¼" x 3⅝". Shpg. wt., 7 lbs.

62F598. NET **84.95**

PRECISION APPARATUS

WIDE BAND OSCILLOSCOPE



Model ES-550B. For general purpose use for lab., schools, production line, and service shop; for color and b&w TV servicing. For multiplex alignment and solid state and vacuum tube equipment. Has 5mc wide vertical frequency response and 5" scope screen, 3-position vertical & horizontal step attenuator, freq. compensated: x100, x10, x1., response: 10 Hz. to 5 MHz. 3000-V. intensifier anode potential: amplified Auto-Sync Circuit. Four-way sync selection (internal neg., internal pos., external, and line) Direct-reading P-P voltage calibrator permits oscilloscope tube used as vacuum-tube voltmeter. Vertical pattern reversing switch, linear multi-vibrator sweep circuit 10 Hz to 100 kHz; automatically synchronized 30 Hz & 7875 Hz. sweep for TV sync-pulse analysis; amplified sweep retrace blanking. Built-in 60 Hz. phasing & blanking controls. Vertical sensitivity: 10 mv RMS for 1" display. Power input: 117 VAC 60 Hz standard; High contrast filter-type illuminated graticule. Dimensions: 18½" x14½"x8¼". Shipping weight 47 lbs.

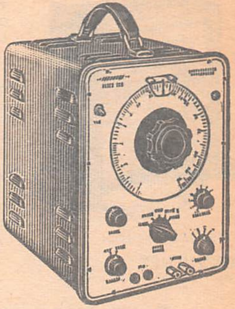
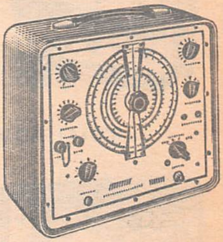
WIDE RANGE SINE AND SQUARE-WAVE GENERATOR



Model E-310. Used for amplifiers, PA, transmitter modulation response tests, input and output impedance measurements, ultrasonic voltage source, and loudspeaker resonance tests. All tubes pre-aged to assure long term stability of calibration. Logarithmic, etched dial scale with Vernier and Fast tune dials provides accurate resetability. Frequency Range: Sine and square waves from 5 Hz to 600 kHz in 5 decimal bands. Output Level: Sine Wave, 10 V. RMS into 600 ohms; Square Wave, 10 V. P-P, 4 position step attenuator and continuous amplitude control. Calibration Accuracy: ±2% or 1 Hz. Distortion: Less than 1% from 5 kHz to 600 kHz. Supply Voltage: 117 VAC 50/60 Hz standard; 220 V. AC 50-60 Hz. available. Heavy-gauge, steel case, blue-grey ripple and aluminum panel and tuning dial. 11½"x9"x11¼". Ship. wt. 24 lbs.

63F065. NET **199.95**

MULTI-BAND SIGNAL MARKING GENERATOR



Model E-200C. Exceptionally stable and accurate, this general purpose RF signal generator serves in conjunction with PRECISION Sweep Signal Generators or other similar sweep signal generators. Frequency coverage: 88 kc to 440 mc (to 110 mc on fundamental). 6½" brushed aluminum dial: direct reading in 10 bands up to 440 mc —1% accuracy. 0-1000 point vernier scale: direct reading to 1 part in 1000 for hand-calibration & frequency spotting. Circuit: 6AU6 in stable ECO circuit; 6U8 sine-wave audio oscillator-modulator; 5Y3 full wave rectifier. 400-cycle sine wave audio oscillator. Dual-shielded RF attenuators. Four types of signals: Unmodulated RF; 400 cps; Modulated RF; Externally modulated RF; 400 cps audio output. Bulit-in AVC-AGC bias substitution. 117V AC. 50/60 Hz. 13"x 11½"x6⅝". Weight: 16 lbs.

63F066 NET **149.95**

VOLT-OHM-MILLIAMMETER

Model 120. For general use in schools, laboratories, production lines, and radio-TV and appliance service-shops. Has 61 ranges (+ & —) Extra-high 6000 V. range, Extra-low ohms, current and voltage range, Mirrored, No-Parallax scale standard without extra cost. Transit meter movement protection Polarity reversing switch. DC V. (20,000 ohms/V.) 0-0.3, 1.2, 3, 12, 60, 300, 600, 1200. 6000. AC V. (5,000 ohms/V.) 0-1.2, 3, 12, 60, 300, 600, 1200, 6000. AC Output Ranges: 0-1.2, 3, 12, 60, 300, 600 V. Complete with batteries, test leads and technical manual. 7"x 5⅜"x3⅛". Weight 4 lbs.

JAMES COMMERCIAL CHOPPER

Model C-1800. Commercial type chopper for modulating low level microvolt and millivolt signals. For use in DC amplifiers, recorders, experimental analog instrumentation and comparitors. Non-resonant reed assembly insures stable operation over environmental changes of temperature, vibration and shock experienced in test and control equipment. Its residual noise and drift have been minimized by careful material selection and advance techniques. Chopper is designed to maintain operational specifications with considerable driving frequency variations. SPDT with 150 ±15 degree closure. Drive is 6.3 volts RMS at 50-70 hz., octal base. Noise less than 8 mv. RMS into 1 megohm. Size 1½" dia by 2½".

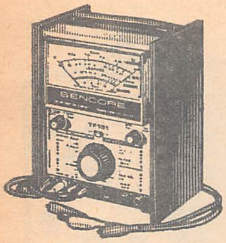
SENCORE Test Equipment

● NEW IN-OUT CIRCUIT TRANSISTOR AND FET TESTER



Model TF151. Checks transistors and FETs in or out of circuit with ease and accuracy. Checks transistors for AC beta from 1 to over 500. Three tests, low power, high power and special RF transistors. Icbo from 0 to 5000 microamps in one range. Checks FETs in or out of circuit for Gm from 0 to 50,000 Microhms. Gate leakage from 0 to 5000 microamps. Checks single and dual gates as well as MDSFETs. Special zero bias drain current test for matching of FETs. Large 6" meter, brushed chrome steel panel and vinyl clad steel case. Size: 9"x7½"x6", weighs 7½ lbs.

62F715 NET **129.50**

● NEW TF17 COMPACT IN OR OUT OF CIRCUIT TRANSISTOR & FET TESTOR

Model TF17. Versatile, reliable and compact to make field servicing on transistors and FET's a "snap." Electrically the same as the TF151, but mechanically designed for the man on the go. All steel Handi-Case that enables use anywhere. Wt. 7 lbs.

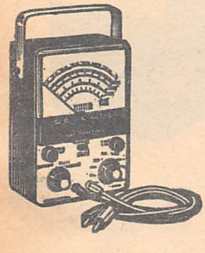
62F716. NET **109.50**

CG141 DELUXE COLOR GENERATOR

Model CG141. Provides all standard patterns, including RCA type, crosshatch, adjustable white dots and single cross for simplified static and dynamic convergence. Crystal controlled, 4.5 MHz, for fine tuning of sound carrier. "Temp Control" maintains a controled operating temperature, regardless of environmental temperature ."Snap Turner eliminates interference between channels and co-channels. Color gun interrupters on front panel. Positive and negative picture phase with 7 volts peak to peak. All steel, vinyl covered case. Size: 10"x9"x3½". Wt. 9 lbs.

62F746. NET **169.95**

FE14 FIELD EFFECT VOLT-OHM METER



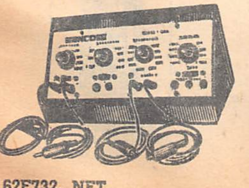
Featuers all of the advantages of a VTVM with the complete portability of a VOM. Input resistance: 15 megohms on DC and 10 megohms on AC. Current measurements up to one amp. Zero center scale as low as one half volt. Ranges: DC Volts: 0 to 1, 3, 10, 30, 100, 300, and 1000 full scale. AC Volts: (Rms) 0 to 1, 3, 10, 30, 100, 30,0 and 1000 full scale (Peak to Peak) 0-2.8, 8.4, 28, 84, 280, 840 and 2800 full scale. Ohms: 0-1000, 10K, 100K, 10 meg, and 1000 meg. D.C. current: 0-100ua, lma, 10ma, 100ma, and lamp. Mirrored scale. Unbreakable steel vinyl covered case with brushed chrome panel. Size: 7½x5¼x3¹⁄₁₆". Wt. 4 lbs.

62F1451. NET **69.95**

Model 39A19. High Voltage probe (for above) extends 300 Volt range to 30KV.

62F1456. NET **9.95**

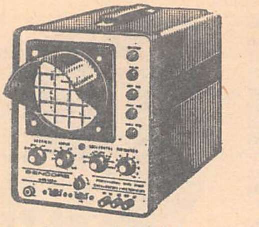
HANDY "75"



Model RC-146. Seventy-five frequently used values of carbon resistors, capacitors, electrolytics, power resistors, universal selenium and silicon rectifiers for fast on the spot substitution. Power resistors of 20 watts from 2.5 to 15,000 ohms and a .5 amp silicon and selenium rectifier. Size 10¼"x4"x4". Wt., 3½ lbs.

62F732. NET **49.95**

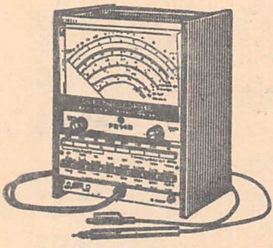
● NEW DELUXE 5" WIDE BAND OSCILLOSCOPE AND VECTORSCOPE



Model PS148. Wide band scope for general service and a vectorscope for color alignment. Service color with regular "S" or vector patterns. Band response of 5 Hz to 5.2 MHz at .017 volts RMS per inch. Direct reading peak to peak on front panel. Wide sweep ranges from 5 Hz to 500 KHz. Lo-cap probe, 27 megohm input shunted by 9 pf. Retrace blanking, var. sync, ext. sync and horiz. inputs for sweep alignment. Detachable viewing hood and graph screen. Chrome steel panel and steel case. 11"x9"x15½", wt. 22 lbs., 100 w.c. 115 VAC 60Hz.

62F717. NET **229.50**

● NEW FE149 SENIOR FIELD EFFECT METER



Model FE149. 15 megohm input impedance on AC and DC volts. Scale for 0 to .5 volts full scale to 1500 volts full scale in 8 ranges on AC and DC. Peak to peak on AC up to 4500 volts. Zero center ranges on DC from ±.25 volts to 750 volts. AC and DC current ranges from 150 microamps to 5 amps. DB in 10 db steps. Ranges to 6000 megs with 6 ohm center scale. Large 7" meter. Accuracy: 1.5% DC, 3% AC and DC current and 1.5 degrees of arc on ohms. Brushed Chrome steel panel with vinyl clad steel case. Operates on batteries (not supplied) or 115 VAC. Converts to 230 volts with internal x 7½" x 6", Shipping weight 6 lbs.

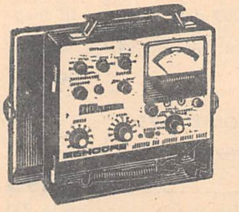
62F718. NET **149.50**

FS-134 FIELD STRENGTH METER

Completely transistorized, battery powered portable. Frequency of 50-110 MHz, 160-230 MHz, 460 MHz, 900 MHz (channel 2-channel 83), Input 75 ohms or 300 with built-in matching pad. Band width 500 KHz 4" logarithmic scale calibrated in 60 db range, 0-30,000 MV range. Controls include fine tuning, audio level, calibration uses standard "C" calls. Size 10 x 9 x 5". Shpg. wt., 9 lbs.

62F743. NET **229.50**

CR143 DELUXE CRT TESTER



Model CR143. Tracking check is computed right on the face of the meter. All standard tests, shorts, emission test with pure DC, and life test. Rejuvenation and shorts removeable is accomplished with automatic control. Three step rejuvenations. Line adjust provided. All controls calibrated in actual DC volts. Complete with chrome panel and rugged all steel vinyl case with spacious lead compartment. Size: 10x9x3½". Wt. 11 lbs.

62F422. NET **119.50**

TC154 MIGHTY MITE VI TUBE TESTER

Model TC 154. Solid state push button. Checks over 3000 tube types (including foreign, Novars, compactrons, Nuvistors, added socket for latest tubes) for gas condition and grid leakage up to 100 megohms. Also checks cathode current up to 150,000 ohms between all elements. Steel case, 10"x9"x3½". Wt. 9 lbs.

62F427. NET **89.50**

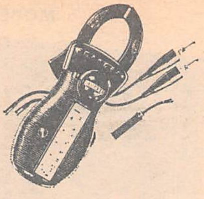
MODEL BE113 DUAL TV BIAS SUPPLY

Model BE113. Single or two separate 0 to 20 volts DC bias supplies without interaction. Well filtered; effectively pure DC with less than ¹⁄₁₀ of 1% ripple-calibration accuracy better than equivalent battery tolerance. Size: 4x2x2". Wt. 1 lb.

62F1452. NET **14.95**

Amprobe Test Equipment

AMPROBE SNAP-AROUND VOLT-AMP-OHMMETERS



One volt or amp range revealed in plastic window at one time. Rotary scale eliminates guesswork and reading errors. Currents may be measured instantly and accurately. Pointer-lock freezes needle at reading with flick of a switch. Take readings in darkness or hard to see areas and then read away from conductor. Valuable tool in balancing circuits, tracing faults and grounds, and diagnosing operating troubles without shutting down equipment.
Built-in 25 ohms mid scale ohmmeter on RS-3, RS-3A and RS-1000. Accuracy within ±3% FS. One hand operation. With VL-11 leads and "G" case. (*) With extended lead pack and "A" case.

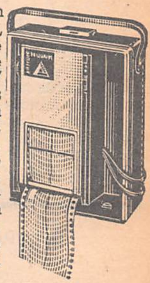
Model TM-63—Includes Model RS-3, VLK 311 "Extendo Leads", A45L energizer with pointer-lock that freezes pointer. Rotary scale with unbreakable magnifier reveals voltage or amperage at a glance. Impace resistant, light weight, with "A" case.

62F985. NET **69.85**

AMPROBE RECORDERS



Rugged, compact instruments in their own carrying case. Designed for high accuracy, dependability, and ease of operation. Small size and easy loading plus a unique design feature permits them to be used either as monitoring/recording devices or as indicating instruments making these recorders extremely versatile. Can be used as round the clock trouble shooters without the need for an operator to be present. Power requirements: 115VAC, 60 cycles, 2.5 watts. Accuracy: AC amps and volts ±3% FS; AC expanded scale volts ±1.25% FS; Temperature ±3°F on +20°F to +100°F; ±4°F on —50°F to +20°F; ±5°F on +50°F to 250°F. Chart Speed is 12"/hr. Supplied with 1 roll each of the necessary strip charts. Other chart speed available. Weight 20 oz.

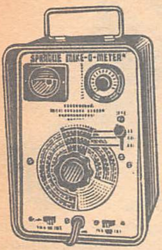
Test Equipment

SPRAGUE TEST EQUIPMENT

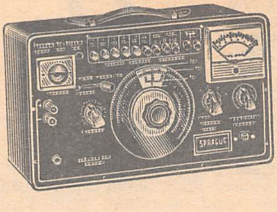
MODEL M-3 COMPACT CAPACITOR ANALYZER



Handy instrument outmodes troublesome methods of checking capacitors with ammeters, voltmeters, and wattmeters, and then referring to charts to establish results of different meter readings. A twist of the dial tells you whether capacitors are good or bad, giving you actual capacitance and power factor measurements by the accurate, Wein Bridge method. Safe operation assured by automatic discharge of capacitor when test switch is released. For use on 110-125 VAC, 50-60 hz. Rugged steel case finished in blue. Shpg. wt. 6 lbs.

62F628. NET.................................... **39.95**

MODEL TO-6 TEL-OHMIKE



Capacitor analyzer measuring up to 2000 mf in five overlapping ranges. 1.35 AC test voltage for use with capacitors in transistorized circuits. 10,000 Megohm at 30 volts for low-voltage check and 50,000 megohm at 150 volts for high voltage check. Electrolytics checked directly on 4-range Ma. scale (0-60 Ma) Magic eye tube for balancing. 3-ranges of DC polarization, variable to 600VDC. Instant discharge automatically protects the user. Charcoal-gray panel with white designations. 8⅞x14⅝x6⅛". 115VAC 50-60 Hz. Shpg. wt. 13 lbs.

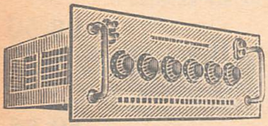
CLAROSTAT TEST EQUIPMENT

POWER RESISTOR RACK-MOUNTED DECADE



Model 250. Provides a power resistor of any required ohmage. From 1 ohm to 999,999 ohms in 1 ohm increments. Each decade value having a power rating of 225 watts max. or 1000 volts D.C. or 660 volts A.C. max. Used as standard resistances in active circuits or as a means of determining resistances and circuit under operating conditions. Ohmages selected by six front panel dials. Two sets of identical terminals, current and resistance terminals provide front and rear hook-up. Overall length, 19" long x 13¼" deep x 7" high. Weight, 18½ lbs. approximate.

99F1450. NET.................................... **157.50**

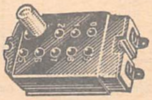
POWER RESISTOR DECADE

POWER RESISTOR

Model 240C. This handy power resistor box permits changing resistance values in a working circuit at the flip of a switch. Saves time and work in developing new circuits where some values are unknown. Ideal for checking voltage regulation of power supplies, since load can be varied over a wide range. Handles any value from 1 to 999,999 ohms, in steps of 1 ohm. Power rating is 225 watts. Maximum voltage should not exceed 1,000 VDC or 660 VAC. Housed in ventilated metal cabinet. Size: 13" x 8½" x 5¾". Shpg. wt. 11 lbs.

62F730. NET. **115.50**

PRECISION RESISTANCE DECADE BOX



Used whenever accurate steps of resistance values are required. Two-piece molded housing. Temp. coefficient less than 100 ppm. Temp. 40°C. at rated current. Accuracy 1% except 260-1 5%. Approx. shpg. wt. 3 oz. per individual unit.

MILLEN TEST EQUIPMENT

● *NEW* GRID DIP METER

Model 90651-A. Calibrated stable RF oscillator unit with a transistorized electronic voltmeter to indicate the amplitude of the output. Features a Transistor D.C. Amplifier, and Taut Band Meter. Amplifier is to increase sensitivity, reads frequencies from 1.7 to 300 MC. Taut Band Meter to eliminate an possibility of the meter becoming "sticky". Uses same stable oscillator as Model 90651 without spurious dips. Has a transformer-type power supply and seven coils protected by form fitting molded covers. Supplied complete in a convenient polypropylene carrying case, which keeps the coil/probes with the grid dip meter protected.

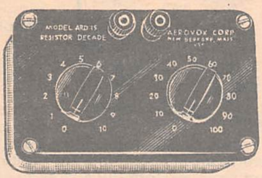
AEROVOX DECADE BOXES

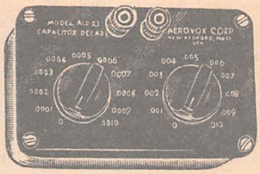
- Provide Accurate Standards of Resistance, Capacitance & Inductance

MODEL ALD-42
INDUCTANCE DECADE
HENRIES
AEROVOX CORP

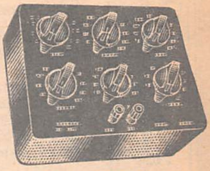
Type ALD-42



Type ARD-15



Type ACD-23



Type ARD-41

All units provide accurate standards of resistance, capacitance, and inductance. Ideal for laboratory and experimental use. Decade boxes of the highest quality are available in ranges most needed for electronic and electrical laboratories for a price below that of equivalent quality standards. Boxes are available in 11 units; 4 resistance decades, 3 capacitance decades, and 4 inductance decades. Face plates are black with white numerals for maximum legibility. Heavy duty construction of seamless, drawn steel and gray enamel housing insure trouble free operation and unimpaired accuracy. Resistance model **ARD-41** is housed in special high impact plastic case which is capable of rugged handling.

In "Use" column of the following table, C indicates the Capacitance Decade Box, L the Inductance Decade Box, and R the Resistance Decade Box. Except for ALD-42 the Capacitance Decade Boxes have operating ranges of 400 to 20,000 cps. ALD-42 has a range of 400 to 5,000 cps. The new decade box, ARD-41, has a range of 0 to 1.1 megohms in 1 ohm steps, combining all the three other resistance decades into one compact box. Multiple-dial Capacitance Decade Boxes have the highest value multiplier to the left so that readings are instantly visible.

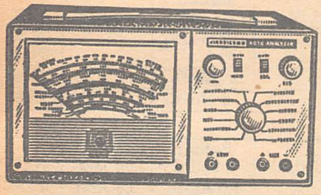
1171-K RESISTANCE DECADE BOX KIT

Permits changing resistance in a working circuit at the flip of a switch. May be used alone or in conjunction with the model 950-K RC bridge. Supplies resistance values from 0 to 99,999 ohms. Uses ½% resistors. Separate comparator position and binding posts permit instant substitution. Steel case, 3½x12x3". With diagrams, instructions and all parts; less solder and leads. Wt., 3 lbs.
62F795. Kit. NET **24.95**

Model 1171. As above but Factory wired.
62F802. NET **39.95**

888 SOLID STATE UNIVERSAL ENGINE ANALYZER KIT

• Tunes Up and Trouble-Shoots Any Car or Boat

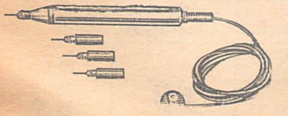


Totally portable, compactly self contained, self powered engine analyzer. Useful for all 6- or 12-volt; 4, 6, or 8 cylinder engine; negative or positive ground. Checks storage battery, generator, alternator, voltage regulator, alternator diodes, starter, starter solenoid, distributor, points, condenser, ignition coil, spark plugs, dwell angle, carburetor, all electrical wiring and accessories. Includes dwell angle meter function, tachometer function and voltmeter function with 2 accurate scales for 0-3.2 V and 0-16 V. Ammeter and ohmeter function are also offered. Requires 4 "D" batteries, a sturdy metal cabinet, and a "how to use" manual with both test and calibration leads. 5¾ x 11½ x 5". Weight 6 lbs.
62F902. Model 888K. Kit. **NET** **49.95**
62F903. Model 888. As above, factory wired & tested. **NET** **69.95**

● *NEW* HIGH VOLTAGE PROBE WITH BUILT-IN METER

Model HVP-5. Measurements up to 30,000 volts For performing checks on potentials of up to 30 kilovolts. Barriers are provided to isolate the high voltage tip from the probe handle and meter. Designed in a modern, attractive package. The light weight, compact construction makes it a must for the TV serviceman as well as for any other technician and engineer requiring accurate, rapid high voltage measurements.
62F991. NET **19.95**

● *NEW* SIGNAL TRACER PROBE



Model PST-2. Versatile, small flashlight-size. High gain amplifier with a useable low, mid-frequency bandwidth. Overload is avoided by use of two attenuator probe tips, one to reduce the gain by 20 db, the other as a 40 db attenuator. A sensitive plug earphone at the output of the amplifier is used to compare different signal levels, distortion, general quality of the equipment under test. Specifications: Gain: approx. 3000 at 1 kHz; Useable bandwidth: 50 Hz to 200 kHz (extended to 200 HMZ with demodulator tip supplied); Input Impedance: 3500-350,000 ohms. Power Supply: 1-Size AA battery; Size: 6⅜" x ⅝". Wt.: 2.2 oz.
62F992. Model PST-2. Wired. **NET** **29.95**

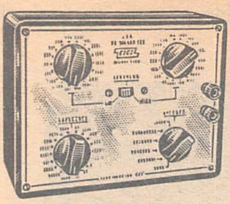
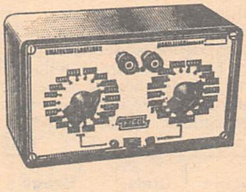
R-C COMBINATION BOX KIT



Model 1140-K. Combines Model 1100-K and Model 1120-K in one box for selection of either R alone, C alone, or series or parallel combinations of R and C (1350 combinations). Includes all EIA resistance values from 15 ohms to 10 megohms and all EIA capacitance values from .0001 to 0.22 mfd. Min. accuracy ±10%; resistors 1 watt carbon and capacitors silver-mica or molded / impregnated plastic, most rated at 600 volts. May be substituted in operating circuit to determine RC combination value, or just R or C value, needed for optimum performance. 5-way jack top binding posts. Satin-aluminum front panel. Shipping weight, 3 lbs.
62F860. NET **15.95**
62F861. Model 1140. Wired and tested. **NET** **24.95**

MODEL 1100-K EIA RESISTANCE SUBSTITUTION BOX KIT



Permits rapid substitution of a wide range of EIA resistance values in an operating circuit to determine the resistance required for best performance . . . determines the value of unmeasurable resistors. 36 EIA 1 watt, 10% resistors, arranged in Hi and Lo decades give resistance ranges of 15 ohms-10 megs in decade multiples of 15, 22, 33, 47, 68 and 100 ohms 5-way jack-top binding posts for connection of practically any type of test lead. Molded black bakelite cabinet with 2 color deep etched aluminum panel. With all parts, less solder and leads. Size 3¾x6½x3½". Wt., 2 lbs.
62F808. NET **9.95**
Model 1100W. As above but Factory wired.
62F807. NET **14.95**

1120K CAPACITOR SUBSTITUTION BOX

Enables rapid substitution of a wide range of RETMA capacitance values from .0001 to 0.22 mfd. in an operating circuit to determine value needed for optimum performance and to find value of badly damaged or illegible capacitors. Minimum accuracy 10%. Convenient 5-way, jack top binding posts. Size: 3¾" high x 6½" wide x 3½" deep. Shipping weight, 2 lbs. Less leads.

SOLID STATE ELECTRONIC KITS

Create with your own hands a wide variety of electronic devices. Easy to build electronic kits that require no technical knowledge or experience to enjoy building. All kits are completely professional. Only the complexity has been reduced. Kits feature: solid state circuitry, printed circuit boards and step by step instructions for easy assembly. Projects are expandable by adding kits together. Your imagination is the only limitation.

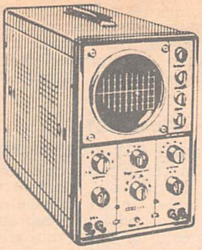
Test Equipment & Kits EICO®

• *NEW* MODEL 465 PROFESSIONAL OSCILLOSCOPE



DC-to- 8MHz (useable to 10MHz). High gain vertical and horizontal AC/DC-coupled amps. Flat-face 5" CRT reduces parallax. V/H amplifier sensitivity: .05 volt P-P/CM. (DC-to-8MHz, +1, —5db). Push-pull amplification minimizes distortion. Coupled design eliminates low-frequency phase shift. Zener-diode controlled voltage calibration source. Accelerating potential is 1400 V. Sweep range selection from 10 hz to 100 Khz in four overlapping ranges. Pre-set TV-V and TV-H sweep positions (30cps and 7875cps.) Vertical amplifier: Freq. from dc to 8MHz (+1 —5db). Horizontal amplifier: Frequency from DC to 1MHz, +1 —3db. Sweep ranges: 10 to 100, 100 to 1K, 1K to 10K, 10K to 100Kcps; TV-VERT position (30cps) and TV-HOR position (7875cps.) Intensity Modulation Input: 3Vrms; Imp. 2.2 megohms. Size: (HWD) 12¾ x 8½ x 17½. Shpg. wt. 27 lbs.

62F750. Model 465K. Kit. **NET** **179.95**

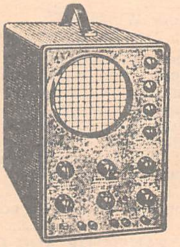
MODEL 427K GEN. PURPOSE 5" OSCILLOSCOPE KIT



The Model 427K gen. purpose oscilloscope; 4-position frequency compensated vertical input attentuator. Internal zener-diode calibration voltage. Astigmatism, Focus and Intensity Controls on panel. Sharp, clean trace free of blooming. Instantaneous, drift free V & H positioning. Vert. amp. direct-coupled and pushpull throughout (6 stages in 3-push-pull pairs). Vert. Amp: +1, —3db from DC to 500kc, —6db at 1 Mc; sensitivity 10my P-P or 3.5mv rms/cm. Horiz. Amp: +1, —3db from 2 cps to 450kc; sensitivity 0.5 v P-P or 0.18 v rms per cm. Sweep Circuit: Recurrent sweeps from 10 cps to 100 kc in 4 overlapping ranges: min ratio of forward sweep time to retrace time 15:1 sync may be int pos. int neg. 60 hz or ext. Power Req: 105-125 v 60 hz 55W drain. Dim: 12½x8½x16 7/16". Kit is complete with all parts instructions and diagrams. Shpg. wt. 23 lbs.

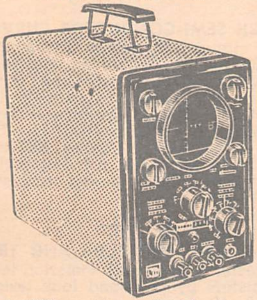
62F886 .Model 427. Factory wired and tested. **139.95**

MODEL 435K DC WIDEBAND 3" OSCILLOSCOPE KIT



Dc to 4.5Mc flat response for reproduction of 3.58 Mc. sync burst and oscillator signal in color television servicing. Distortionless V&H trace and retrace blanking. Directly coupled push-pull vertical amplifier, eliminating low frequency shift and distortion in wave forms. Zener diode control of square wave calibration. Sweep range 10 cps. to 100Kc. in four ranges with vernier adjustment. Automatic sync limiter and amplifier. V-amp +1 —3 db from Dc to 4.5 Mc response and 18Mv/Cm RMS (50MvP-P) sensitivity Input 1 megohm shunted by 35 pf Square wave 200 Mv P-P ±5%. Vert. attenuator 1, 10,100 and 1000 positions. 3V blanking at 2.2 megohms. Sawtooth output 10V at 10 to 100 Kc P-P Variable output impedance to 300 ohms. 9 tubes plus silicon diode and Zener diode with WX5013P1 3" anti-bloom CRT. 8½x 5¾x12⅝". Shpg. wt., 18 lbs. Model 435K.

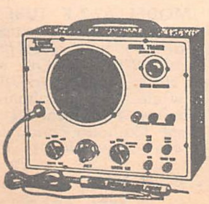
DELUXE MODEL 147 A-K MULTI-SIGNAL TRACER KIT

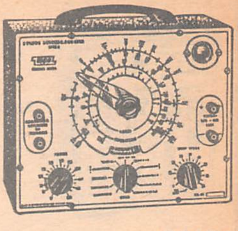


Transformer operated for isolation and safety. High gain RF and low gain audio with both visual and aural monitors, magic eye indicator and 5" PM speaker. Calibrated wattmeter circuit (fused) reveals abnormal total wattage consumption, open, or intermittent filament circuit, etc. Permits RF, IF and AF signal tracing in FM, AM and TV sets. Noise localizer circuit. Size 8x10x4¾". 105-125 volts AC, 50-60 hz., 40 watts. Kit. Complete with instructions. Shpg. wt. 10 lbs.

62F809. NET **34.95**

Model 147A As above, but factory wired and tested.
62F810. NET **49.95**

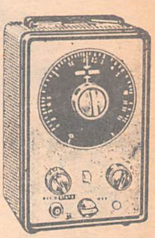
MODEL 950-K RC BRIDGE/R-C-L COMPARATOR KIT



Measures and tests all resistors from 0.5 ohm to 500 megohms, and all capacitors from 10 mmfd to 5000 mfd Comparator Range for comparison of resistance, capacitance and inductance with a complementary component as a standard; has wide range of 400:1. Has continuously variable 0-500 volts DC source for capacitor leakage testing. For 110 volts, 60 cycles AC. In rugged steel case; 10x8x4¾". With all parts; less solder and leads. Wt. 9 lbs.

62F794. NET **29.95**
62F799. Model 950. As above, wired and tested. **NET** **39.95**

MODEL 955K IN-CIRCUIT BRIDGE-TYPE CAPACITOR TESTER



Permits out-of-circuit or in-circuit short check with shunt res. as low as 1 ohm. Reliable up to 2000ut 60 hz test freq. Max. test volt 6.3 v AC (open leads), dec. with dec. imp. Open test of capacitors as small as 15 uuf with inst. adjusted normally. For in-circuit testing, shunt res. may be as low as 35 ohms for capacitors above 250mmf (7K ohm at 15uuf). Capacity Meas.: From 0.1 to 50uf ±10% accuracy at any point on the capacity dial in either in-circuit or out-of-circuit meas. Oper. freq. of the bridge is 60 hz. Line Voltage: 105 to 130 v. AC, 60 hz 8 w drain. Dim: 8½"x5¾x"x6". With instructions less solder. Shpg. wt., 6 lbs.

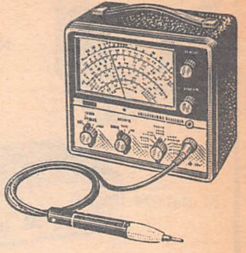
● *NEW* MODEL 242K SOLID STATE FET—VOLTMETER KIT



Single all-purpose DC/AC-ohms-ma Uni-Probe, high impedance input using FET., Peak-to-peak measurements of AC volts and milliamps on large 6½" meter. 7 non-skip ranges, in professional 10 dB steps and it is AC line or battery operated. The versatile Model 242 ohms-volts-milliameters is designed to be used in testing vacuum tube and semiconductor circuits. 1 volt scale on Model 242 allows accurate reading as low as 0.05 while giving good indications down to 0.01 volts.

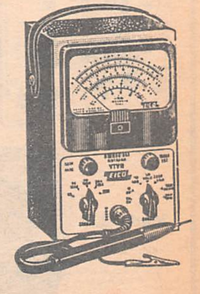
Direct reading may be made to 1000 volts.

Input impedance: DC - 11 megohms, AC - 1 megohm. Frequency response: 25 HZ to 2 MHZ (up to 250 MHZ + with PRF probe — not supplied) Power requirements: 105-132 volts AC or 3 NEDA #1604 — 9 volt batteries and 1-1.5 volt size D cell; 1.4 VA. Size: (HWD) 7½"x8½"x5"; Weight: 6 lbs.

62F926. NET **59.95**

62F927. Model 242. As above, but factory wired. **NET** **79.95**

MODEL 232-K PEAK-TO-PEAK VTVM KIT



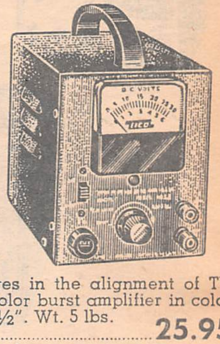
Features high circuit stability and accuracy. Uses 1% precision resistors throughout. Directly measures p-p voltage of complex and sine waves on scales of 0-4, 14, 42, 140, 420, 1,400 and 4,200 volts. Resis. ranges: 0-1,000 megs in 7 steps. 7 non-skip ranges on the 4 functions of: +DC volts, —DC volts, AC volts, Ohms. Frequency response: 30 Hz to 3 mc. Up to 250 mc with PRF-11 probe. DC-RMS sine voltage ranges: 0-1.5-5-15-50-150-500-1,500 volts. 4½" meter in a burnout-proof circuit. Zero center for TV-FM discriminator alignment. Input impedance 11 Megohms Calibrates without removal of cabinet. Complete with all parts, less solder. Compact in size: 8½x5x5". For 110-120 V. 50-60 Hz AC. Kit complete with instructions. Wt., 5 lbs. With Uni-Probe, ground lead and battery.

62F811. NET **34.95**

Model 232. As above but factory wired and tested. Ready to use.

62F812. NET **49.95**

MODEL 1020K POWER AND BIAS SUPPLY KIT



Power supply includes power transformer, full-wave silicon diode rectifier circuit, heavy R-C filtering, plus two power transistors in a unique cascaded filter circuit. Ripple is reduced to 1/200 of 1% at full load. Provides continuously variable output voltage to 30 volts monitored by a dual range voltmeter (0-6, 0-30 VDC). Max. load current varies from 150 ma. in the 1-12V range to 300 ma. in the 24-30V range. Uses include hum-free operation of sensitive transistor radios, hearing aids, preamp, instruments. As a variable bias supply for transistors or tubes in circuit development; to offset AVC and AGC voltages in the alignment of TV and radio receivers or to cut off the color burst amplifier in color TV adjustment. Grey case. Size: 5x4x5½". Wt. 5 lbs.

62F856. NET **25.95**

Model 1020. As above but Factory wired.

62F857. NET **34.95**

MODEL 536K 1000 OHMS/VOLT MULTIMETER KIT

1000 ohms/volt multimeter kit with extra-extended ranges from 0 to 1 volt up to 0-5000 volts, 31 different full scale ranges. AC-DC volts: 0 to 1, 5, 10, 50, 100, 500, 5000. DC current: 0-1 ma, 10 ma; 0.1 amp, 1 amp. Ohms: 0-5,000, 100,000, 1 meg. 6 db ranges: —20 to +69. Large 3" 400 μa meter movement. Low minimum battery-drain ohm ranges. Dual rectifier has separate low and high voltage calibration in AC ranges. High-impact bakelite case, 6¼x3¾x2¾". With instructions and battery less solder and leads. Shpg. wt. 3 lbs.

● *NEW* MODEL 385-K COLOR BAR GENERATOR KIT

5-function solid state color generator in tote-easy, battery portable/storage case. Color-coded socket-type gun killers, allow one color or any combination of colors to be eliminated from the display on the picture tube. Generates standard offset carrier type stable 10-bar display plus precision dots, crosshatch, and individual series of V&H lines. Low-drain operation on 6 "C" cells or with optional AC adapter/trickel charger. Clips directly to TV antena terminals. 2½"H., 8½"W., 8⅜"D. Wt. 7 lbs.

62F912. NET **79.95**
62F913. Model 385. Factory wired. **NET** **109.95**

● *NEW* MODEL 379-K SINE/SQUARE WAVE GENERATOR KIT

Designed as an oscillator capable of generating frequencies required in test of all audio and supersonic equip. Has low distortion sultzer feedback circuit using FET makes it especially suitable for checking High Fidelity amplifiers and transducers, and use in tests made on sonar apparatus. Covers 20 Hz to 2 MHz in five bands. Output voltage; sine wave —0-75 volts rms into high impedance output, 0-6.5 volts into 600 ohms; square wave-10 volts peak-to-peak into high impedance, pos. direction w/zero ground. Power requirements: 105-132 volts, 50/60 Hz AC, 10 VA watts. 7½"H., 8½"W., 8½"D. Wt. 9 lbs.

62F914. NET **54.95**
62F915. Model 379. Factory wired. **NET** **74.95**

MODEL 377-K AUDIO GENERATOR KIT

Sine wave coverage from 20-200,000 Hz in 4 ranges individually calibrated on panel. Complete square wave coverage from 60-50,000 Hz (5% round-off at 50 kc), read on same scales as sine wave. Response ±1.5 db from 60 Hz to 150 hz. Wien bridge-type oscillator for high power output. Continuously variable power output: 100 mw into rated load (10 volts across 1,000 ohm load). Rated load impedance. 1000 ohm resistance. Distortion only 1%. Hum less than 0.4% of output. All bridge resistors 1% accurate. Uses: 1-6X5, 1-6SJ7, 2-6K6, 1-6SN7, 105-125 v., 50-60 Hz. Calibration accuracy: ±3% or 1 cps. Aluminum panel, gray steel case, 11⅛x7⅝x7⅛". Shpg. wt., 13 lbs.

62F770. Model 377. Factory wired. **NET** **54.95**

324-K RF SIGNAL GENERATOR KIT

For IF-RF alignment signal tracing, trouble-shooting of AM, FM and TV. Marker generator for alignment of hi freq. TV IF's. Extended fundamental freq. range from 150 Mhz to 145 Mhz in 6 bands. 7th calibrated harmonic band from 111 to 435 Mhz. Colpits RF oscillator, directly plate-modulated by cathode follower. With all parts; full instructions. 8x10x4¾". 10 lbs.

62F838. NET **32.95**
62F839. Model 324. Factory wired. **NET** **44.95**

MODEL 369-K TV/FM SWEEP MARKER GENERATOR KIT

The EICO 369 feeds sweep signal only to i.f. strip being aligned. At the output end of the circuit a demodulator cable picks off the signal, demodulates it, and feeds the demodulated signal to a mixer stage inside the generator where the markers are added. It means that a TV technician can align TV and FM i.f. strips faster and more accurately. Five Ranges: 75-220 Mhz; 36-95 Mhz; 16-42 Mhz; 6-16 Mhz and 3-7.5 Mhz. All five ranges are fundamentals and tuning the desired frequency is simplified by a 6:1 vernier dial and a 330° scale. Output impedance is 50 ohms. A 6BQ7-A sweep oscillator and rf output cathode follower, a 12AT7 variable and crystal marker oscillator, a 12AX7 blanking diode and first agc amplifier, a 6DR7 second agc amplifier and agc series regulator. For 110-120v A.C. Shpg. wt. 18 lbs.

62F895. Model 369. Factory wired. **NET** **149.95**

MODEL 378K AUDIO GENERATOR KIT

Extreme versatility and positive error elimination are now yours for any application where a stable, accurate audio sine wave must be used. Precisely metered output controlled by 8 position decade and fine attenuators. Highly accurate, switch - selected frequencies from 1hz to 110 Khz in 1 hz steps. Positive setting detent switches need no interpretation. Frequencies accuracy: ±5%. Distortion less than 0.1% (20hz-20kc). Output voltage ranges: 0-3, 10v into hi-z (10k min.); 0-.003, .01, .03, .1, .3, 1V into ext. 6000load—or with int. load into ext. hi-z. Output meter accuracy ±5% of full scale. Power requriements: 120V, 50/60 hz, 40 Watts. Size: (HWD); 8½" x 12½" x 9". Weight, 16 pounds.

MODEL 1025 SOLID STATE POWER SUPPLY KIT

Model 1025 is completely transistorized, very low ripple, portable DC power. Monitored by a dual range voltmeter (0-6, 0-30 VDC), and 500 ma millampmeter. Maximum load current varies from 150 ma in the 0-12V range to 300 ma in the 24-30V range. Maximum ripple (120cps)at full load is only 0.005%. Fuse: ½ amp. will blow in case of short circuit to protect unit. Power Requirements: 117V, 60cps. Size: 3¾" h x 8"w x 4¾" d. Weight 5 lbs.

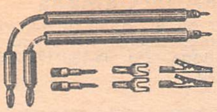
H. H. Smith Test Leads, Prods and Adapters

TEST LEAD KIT



Type 611. Kit supplied with one pair of test leads. One end test prods, other end ins. banana plugs. Needle tip prods. Fittings: Two each: phone tips, alligator clips, spade lugs.

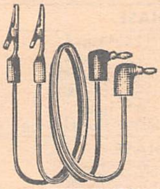
Stk. No.	Type	1-11	12-49
35F682	611	1.90	1.71

Type 610. 48" of 5000 volt heavy duty rubber covered test lead wire. Plastic handles with solderless prods. Other end supplied with standard #204 banana plugs which are interchangeable with the phone tips, alligator clips, or spade lugs which are supplied. Shpg. wt. 6 oz.

Stk. No.	Type	1-11	12-49
35F929	610	1.90	1.71

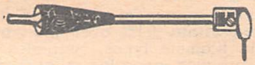
ALLIGATOR CLIP TEST LEAD

Type 647. Heavy duty lead wire with steel, cadmium plated clips. Clips have handles of molded Butyrate in red and black. Elbows are in corresponding red and black and of molded Thermosetting plastic. Safe and easy to use. Prices are per pair.



Stk. No.	Type	1-11	12-49
35F860	647	1.30	1.17

CROCODILE CLIP TEST LEAD

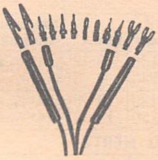


Model 675. Steel cadium plated clips. Boot is made of vinyl plastic. Has molded thermosetting, plastic elbow. Brass nickel-plated tip jack.

Stk. No.	Type	1-11	12-49
35F863	675-R	1.20	1.08
35F864	675-B	1.20	1.08

UNIVERSAL TEST LEADS

Type 699. Fifty leads in one! One lead can make any required test lead combination. All parts adapt into prod handle or tip handle. Shpg. wt., 3 oz.



Stk. No.	Type	1-11	12-49
35F887	699	3.00	2.70

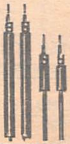
SOLDERLESS TIP TEST LEADS

Plastic handles colored red and black. 4" long, 3/8" diameter. Flexible kinkless rubber covered wire leads 50" long also colored red and black. Shpg. wt. 3 oz.

Stk. No.	Type	1-11	12-49
35F872	600	1.05	.95
35F873	601	1.05	.95
35F874	602	1.10	.97

SOLDERLESS TEST LEADS

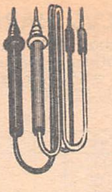
Type 603. The insulated handles and insulated plugs are both of the solderless type construction. Flexible kinkless rubber covered leads are 50" long. This type offers convenience at a low price, in addition to safety. Shpg. wt., 5 oz.



Stock No.	Type	1-11	12-49
35F936	603	1.35	1.21

HIGH TENSION TEST LEADS

Sturdy attractive test leads with heavy duty probes, and 48" of quality high tension kinkless test lead wire. Fibre handles. Test lead wire is heavy type with .248 outside diameter. Voltage breakdown is 22,000V. Shpg. wt., 3 oz.



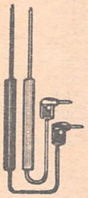
Type 620. With Phone Tips.

Type 622. With Alligator Clips.

Stk. No.	Type	1-11	12-49
35F928	620	2.20	1.98
35F941	622	2.40	2.16

METER TIP TEST LEAD

Test leads with 50" of rubber covered kinkless test lead wire. Molded plastic finger-grip tips on one end and 4" plastic test prod handles on other end. Supplied in two types: solderless tip or needle tip prod handles.



Stk. No.	Type	1-11	12-49
35F930	625	1.50	1.35
35F933	626	1.50	1.35

Type 685. Solderless prod with banana meter tip. Body of nickel plated brass. Price per pair.

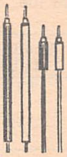
Stk. No.	Type	1-11	12-49
35F862	685	1.70	1.53

Type 698. Long slim probes, fully insulated with vinyl tubing to prevent shock or shorting. Perfect for those hard to get at spots. Supplied with molded meter tip ends and 50" rubber coated kinkless lead wire. Shpg. wt., 5 oz.

Stk. No.	Type	1-11	12-49
35F934	698	1.35	1.21

SLIM HANDLE TEST LEADS

Type 670. Slim red and black tenite handles only 5/16" O.D. with solder type phone tips on other end. Flexible, kinkless rubber covered wire 50" long.



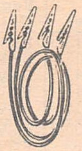
Stock No.	Type	1-11	12-49
35F937	670	.85	.76

Type 678. Fibre handles colored red and black with O.D. only 1/4", with insulated tips. Flexible, kinkless rubber covered wire only 50" long. Threaded phone tips. Perfect for testing in cramped space. Shpg. wt., 4 oz.

Stk. No.	Type	1-11	12-49
35F938	678	1.26	1.13

ALLIGATOR CLIP TEST LEAD PAIR

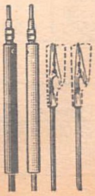
Heavy duty test lead wire with Cadmium plated steel alligator clips on both ends. Prices are per pair. Average shpg. wt. 4 oz.



Stk. No.	Type	Length	1-11	12-49
35F942	604	12"	.72	.65
35F943	605	24"	.75	.67
35F944	606	36"	.78	.70
35F945	607	48"	.81	.73

ALLIGATOR CLIP TEST LEADS

Type 672. Heavy duty test leads with steel, cadmium plated clips. Lead comes in re-usable clear plastic hinged box and with 50 in. of extra-flexible rubber-covered kinkless wire. Prices are per pair.



Stk. No.	Type	1-11	12-49
35F861	672	1.26	1.13

HEAVY DUTY TEST PRODS

Model 329. A threaded type prod with a large diameter well to enable soldering of heavy duty wire directly into plug. Body is nickel plated brass. Handle is 5½" machined plastic. Overall size is 6 11/16". Shipping weight 4 oz. **Model 319.** The handle is made of 4" molded plastic. The overall size is 5 3/16". Shipping wt. 3 oz.

Stk. No.	Type	1-24	25-44
35F908	319R	.30	.29
35F909	319B	.30	.29
35F842	329R	.33	.31
35F843	329B	.33	.31

SOLDERLESS TEST PROD— THREADED TYPE

Type 302. Wire fits through handle and body of plug then wrapped around screw portion and tightened with knurled nut provided. Brass, nickel plated tip with 4" molded plastic handle. Shpg. wt., 3 oz.

Type 303. Molded Butyrate handle, type 3 class (MIL-L-P349A). Brass, nickel plated plug; rating of 12 amps AC for 10°C temp. rise. Threaded type. Wire fits through handle and body of plug.

Stk. No.	Type	1-24	25-49
35F930	302R	.30	.29

ELECTRONIC POWER TYPES

Available in electronic-power component types providing a regulated source of plate and filament voltages. The CVF series provides 6.0 or 6.3 volts of output regulated within ±1% over line variations of ±15%. The series CVE series, a combination of the plate and filament types, regulates within ±3%. Both series, which include filaments with stabilized voltage supplies, operates reliably, feature long component life, and need less servicing than competitor's materials. Fig. D.

Transformers & Power Supplies

SOLA ELECTRIC SB
DIVISION OF SOLA BASIC INDUSTRIES

TYPE CVN NORMAL HARMONIC TYPE TRANSFORMERS

CVN type transformers provide the same ±1% regulation as the sinusoidal series. Contain an average of 20% rms harmonic content and are especially recommended for electrical loads not affected by harmonics, such as solenoids, relays, filaments, and where rectification is required. †indicates 95-130. (*) indicates 95-130/175-235/190-260. (**) indicates an input voltage of 190-260/380-520. (***) indicates 95-130/190-260. (††) indicates 190-260.

FIG. E. FIXED CONSTANT VOLTAGE DC POWER SUPPLIES

Will withstand high transient overload without damage or output voltage drop. Output regulation ±1% or less over 100-130v. input range. 1% repple except 281200 and 281250 which are ½%. Load regulation less than 4% from 20% to full load. Efficiency approx. 75%. Output impedance approx. .5 ohm. Mounted on standard 19x5¼x9¾" rack panel. Input 100-130 60 hz. AC.

● *NEW* POWER SUPPLIES

Model SCRDC-III. Especially designed for use with logic circuitry and as a bulk power source for point of use IC regulators. Offer tight regulation for line and load, holding output voltage variation to within ±0.1% of nominal or 50 mv whichever is greater for an input of 100-130VAC, 50/60 Hz. Static load regulation ±0.5% of nominal or less for static output load change from zero to full load. Dynamic line regulation ±1.0% of nominal or less for line voltage change of ±10% within static range. Dynamic load regulation ±2.0% of nominal or less for step load changes of up to 25% of full load rating between 25 and 100% of full load. Recovery time from dynamic change to static band is less than 250 milliseconds. Output voltage varies less than .05% from 0°C to 40°C. Derate 2.5% per °C up to 50°C (with convection cooling). Input frequency range for all specifications 47 to 63 Hz. Ripple less than 1% of nominal or 300 mv whichever is greater. Efficiency 25 to 75% depending on output voltage. Standard 19 inch rack mounting. Can be used in tandem (series or parallel) for higher voltage and current ratings.

Superior Variable Transformers

"POWERSTAT" VARIABLE TRANSFORMERS

An autotransformer of toroidal core design with a movable brush-tap riding on the Gold-plated bared portion of the winding.. Delivers from 0 to or above line voltage. Operating temp. rise is less than 50°C above ambient. Special Gold plated plating and polishing process produces a glass-smooth commutator surface which is forever free of oxides.

(F) with fuses in the output brush leads and terminal boards enclosed. Knock-outs in enclosures permit wiring with BX or equivalent. (T) terminal boards enclosed. (2PF) parallel blade plug. (3PN) standard 3-blade plug. (-2) 2-gang. (-3) 3-ganged. Single phase except where otherwise noted. All 136-236 and 1156-1256 units have POWERKOTE coils for greater stability.

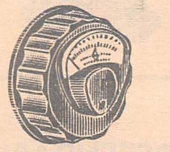
METERED KNOB ASSEMBLIES FOR BACK OF PANEL MOUNTED UNITS



Can be combined with standard cataloged POWERSTAT variable transformers that are designed or adaptable for back panel mounting. Easily adapted for retrofitting existing installations. Large functionally designed knob turns freely while meter remains stationary. Accurate voltmeter insensitive to stray magnetic fields. Consists of metered knob, mounting screws and complete wiring and installation instructions.

VS150—Where 120 volt duty is required. Has 0-150 meter scale.

VS300—Where 240 volt duty is required. Has 0-300 meter scale.

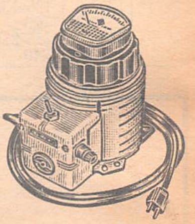
LET NEWARK SUPPLY ALL YOUR ELECTRONIC NEEDS!

Eleven Stocking Warehouses, Coast-to-Coast

METERED KNOB POWERSTAT® VARIABLE TRANSFORMERS



Designed for back-of-panel or general utility mounting. Excellent for use in laboratories, and inspection and test applications where voltage must be controlled without the necessity of installing a separate way of measuring voltage. Have knobs which include a stationary direct-reading voltmeter; Accuracy of ±3% of full scale. 240 volt types have 0-300 volt scales. 120 volt types have 0-150 volt scales.

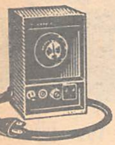
Superior Transformers

● *NEW* ENCLOSED LABORATORY POWERSTAT VARIABLE TRANSFORMERS



For use in any application requiring a portable source of variable AC voltage up to 1.6 Kva capacity. Equipped with grounded NEMA cord-plug assembly, on-off switch, pilot light, and fuse. Incorporates POWERSTAT variable transformer. Types N21, N116B, and N116BL feature POWERKOTE coils ofr greater overload resistance, higher current ratings. Resistant to fungus and other contaminating atmospheres. *Suffix "K" indicates metered knob type.

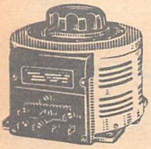
VARIABLE TRANSFORMER WITH ISOLATED SECONDARY



Powerstate type LW-136B is a double wound assembly. The unit can be connected for either 120-volt or 240-volt, 50/60 cycle input; source of 0-30 volts isolated output; either a 120-volt or 240-volt line corrector; or either a 120-volt or 240-volt limited range "buck-boost" variable transformer. Gray enamel finish. Shpg. wt., LW136B—25 lbs. LW136B-3—77 lbs. Features POWERKOTE coils.

IES SERIES VOLTAGE REGULATOR

Highly accurate units featuring solid state circuitry permitting lighter weight and smaller size than comparable tube types. Features include 3% Max. distortion of input, up to 95% efficiency and wide frequency operating range (50 or 60 Hz ±10%). Correction speed can be considered instantaneous for most applications. Out put Voltage maintained within 100 mV RMS band for any combination of rated input voltage and/or load 1.0-0 Power Factor lagging. Operated at ambient temperatures from 0°C to 50°C. Temperature Coefficient, .01%/°C. Regulates output voltage through controlled firing of inverse parallel pair of SCR's connected in the shunt leg of an autotransformer. Has provisions for remote sensing. Includes overcurrent protection in SCR leg. All types cabinet enclosed and can be rack mounted by removing cabinet feet except IES9115 and IES9215.

Power Controls and Transformers

OHMITE

OHMITROL SOLID-STATE POWER AND MOTOR CONTROLLERS

Power controls are adaptable to a variety of applications because the built-in trimmer sets the starting point of the control voltage anywhere between 0 and 70 volts for 1KW models; 0-200 on 2KW models. Infinitely smooth control is obtained from start to full line voltage. Two-way terminals accept quick connectors or soldering. Output is RFI filtered. Component models mount with 3/8"-32 bushing on aluminum panel for heat sink. Portable models are self-contained. Sizes: component models 1¾"sq. x 1" behind panel; portable models: 4¼L x 3¼W x 1$^{13}/_{16}$D. On-Off switch at end of control knob rotation.

COMPONENT MODELS

Stock No.	Type No.	Input 60 Hz	Trimmer Range	Output	1-9	10-24	25-99

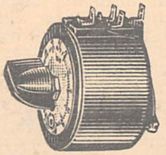
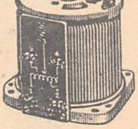
"V.T." VARIABLE TRANSFORMERS

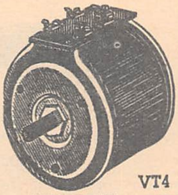
VT02E
In Case



VT1, VT02, VT3



VT8



VT4

VT20

Six sizes for a wide range of electrical ratings. Deliver full rated current at any brush setting. Have overvoltage feature, except those marked "No Overvoltage", and high-current low-voltage to meet transistorized power supplies and high current applications.

All units single phase except Two-in-Tandem. All may be used to over 400 hz. Screw terminals and solder lugs on all models except types VT1, VT02, and VT3 which have solder lugs and accept push on connectors and have 3/8-32 threaded bushings for single mount. Shafts may be extended from the brush or base side. VT20 has a collet shaft lock for repositioning without scoring shaft. Dials on overvoltage models calibrated for overvoltage and normal line connection. Knob, dial mounting hardware supplied.

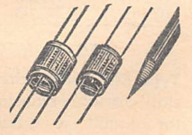
SPRAGUE

TRIGATE PULSE TRANSFORMERS FOR LOW-COST SCR CIRCUIT APPLICATORS



For SCR triggering applications where excellent low cost performance is required. Balanced pulse characteristics and energy transfer from primary to secondary and tertiary windings. Min. saturation effect. Fast secondary and tertiary windings. Min. saturation effect. Fast pulse rise time and increased current capability to prevent SCR di/dt failure. Transformer leads polyuretiane insulated magnet wire. May be soldered directly to terminals or other circuit components without need for removal of wire insulation. For operation over temp. range of —10°C to +70°C.

NEWARK — Fast Service — Low Prices

Auto Transformers

STACO INCORPORATED

STACO VARIABLE AUTOTRANSFORMERS

Wide selection of autotransformers designed to deliver variable output voltages. Optimum core and coil design used in these transformers result in higher current ratings and greater overload capabilities. Units are designed to deliver output voltages of zero to line voltage, or zero to 17% above line voltage. Terminals permit connection for increasing voltage in either clockwise or counterclockwise rotation of knob. Regulation is substantially independent of the load; zero wave form distortion. Moderate temperature rise. Precious metal plating of the commutator surface eliminates oxidation and deterioriation. 50/60Hz operation unless otherwise noted. *60Hz only at over-voltage, factory connection for line voltage output. **60Hz operation only.

STACO DELUXE LINE

Exclusive line of variable transformers feature diode-protected meters (to guard against accidental burnout): insulated banana jacks on all metered units: bold type facilitates accurate measurements. Positive stops are built into all control knobs to insure against internal damage and to assure no loss of index on the calibrated dials. Circuit breakers are employed to avoid the inconvenience and cost of fuse replacement, with the exception of the E171, which is fused. Enclosures are tamper-proof and movements are accurate within 2%. Pilot lights are provided with each unit at no extra cost. Efficiency is as high as 98%, and under maximum-output-voltage conditions at rated current, better than 5% regulation can be attained. Convenience outlets on most units add versatiliy to your work area. Conservative ratings allow continuous operation with a 10% to 17% output voltage input. Ammeter, voltmeter, or wattmeter, or a combination of all these are available. A selector switch is provided for use with dual scale meters to assure greater accuracy in meter readings. All units are supplied with a ventilated case, constructed of extruded aluminum and baked epoxy painted 18-gauge steel. The front panel is aluminum with permanently etched legends. The convenient carrying handle is anodized, rugged extruded aluminum. All units are designed to meet UL and CSA standards of safety.

Note: Types E501V, E501VA, 1501VAW, E1010V, E1010VA, E1010VAW have both a 15 amp convenience AC outlet and isolated AC and DC outputs at 10% of the output current rating of the unit, available at banana receptacles. EJ401V, EJ901V have 120VDC isolated output at full rated current available at banana receptacles. All convenience outlets provide 120VAC at 10 AMPS minimum.

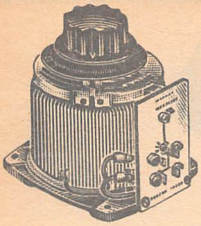
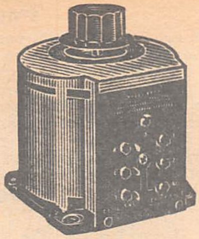
Voltage Regulation & Control Devices

G-E "VOLT-PAC" VARIABLE TRANSFORMER



Provides continuously adjustable output voltage. Handles short duration current surges up to 10 times rated current. Maximum output currents applicable up to 100% voltage. Core consists of high grade strip wound silicon steel, plus moulded phenolic winding form to insulate coil from form. Types for 50-60 cycles (*) for 60 cycles only. Cased units with enclosed terminal boards, plug-and cord-set units, motor-operated units, multiple-core units, three-phase units, and automatic control units are available through Newark.



120V INPUT — UNCASED, SINGLE CORE

All units provide 0-140V overvoltage output except * 0-132V, † no overvoltage, 0-120V only. "Max. amps": output into constant-Z load at or below 120V; at overvoltage "rated" current should not be exceeded. Uncased, with exposed terminals.

Stock No.	Type No.	Max. Amps.	Rated Amps.	Shpg. Wt.	1-9	10-24	25-99

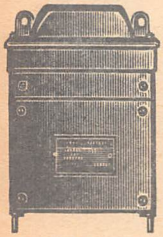
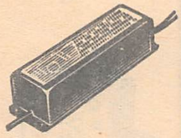
AC VOLTAGE STABILIZERS





Static-magnetic transformer-type units provide voltage maintained within ± 1% while input fluctuates ±15%. Unfiltered output waveform is relatively flat-topped, with 15-20% harmonic content; filtered types provide near-sinusoidal output, maximum harmonic content 3%. All units are for single-phase, 60 cycle AC only; stabilized output 118V except as noted. Completely enclosed, with enclosed terminals, except units rated below 250 V-A have insulated cable leads.

Unfiltered Types. All have 118V output except * 118/236V.

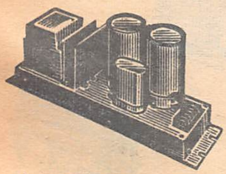
complete Line of GE Voltage & Control Devices

REGULATED DC POWER SUPPLIES



Furnish fixed DC output voltage within ± 1% tolerance while input AC voltage varies ± 15%. All units feature rugged magnetic and semiconductor circuitry and are designed for chassis or standard 19" rack mounting. Short-circuit current is limited to approximately twice the rated value. Can be installed with either polarity grounded. Input voltage range: 97-130VAC, 60 cps, 40°C ambient. Output ripple level 1% rms max. Efficiency 70-85% for normal output levels; efficiency may decrease for unusually low output levels.

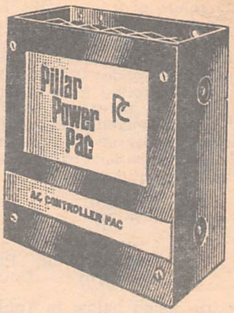
Features:

- **All solid state AC power controlled**
- **Rugged design fully protected**
- **Ample overload capacity**
- **High surge rating**
- **Variable voltage DC available with additional rectifiers**

The basic A.C. CONTROLLER-PAC is an all static power controller, designed for operation on 120V-240V, 60 hz. Power supplied by means of phase controlled solid state switches Static power switching and control elements employed to provide a reliable and efficient power switch or proportional power controller.



Terminal connectors are standard on all "PILLAR" Power-Pac

Figure I and II indicate the principle of operation. Input control signal may be derived by means of a simple relay closure, a potentiometer setting, or an isolated low level D.C. control signal. At full input power, a 60 hz sine wave is impressed upon the load; at lower power levels, output wave is like SCR phase controller.

Completely self contained in a single compact package, measuring $7\frac{15}{16}$" x $6\frac{3}{4}$" x $3\frac{3}{8}$" for 15 amp models and $7\frac{11}{16}$" x $6\frac{3}{4}$" x $6\frac{3}{4}$" for 30 amp models. Line power and load connections, as well as input control connections, are the only external terminations necessary for the operation. Full rated up to 40°C, derated at .25A/°C over this temp.

APPLICATIONS

ON-OFF. Control of 60 Hz voltage to load. Particularly suited to replace power relays or contactors where repetitive operations or very severe environmental conditions cause maintenance and "short life" problems. See C-1 Control.

PROPORTIONAL. Control of 60 Hz voltage. Provides variable speed control of AC motors, (Universal or permanent split capacitor) for fan, blower or pump applications. Controls lighting level of incandescent lamps. Adjusts power levels on electric heater elements. The power set command is either a manually or remotely adjusted two-watt potentiometer. The output faithfully follows potentiometer setting. See C-3 Control.

CLOSED LOOP. Control of 60 Hz power. Applications include: Temperature Control for electric heating. Unit accepts 0-5MA instrument signal from any selected temperature set point controller. Line Regulators for power supplies to compensate for line voltage or load variations. "Feed back" signal for control need only be conditioned to provide 0-5MA for full control range requried. See C-4 Control.

FOUR MOUNTING HOLES 0.281" dia. **between centers are 4" and $7\frac{1}{4}$". Mounting feet available to allow proper ventilation, and must be used, if unit is operated on** a bench top.

CONTROL CONFIGURATIONS

C-1 INPUT CONTROL. Simple relay or contact closure, not isolated from AC line. Contact rating required of input switch is 2 mA with less than 50 mA peak requirement. Apply to terminals 5 and 6.

C-1 OUTPUT POWER. From 0 to 98% of input V when input control switch is closed. Apply to term. 3 and 4.

C-3 INPUT CONTROL. Potentiometer adjustment with potentiometer, rated, 2 W, use 500K ohms for 120V & 1 meg ohms for 240V. Pot to be wired as variable resistor and applied across terminals 5 and 6.

C-3 OUTPUT POWER. Output V comes on to load as a function of input potentiometer setting. Load applied across terminals 3 and 4.

C-4 INPUT CONTROL. Complete isolation is provided for the input control signal from both the power line and the load. The load presented to the input control signal is 2000 ohms and 0 to 5 MA will provide a full range of output from 0 to 95% of input voltage. Control signal is applied across terminals 5 and 6.

C-4 OUTPUT POWER. Output voltage is continuously variable with input control signal. Output is reduced to zero with 0 MA control signal and 5 MA produces 95% of input voltage.

LUTRON POWERDIALS

The POWERDAL is a solid state power control using Silicon Controlled Rectifiers. Basically controls voltage and therefore regulates other quantities such as power, current, heat, motor speed[1] and light.[2] Will replace variable autotransformers in the majority of jobs, and have many advantages over variable autotransformers. Only 1/10 the weight and $\frac{1}{2}$ the size of autotransformers. More reliable and completely solid-state. No brush wear or burn-out problem. Can give an AC or DC output by merely flicking a switch. Less expensive to install than autotransformers and the basic instrument cost is generally the same or less that that of autotransformers.

PDU POWERDIAL SERIES — PANEL MOUNT

Aluminum mounting bracket and phenolic case provide a small, easily mountable control. Distance between centers of oval mounting holes is $3\frac{9}{32}$". 5A, 7.5A and 10A units may be mounted in these boxes. Unit must be fused against overloads. POWER-DIALS designed to operate at 120 or 240 volts, 50 to 60 cycles input. PDU Series: 120 volt service; O-120 volts RMS AC output, 0-85 volts RMS DC output. 2PDU Series: 240 volt service; 0-170 volts RMS AC output, 0-85 volts RMS DC output.

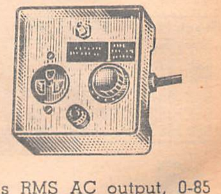
PD POWERDIAL SERIES — BENCH MODEL



Rugged solid state circuitry—$\frac{1}{10}$ the weight, $\frac{1}{2}$ the size of variable autotransformer controls. No brush burnout or wear. Aluminum casting provides a light but rugged case. 3-prong plug and receptacle affords safety in electrical connection. Unit is fused against overloads. Powerdials are available with 120 volt and 240 volt inputs @ 50 to 60 cycles.
PD Series: 120 volt service; 0-120 volts RMS AC output, 0-85 volts RMS DC output. 2PD Series: 240 volt service; 0-240 volts RMS AC output, 0-170 volts RMS DC output.

Voltage Regulators & Paraformer

PARAFORMER—A NEW CONCEPT IN A.C. POWER CONDITIONING

Provides voltage regulation and noise attenuation of over 50DB over a frequency range of 0 to 1 MHz. As shown by Equation #1, electromotive force, and hence the transfer of electrical energy can be achieved in two ways: (1) by flux coupling, or (2) by parametric coupling. Existing passive devices such as transformers and ferroresonant transformers depend almost exclusively on the flux coupling term of Equation #1. However, Wanlass Electric has now invented a new component, the ParaformerTM, which operates exclusively on the basis of parametric coupling and consequently is a device in which the flux coupling or mutual inductance is zero. (Thus, all energy is passed by the i dL/dt term of Equation #1.)

$$E = \frac{d}{dt}(Li) = \underbrace{\frac{Ldi}{dt}}_{\text{Flux Coupling Term}} + \underbrace{i\frac{dL}{dt}}_{\text{Parametric Coupling Term}}$$

The advantages are listed below in Table 1.

TABLE I

	Transformer	Ferroresonant Transformer	Paraformer
Line voltage regulation	None	±1%	±½%
Line filtering (noise)	No	Slight	Over 50 db
Load filtering (noise)	No	Slight	Over 50 db
Overload protection	No	Partial	Yes
Low line protection	None	None	Yes

As noted from Table 1, the ParaformerTM is inherently a line voltage regulator and line power filter. In fact, the Paraformer's most useful property appears to be its ability to prevent line voltage fluctuations from reaching the load. As will be noted from the above table, such fluctuations (noise, distortions, etc.) are atenuated by over 50 db for frequencies from a few cycles per second up to 1 megacycle per second.

Designed specifically for OEM applications. 60 & 400 Hz in ratings from 60VA to 1000 VA.

	60Hz	400Hz
A.C. Input:	115VAC ±10% (Nominal, 10, 60Hz (50-150VAC)	115VAC ±10% (Nominal) 10, 400Hz (50-150VAC)
A.C. Output:	117VAC, 60Hz, 1 Phase	117VAC, 400Hz, 1 Phase
Regulation:	±0.5% Line; ±2.0% Load	±1% Line; ±2.5% Load

Having noted the outstanding advantages of the ParaformerTM, it is perhaps appropriate to note the simplicity of the device.

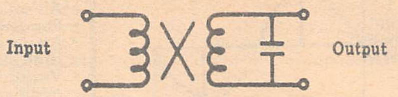

FIGURE 1

As shown in Figure 1, the Paraformer consists only of a primary winding, a secondary winding, a magnetic core and an AC capacitor. No other components are used. After reviewing the symbol, it is perhaps important to restate that the ParaformerTM is not a ferroresonant transformer. The mechanism for energy transfer is entirely different and most of the basic characteristics are entirely different.

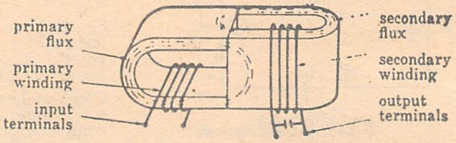

FIGURE 2

Note that the geometry is such that the primary flux does not link the secondary winding and that the secondary flux does not link the primary winding. (Accordingly, the classical flux coupling is zero). However, note that the primary flux does modulate the reluctance associated with the secondary flux and hence the primary does modulate the inductance of the secondary. This modulation can be achieved only by transferring electrical power from the primary to the secondary. This power in turn sustains the secondary oscillations and delivers power to the load. It is this unique parametric power transfer mechanism that makes the ParaformerTM a revolutionary new component.

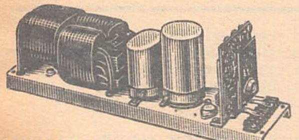
"PIC" & "PHPIC" LINE — PARAFORMER DC POWER SUPPLIES

OVER 100 DB TRANSIENT SUPPRESSION



P60-7.5IC-5

Designed with newly invented parametric power transfer principle Wanlass P-IC power supplies operate from an AC input of 105 to 125 volts single phase, 60 cycle and provide DC outputs as shown in the table below. Regulation for line is ±0.02% and for load ±2 mV; ripple is less than 300 microvolts rms and voltage is adjustable ±5%. Units have automatic overload and short circuit protection and overvoltage crowbar is available as an option at $20.00 additional. The "HP" versions of the "PIC" line have specifications identical to the "PIC" units except that line regulation is ±0.01%, load regulation is less than 1 millivolt and ripple is less than 100 microvolts rms. Size: P60C units 17" L. x 4.5" W. x 5.88" H. P120C units 17" L. x 5" W. x 9.7" H. Shipping weights: P60C units 16 lbs. P120C units 27 lbs.

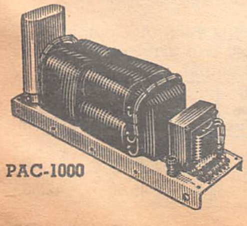
PHASAC^{TM} SINGLE TO THREE PHASE CONVERTER



PAC-1000

Model PAC-1000 and PAC4-1000 is a 1 KVA static single to three phase converter with all passive Parax components utilizing Paraformer inherent phase shift phenomenon. For use in applications where static conversion from single to three phase is necessary, use PAC-1000 for 60 Hz and PAC4-1000 for 400 Hz Input. 105-125 Vac, 60 Hz, 1-phase and output is 3-phase, 120 Vac line to neutral, 208 Vac line to line and 240 Vac at 1 KVA (333 VA per phase). Output connection is 4 wire wye or 3 wire delta. Size is 7" H. x 5⅞" W. x 17" L. maximum and weight is 50 lbs.

Wanlass Clip-AC Voltage Regulation

CLIP-AC REGULATOR PRINCIPLE

AC regulator is logical successor to ferroresonant transformer for bulk of AC regulation requirements up to 1KVA. Regulation is achieved by symmetrically clipping (dissipating) peaks of incident sinusoidal waveform. Unretouched scope photograph reproduced in Fig. 1 shows that except for these peaks, output waveform is identical to input waveform. Fig. 2 shows in block diagram form how regulation is achieved. Output voltage is continuously monitored by sensor which uses zener diode as reference. Associated control circuitry in turn adjusts clipping level of pass transistor in order to maintain desired output. Economy of design has been realized by using a floated reference and a diode bridge to make it possible for same pass transistor to be used on both halves of AC cycle. SCR shown in block diagram is used to accommodate short duration surge currents such as those encountered in charging capacitors, starting motors, or starting lamp loads. Under such conditions, bias resistor triggers SCR and excessive current surge is bypassed around pass transistor. Should these excessive current conditions persist, input fuse would be blown, thereby protecting unit. Under Normal operating conditions SCR is inoperative.

Function	Clip-AC Principle	Ferroresonant Principle
Input Frequency	47-420 Hz Typical	Single Frequency
Line Regulation	0.1-1% Typical	Cannot be modified
Load Regulation	Load Compensation 1% Typical	No Compensation (5-7% Typical)
Power Factor	No Problem	Shifts Output V Apprec.
Phase Shift	None	Apprec.-Load Depen.
Response Time	10-50 ua-sec Typical	25,000 usec Typical
Cost, Size, Weight	50% less Typical	Weight-Iron Expense-Copper

- **LINE REGULATION TYPICALLY 0.1 TO 1%**
- **RESPONSE TIME 10 TO 15 MICROSECONDS**
- **INPUT FREQUENCY TYPICALLY 47 TO 420 Hz**

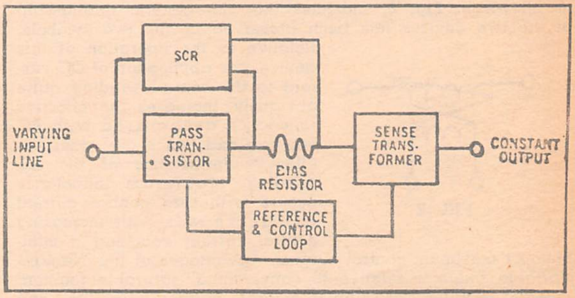
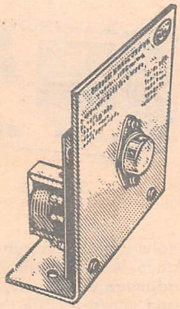
NOTE: Peak clipping of Output Waveform.

Fig. 2



REGULATORS AND POWER SUPPLIES

● *NEW* PEAK REGULATOR & RMS REGULATOR

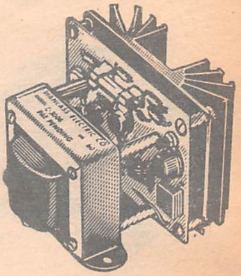


Solid State ecconomy type, fast response, 120 W AC voltage regulator. Frequency and power factor insensitive, light weight and small replacement for ferroresonant type regulators with 10-50 microsecond response. ±0.025%/°C temperature coefficient. Peak regulation for DC power supplies or peak sensitive devices and RMS regulation for lamp loads and other average power sensitive devices. Ambient operating temperature: 0-40°C; up to 71°C with proper derating. Dimensions: 4" W x 4½" H x 2½" D.

CVR-120. Input: 100-130VAC, 47-420 Hz, single phase. Output peak 135V at 120 W. Line regulation ±1%. Load Regulation ±1%. Power Factor Reg. ±1%. No phase shift.

Stk. No.	Type	1-9	10-24	25-49	50-99
89F1392	CVR	**26.50**	**25.00**	**24.00**	**21.75**

● *NEW* AC TRUE RMS VOLTAGE REGULATOR



Both a line and load regulator. Regulation is achieved through a unique clipping circuit which senses RMS and clips output voltage at a fixed RMS level. Regulation covers 100-130 V input, 47-420 Hz. Line and Load regulation ±0.5%. ±0.5% power factor regulation from +0.7 to —0.7. No phase shift. Response time 10 to 50 ua-sec. Ambient operating temperature: 0 to 50°C. Ideally suited for photo-optical applications where light intensity must be held constant, in addition to any other application where RMS regulated power is required.

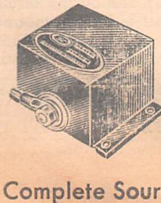
TVR-1000 VOLTAGE REGULATOR FOR PHOTOCOPY LAMPS



TVR-1000 is an all silicon solid state AC line voltage regulator for lamp loads. It is designed to provide a constant 90 volts RMS to special 1000 watt photocopy lamps. TVR-1000 employs a solid state RMS detector for long life and reliability with no maintenance. Life of lamp load is enhanced by built-in "soft start." Line and load regulation provided is better than ±2% true RMS for input changes of 105 to 130 Vac. Has an efficiency greater than 90% and is convection and conduction cooled. Mechanically designed to be installed on a frame and requires only 3 by 4 inches mounting area with a clearance height of 3 inches. Weight: 12 oz.

Wanlass Varax AC Voltage Regulators

THE WANLASS VARIABLE INDUCTOR

Electrically variable inductor controlled over a wide range of inductance through application of a small DC control current. Basic core consists of two C-cores rotated at 90° relative to one another, as shown in **Fig. 1.** AC inductor coil is wound on one of these core halves, DC control coil is wound on the other. AC flux does not link the control winding; DC flux does not link the AC winding. AC power is highly decoupled from entering the DC control circuitry, making it possible to exercise control with a winding of many turns carrying little current.

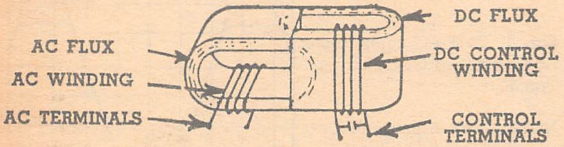

FIG. 1

The fact that no special care is required to achieve decoupling results in ease of application of the device with resultant overall simplicity and high reliability. **Fig. 2** depicts the symbol for the new device. Comparison with the Wanlass Paraformer symbol as shown in **Fig. 3**, indicates that the generic relationship of the two devices has been preserved in the two symbols. Relative to the operation of this device, the application of DC current to the control winding quite obviously increases the effective reluctance associated with AC winding and hence decreases the effective inductance of the AC winding. Maximum inductance occurs with zero control current and decreases with increasing control current reaching a minimum at maximum control current. Advantages of the Wanlass Variable Inductor relative to conventional saturable reactors include: smaller size, lighter weight, greater reliability, and less wave form distortion. Limited waveform distortion is the result of the relatively linear variation of AC inductance as a function of DC control current.

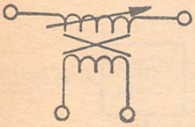

FIG. 2

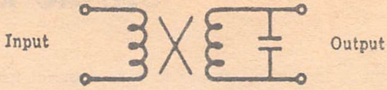

FIG. 3

Inductors have already been built for a variety of custom applications, some typical examples are summarized in table 1. Specific applications include: voltage regulation for photo copiers, voltage regulation for locally generated power used in remote communication sites, electrically tunable variable inductor for use with remotely tuned auto radios, regulation element for automatic battery chargers, and general purpose multi-frequency 0.5% line voltage regulators.

TABLE 1

Application	Material	Capacity	Frequency
Line Voltage Regulators	Transformer Iron	up to 5KW	47-63Hz
D.C. Power Supplies	Transformer Iron	500 watts	47-63Hz
Radio tuner elements (remote tuning)	Ferrite	small	500-1500KHz

Particularly well suited to AC line voltage regulation. As shown in figure 4, the addition of a sensor and control circuit plus a boost transformer or autotransformer convert it into an effective regulator. See Models VVR-1500-VVR-2000.

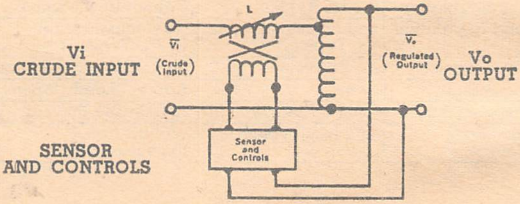

FIG. 4

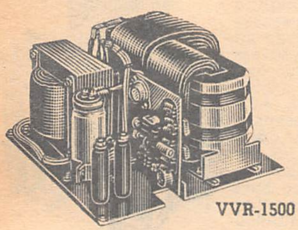
VARIABLE INDUCTOR STATIC VOLTAGE REGULATOR



VVR-1500

All static variable inductor type AC voltage regulators—frequency insensitive. Designed to replace ferrorescnant type constant voltage transformers and silicon controlled rectifier type AC Regulators. High reliability — no SCR's or other solid state devices in power circuits; ideal for remote and unattended locations. Provides load and line regulation. True RMS regulation with RMS sensor and closed loop control. Ideal source for high starting loads and all linear loads. Provides line transient suppression by inherent characteristics of series inductor in the line. Produces no spikes or conducted RFI. AC input: 105-130 volts, 47-63 Hz, 1 phase. AC output: 120 volts RMS—1.5 KVA (Maximum 1.8 KVA at 80% duty cycle). Regulation: line—±1% for 105 to 130 V. line change. Load—±1% for 400 W. to 1500 W. load change (±1% for no load to full load with optional ballast inductor). Inherent short circuit protection. Inherently suppresses 200 volt transients protecting both regulator and load being powered. Oper. temp.: 0°C to 55°C up to 85°C (with 200 CFM of forced air cooling). Efficiency: Over 90% at full load. Size: 10" w. x 10" l. x 4.5" h. Wt. 32 lbs.

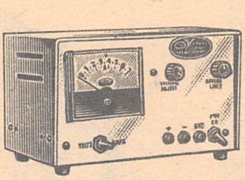
REGULATED VARIABLE BENCH TYPE DC POWER SUPPLIES



IPD-275

Designed specifically for integrated circuit and operational amplifier loads in laboratory and system equipment, variable DC power supplies provide solution to your DC power needs. Model No. IPD-275 provides a DC output of 0 to 7 volts at 0 to 5 amperes while Model No. DIPD-181 provides a dual DC output of 0 to 18 volts at 0 to 1.25 amperes. Regulation is +0.1% or ±5 millivolts for line and ±0.1% or +5 millivolts for load. Ripple is less than 1 millivolt RMS. Output impedance is less than 10 milliohms DC to 1 KC. Protected by adjustable automatic recovery current limiting for overloads and short circuits the unit is also fused for AC input line protection against catastrophic failures. Included also is remote sensing which automatically reverts to local sensing in the event of a broken or accidentally disconnected sense lead. Input is provided through a 5 foot, 3 wire utility cord with grounded 3 prong plug. Rear panel terminals include positive output, negative output, chassis ground, remote sense positive and negative terminals. Controls and indicators on the front panel include on-off switch, meter switch, voltage control, current limit control, voltmeter/ammeter (0-7 volts/0-7 amps DC) and output terminals positive, negative and chassis ground. Unit is bench mount type construction and features clear anodized aluminum finish. Cooling is by natural convection and operating temperature is 0 to 45°C.

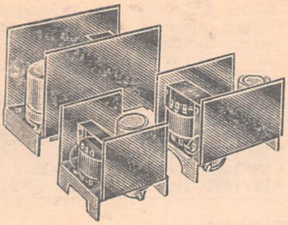
Wanlass D.C. Power Supplies

REGULATED D.C. POWER SUPPLIES



D.C. power supplies in ratings of 30, 60, or 120 watts furnished in 4 discreet models in each power rating which by means of transformer taps and a voltage-adjustment potentiometer facilitates selection of any output voltage between 3.6 and 60 Vdc. A.C. input: 105-125V, 57-63 Hz, 1 phase (47-440 Hx with derating). Regulation: ±1% for ±10% line changes ±1% for no load or for full load. Ripple: 0.1% +10mV RMS. Protection: Automatic short circuit protection. Grounding: Floating output; either + or — may be grounded. Construction: Open chassis type for Original Equipment Manufacturers' Systems.

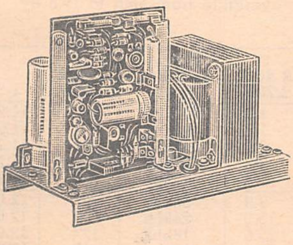
DUAL OUTPUT POWER SUPPLY



Model D-OEM-1. A dual output power supply ideally suited for applications where there are lamps, relays, motors, etc. in addition to integrated circuits or transistors requiring a separate 5 Vdc source of well regulated power. Input power: 100-130 Vac, 1-phase 47-63 Hz. Output: 24 Vdc at 2 amps and 5 Vdc at 1 amp. Regulation for 24 Vdc: ±1% line and 1½% no load to full load; ±0.1% and ±.1% ½ to full load on 5 Vdc output. Response time: .2 millisecond. Ripple: 150 millivolt peak to peak for 24 Vdc and 10 millivolt peak to peak for 5 Vdc. 5 Vdc includes an overvoltage crowbar for IC applications and has a temperature coefficient .05% C. Size: 5¾"H x 8¼"L x 4"W. Weight: 9 lbs. maximum.

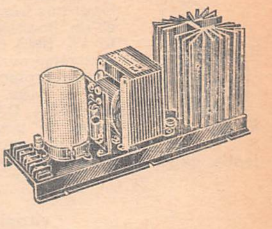
ALL SILICON SOLID STATE DC POWER SUPPLIES

"IC"-"HPIC" DC POWER SUPPLIES



Designed specifically for IC, OP-AMP, and MOS applications. Provides a very sensible solution to system DC powering of integrated circuits, operational amplifiers and MOS circuits. Operating from an AC input of 100 to 130 volts, 47 to 63 Hz. single phase, units are available in ratings from 3.6 to 60 volts and 1 to 25 amperes. Output voltage: adjustable a minimum of ±5% from the nominal output. Regulation accuracy: for "IC" ±0.25% for line and ±0.25% for load (for "HPIC": 0.05% load). Ripple: 5 millivolts RMS maximum with recovery time of 50 to 100 microseconds. Standard features including "foldback" current limiting and remote sensing. *Maximum output current.

	DIMENSIONS	WEIGHT
60-IC	11.5"L x 5.2"W x 6.0"H maximum	11 lbs.

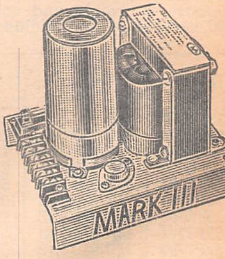
Optional overvoltage protection crowbar for use with any of above units.

99F1481	$20.00

MARK III—PRECISION REGULATED ECONOMY DC POWER SUPPLIES



Better regulation and ripple plus "built-in" current limiting and overvoltage protection. Includes short circuit protection and adjustable overvoltage crowbar. Input and output are through a terminal strip on the open type construction chassis. Operates from an A.C. input of 115/230 volts ±10%, 1-phase, 47-63 Hz. Regulation of ±0.1% or 10 mV for line and ±0.1% for load and .01% RMS or 1 mV ripple. D.C. output voltage is adjustable ±2% from nominal output. Finished with clear anodize. Dimensions: 5.5"H x 6"L x 5"W. Weight is 6 pounds.

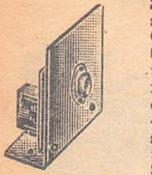
Power Supplies and Filters

WANLASS POWER SUPPLIES

● NEW O.E.M. POWER SUPPLY



Super economy all purpose 20 w. all silicon semiconductor solid state D.C. power supply. Operates from either 115 V. ±10% A.C. 1 phase, 60 Hz. Regulated ±1% for line and load, filtered to 1% RMS ripple and protected by automatic recovery current limiting overload and short circuit protection. Self cooled—4" w. x 3" d. x 4½" h. Max. **The "Eliminator" all silicon solid state 12 V. D.C. (Eliminates need for 12 volt batteries to power D.C. devices.) Model BE-12.** Specially protected against inadvertent overloads, dead short circuits! Operates from 115 V. ±10%, 1 phase, 60 Hz A.C.—ideal for driving all 12 V. devices including auto radios, stereo's, tape decks and cassettes. Regulated and filtered. Includes U.L. approved 2 wire cord & ground plug for A.C. Input & output leads with alligator clips to D.C. load.

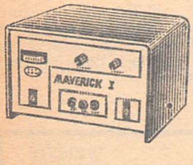
● NEW MAVERICK I & II



Variable regulated bench-type DC power supplies. Designed for integrated circuit, MOS and operational amplified loads in lab and system equipment. Protected by adjustable automatic recovery current limiting for overloads and short circuits: also for AC input line protection. Remote sensing automatically reverts to local in event of a broken, accidentally disconnected sense lead. Clear anodized aluminum finish. AC input: 105-125 VAC. 60 Hz single phase. Load & Line Regulation: ±0.1% or ±5 mV. Ripple: less than 1 mV rms. Output Impedance: less than 10 milliohms, DC to 1 kHz. Operating Temperature: 0 to 45°C; natural convection cooling. Controls: Voltage; Current Limit; Meter Switch; On-Off Switch; Dual Meter (0-7 V/0-7 amps DC). Front Panel Terminals: Positive and negative output; ground. Rear Panel Terminals: Positive and negative output ground; remote sense. Input Cord: 5-ft. 3-wire utility cord with grounded 3-prong plug. Size: 8.50" w. x 5.22" h. x 7.00" l. Weight 8 lbs.

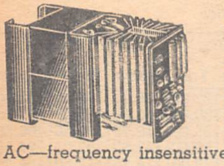
● NEW BRUTE I, II, III



SCR (silicon controlled rectifier) regulated DC power supplies. High current, Low Cost DC Power Supplies utilizing phase control principal with ±0.2% or 50 mV line and load regulation. DC output voltage adjustable either 5-50 volts or 2-25 volts (reconnectable) at 300, 600 or 12000 wats. Operate from 150-130/210-260 volts. 1 phase, 47-63 Hz. AC—frequency insensitive. 1% RMS or 500 mV ripple; ½% whe optional ripple reduction kit is employed.

COLLINS TOROIDAL COILS

MOLDED PLASTIC TYPE MP-254 TOROIDS—FOR FREQUENCIES UP TO 10K Hz

Molded Plastic Type MP-254. Features exceptional Q below 5KC. Useful for critical filters, oscillators and tuned transformers in the above range. Provides filters of sharp characteristics and highest power capabilities. Molded in hi-temp resin. Tinned brass terminals. Mounts with 8-32 screw. Tapped hole. 2" dia., 1" thk. Values of inductance in 20% increments are available from 5mh to 17.5 hy.

TYPE MIC TOROIDS

Meets MIL-T-27B Grade 4, Class S. For almost any application requiring a high Q microminiature inductor. Essentially no external magnetic field and no capacitive coupling to nearby circuitry. Automatic machine insertion. Insulation resistance is 10,000 megohms minimum at 100 v DC. 100 v RMS dielectric strength. Ambient temperature range is —55°C to +130°C. Inductance change with temperature is ±2% overrange of —20°C to ±85°C. AC and DC saturation—Ultra linear to high excitation levels.

TYPE MIH MICRO INDUCTORS

These inductors may be used in most applications requiring a high Q and miniature size. Hermetically sealed tall TO-5 type transistor case. Standard inductance values are available in 20% increments from 1µH to 1 MH for frequencies to 10 MHz.

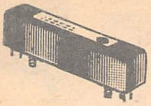
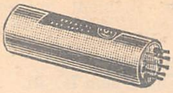
Transformers and Filters

COLLINS

MECHANICAL FILTERS





High adjacent channel separation because of steep skirted selectivity with a flat topped frequency response. Temperature range of operation —40°C to +85°C with only 2 to 10 PPM/°C frequency variation. Dimensions: FA, FC and Z types 2.5" long x .528" wide x 6" high in molded phenolic case, epoxy sealed; J types .775" diameter x 2¾" high in hermetically sealed metal case.

STEPUP-STEPDOWN AUTOTRANSFORMERS

Type PSU. Designed specifically for use with air conditioners in converting a 208 volt unit to a 230 volt line. 60 cycle operation, 208 v/230 v, 230 v/208 v. Converting from 230 volt unit to a 208 volt line is done by a simple connection inside outlet box. Unit is for air conditioners using 1 to 2 hp motors.

Chicago-Stancor Transformers

LOW CURRENT CONTROL TRANSFORMERS

Versatile series of low current control transformers suited for pilot lamps, miniature relays, low current-low voltage power supply application. Primaries 117 volt, 50-60 hz. Three isolated 12-volt secondaries (one with a center tap). Can be series or parallel connected.

Stock No.	Type	Amperes Ea. Sec.	Size H x W x D	Fig.	Wt.	Each Boxed				Bulk Packed

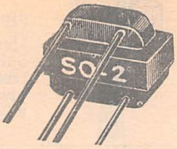
Miniature Transformers

"SUB-OUNCERS"



Tiny transformers for use in hearing aids, pocket radios, etc. Measure only 23⁄32x7⁄8x19⁄32"H. Weight .03 lb. each. Frequency response, 200 Hz to 20k Hz cps.

**Indicates split winding.

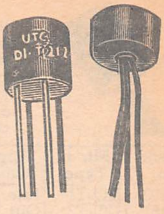
DI-T TRANSISTOR TRANSFORMERS
Meet MIL-T-27C-TF4RX



DI-T. Smaller than the DO-T Deci-Ouncers. Power ratings and other characteristics identical to DO-T's, except frequency response is approximately ±3 db, 400 Hz to 100k Hz. Hermetically sealed; rated for Class R (105°C max. operating) temp. conditions. Size 11⁄32"Dx5⁄16"H, wt. 1/15 oz.

DI-T200. As above, with uninsulated leads spaced on .1" radius for printed circuit boards. Size .350Dx13⁄32"H., wt. 1/15 oz.

"OUNCER" AUDIOS

Famous one ounce audio transformers represent the acme in compact quality transformers. High fidelity from 30-20,000 cps. Maximum output level +8 db at 6.3 mw. Application: Input and Mixing, Interstage and Output Transformers. Fully impregnated and sealed in a drawn aluminum housing. Size: ⅞" dia. x 1 3⁄16". Wt. 1 oz.

Transformers and Inductors

DO-T TRANSISTOR TRANSFORMERS

C DO T31
4RX1 1YY
MIU 2KC
6K 5W

Provides unprecedented power handling capacity, reliability, plus ultra small size. Hermetically sealed, metal cased to MIL-T-27C-TF4RX. Greater power rating, ±2 db, 200 cps —20KC. Low distortion. Anchored leads stand 10 lb. pull test; tinned and insulated copper conductors. For transistor use only. Size 15/32" long; 11/32" diameter. Weight 1/10 oz.

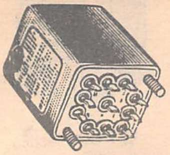
Inductors

TRANSISTOR INVERTER TRANSFORMERS



H-97

H-94

H-141

Highly efficient, small size transistor inverter transformers. Hermetically sealed to MIL-27CTF4SX specs. Optimum results at approximately 1000 Hz. DC output shown is for 12/14 or 24/28 V battery. With 6/7 V battery, current ratings are same but output voltages are halved. Shpg. wts. H-97, ⅜ lbs.; H-98, 2/3 lbs.; H-99, 1¾ lbs.; H-100 2½ lbs.

Stock No.	Type No.	DC V	Ma	Size (inches)	1-24	25-99	100-Up

POWER LINE ISOLATION TRANSFORMERS

Ultrashielded hermetically sealed units. Less than 1/10th mmfd. effective capacity between primary and secondary permits isolation formerly obtained only from battery power. Separate terminal for each shield. Input and output terminals on opposite sides of case. Primary & secondary—115 V 50/60 Hz.

TVC HERMETIC VARIDUCTORS

TVC Inductors are identical to the HVC units below but provide taps at 30% and 50% of total turns. Manufactured and guaranteed to MIL-T-27C by full environment testing. Ideal for oscillator circuits impedance matching, and phase inversion where high Q and adjustable inductance are required. Dimensions: 1 1/8 x 25/32 x 1 9/32". Approximate weight: 2 ounces.

UTC HIGH Q TOROID INDUCTORS

The MQ series are ideal for audio, carrier and supersonic fields. Laboratory adjusted to 1% tolerance, inductance is virtually independent of frequency, temperature and vibration. Low hum pickup. Shielded case affords high permeability. Hermetically sealed to meet MIL-T-27C. Case similar to HVC above.

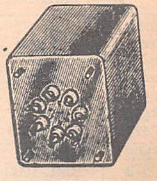
OSCILLOSCOPE TRANSFORMER



Type H-198. Highly shielded scope transformer in hermetically sealed Mil-T-27BTF4RX specs. 800, 1600 & 2400 V. plate windings (no CT) supply approx. 1000, 2000 or 3000 V. DC at 5 ma. allowing great flexibility in application. Has 1.25 V. .2A rect. fil. winding connected to one end of HV winding. Separate 6.3 V. .6A fil. winding insulated to withstand anode voltages. Pri. 115V 50/60 cycle. Case similar to SM. Size 3 1/16x2 5/8x4 1/4".

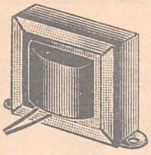
FILAMENT/TRANSISTOR TRANSFORMERS



Type FT Channel Frame. Primary: 115 volts 50/60 Hz. Test Volts RMS: 1500 All units are low temperature rise, vacuum-sealed against humidity with special impregnating materials to prevent corrosion and electrolysis. Approximate weight 2 lbs. FT13, FT14, FT15 & FT16 have taps on primary to modify nom. sec. V. ±6%, +12%.

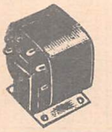
400-CYCLE FILAMENT TRANSFORMERS



Combine smallness of size and lightness of weight with the maximum possible reliability. These versatile midgets are suitable for either ground or airborne use applications. Molded specifically to meet MIL-T-27B-TF5SX specifications. Primary, 105/115 volts, 380-1000 cycles per second. Secondary, 6.3 volts, center tap.

INVERTERS DC TO AC

Converters of low voltage DC to high voltage AC or DC power. Ideally suited for powering all types of battery operated equipment. Complete instructions supplied with each transformer.

MINIATURE TRANSFORMERS

Top efficiency miniature transformers. Designed for a wide range of civilian and government applications. Used by many manufacturers of hearing aids and a variety of miniature electronic devices where maximum efficiency is necessary. Ideal for original equipment and for replacement.

TRANSISTOR BLOCKING OSCILLATOR-CONVERTERS

Designed specifically for use in single transistor blocking oscillator circuits. The DC output voltage of TR-464 is rated for a quadruple rectifier circuit and may vary some due to bias.

TYPE HS-HSM HERMETICALLY SEALED TRANSFORMERS

HS-HSM series transformers are designed to meet MIL-T-27B requirements. Equip. using these transformers need not be redesigned to submit for MIL. approval. These transformers are permanently marked with electrical and environmental data as specified in MIL-T-27B. All are "Climatite" treated. Avg. wt. 10 oz.

TYPE R COMBINED PLATE AND FILAMENT TRANSFORMERS—Primary 115 Volts, 50-60 Hertz

All types are "Climatite" treated for protection against moisture and for elimination of lamination chatter. Hold temp. rise below 55°C. Only copper foil static shields, grounded to the case and core, are used. Leads are UL approved. All connection data permanently marked on case.

TYPE SP "RED SPEC" TRANSISTOR TRANSFORMERS

Type SP. Designed especially for use in transistorized and printed circuit applications, these units come in tough epoxy-molded cases, weigh 1/10 oz.! Incorporate .020" dia. strong nickel-alloy leads spaced on standard 1/10" grid ctrs. to fit printed circuit boards. Base dimensions: .310x.410". Lead length: 3/4". Meet MIL-T-27B specs. *SP-66 is an output-isolation trcnsformer. Shpg. wt., 1 oz.

Epoxy Molded Toroidal

EC AND EK SERIES TOROIDS

EC Series

EC SERIES. Powdered nickel alloy cores. Units closely approach perfect induction with high "Q", high stability with induction level and temp. High res. to shock and vibration. Coils held to 2% inductance tol. Supplied in molded epoxy to meet MIL-T-27B. Size: 1 5/16 dia. x 23/32" ht. Shpg. wt., 1 1/2 lbs. **EK series** comes with plastic coated leads. Size: 1 11/16D. x 7/8H.

ATTENTION INDUSTRIAL BUYERS

NEWARK carries complete lines of the top quality electronic equipment.

Newark can supply all your needs.

AEROVOX Capacitors

TYPE AFH TWIST PRONG ELECTROLYTICS

AEROVOX
AFHS1-22-05
POS. MFD. VDC.
PIN. 120 150
CAN NEG.

Designed for filter audio bypass applications in radio-TV and amplifier equipment. Also used in many industrial applications. Manufactured to exceed requirements of EIA Spec. RS-154. 85°C operation; high purity aluminum foil throughout; moisture-resistant seal. For use over a wide temperature range with minimum change capacitance. Positive lugs on bakelite base. Can serve as common negative terminal with twist lugs for upright mounting on metal chassis. Bakelite metal mounting washers furnished. Shpg. wt., 4 oz.

TYPE CRE ULTRA MINIATURE ELECTROLYTICS

AEROVOX
CRE

Ultra miniature tubular aluminum cased electrolytics with tinned copper leads. Ideal for use in by-pass, filters and coupling applications. Temp. range: —30°C to +85°C. All welded construction and high purity ingredients insure low leakage, long shelf life. Furnished with heat shrinkable mylar tubing. SIZE: Diameter x length.

A — .250 x .500 **C** — .312 x .687 **E** — .375 x .812 **G** — .375 x 1.250
B — .250 x .687 **D** — .312 x .812 **F** — .375 x .937

TYPE QE—COMPUTER GRADE ELECTROLYTICS

AEROVOX
TYPE QE

High reliability, long life, 65°C operating aluminum electrolyte capacitor for energy storage use.

Hermetically sealed with pressure type safety vent. Low screw inserts and heat shrinkage mylar tubing keep overall size near to can size shown. Shipping weight 5-14 oz. depending on can size.

Capacitors

METALLIZED MYLAR "WRAP & FILL" CAPACITORS

AEROVOX
V146Z

Type V146Z. Light weight, high insulation resistance, long stable life. For use in printed assemblies and light weight portable and airborne equipment of all types. Can be mounted in banks using a minimum amount of space. Self-healing and are of instrument quality. All leads are solder-coated copper-weld wire. Tolerance: ±10%.

TYPE V146XR AEROFILM "WRAP & FILL" MYLAR CAPACITORS

AEROVOX
V146XR

Aerovox V146XR capacitors offer high resistance to humidity and excellent stability with temperature where a metal case is not needed. Extremely small size makes these ideal for use in miniaturized circuits. Mylar wrapped, epoxy end filled.

Standard tolerance is ±10%. Power factor will not exceed 1% at 25°C. Operating temperature range of —65°C to 85°C at full voltage rating and to 125°C with derating. Extended foil construction. Leads are solder-coated Copper-Weld wire.

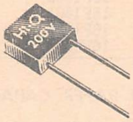
MIL-TYPE CK05-CK06 CAPACITORS



CK05 is .200 square by .100 thick. CK06 is .300 square by .100 thick. Molded for improved humidity protection and reliability. Tolerance is ±10% (K) or ±20% (M) as noted. 200VDCW. —55° to +150° to meet MIL-C-11015.

TYPE K323Z METALLIZED POLYCARBONATE CAPACITORS

AEROVOX
K323Z

Hermetically sealed Polycarbonate film provides high capacitance stability. Self-heals in the rare case of dielectric breakdown. Operating temperature: —65°C to +125°% of full rating. Standard tolerance is 20%. Other tolerances available on special order.

AEROVOX Capacitors

V161 AEROFILM TUBULAR CAPS

AEROVOX
V161

High quality units in Polycap (Polyester Film) casing material which have high insulation resistance, low dielectric absorption and power factor. Relatively small capacitance change over 0° to 85°C. Epoxy end fill will not flow, soften, or melt at any operating temperature. Tolerance ±20%. Operating temp. —30° to +100°C. Aver. shpg. wt., 2 oz.

TYPE P123ZN METALLIZED PAPER CAPACITORS

AEROVOX
P 123 ZNG

Hermetically sealed metal cased metallized paper capacitors. 50 WVDC units specifically designed for transistor applications and low voltage operations. Oper. temp.: —55°C to +100°C with no derating, up to 125°C derated to 75%. Standard tolerance of 50 WVDC ±10%; 200, 400 & 600 WVDC; .01 and lower ±25%; .015 and up ± 20%. Other tol. and insulated sleeve available on special order.

CERAFIL CERAMIC CAPACITORS

MOLDED AXIAL LEADS

Ultra-miniature types MC80V for devices where space is premium. Designed for high capacities per unit volume in line of miniaturization of circuitry. Cerafil capacitors meet or exceed MIL-C-11015C. Power factor 2.5% max. Below .01 mfd, 26 gauge. Operates between —55 and +85° C. at 100 volts and —55 and +125° C. at 50 volts. MC80V and C80V have tinned copper leads. All MIL capacitance values are marked in MIL color code, whether ordered as CK or MC80V. Axial leads 1½", shpg. wt. 4 oz.

AEROVOX Capacitors

TYPE P09—AEROVOX HYVOLS

Immersion-proof units in sturdy rectangular metal can. High voltage screw type pillar terminals fitted with soldering lugs. Intended for heavy-duty continuous service in transmitters, amplifiers, etc. Type MB bracket is supplied unless otherwise specified except on units with base sizes 3 3/4x 3 3/16" and 3 3/4x4 9/16" where type MS bracket is supplied. MSB bracket is available for all sizes on request. Standard tolerance +20 —10%. Average weight 5 pounds.

TYPE P 30M BATHTUBS

High-quality bypass capacitors recommended for applications where high reliability and superior performance is required. Units are Hyvol M impregnated for operation at temperatures from —55°C to +25°C. Standard tolerances +20% - —10%. Weight, 8 oz.

Available on special order with terminals on top or bottom.

MILITARY CERAMIC DISCS PER MIL-C-11015-C

These general purpose military ceramic discs are made in accordance with MIL-C-11015-C. Rated at 530 VDCW. Units identified by letter A as fifth digit are made to operate from —55° to +85°C. Those with letter B as fifth digit operate from —55°C to +125°C. Tolerances as noted in the table below. Av. shpg. wt., 2 oz.

FEED THROUGH CAPACITORS

Offer parallel resonant free performance below 1000 megahertz. Rated to 500 VDC at 85°C, except* 300 VDC. All types can be rated to 125°C at 50% of the 85°C DCWV. Meets or exceeds MIL-C-11015 specs. Hollow eyelet design of FW5N provides direct lead iltering. **Types FA5C, FW5N,** and **SS5D** supplied with solder washer; mntg. hole .191". **Types FB2B, FB3B, SB3A,** and **SB4A** supplied with lock washer and mntg, nut; bolt sizes are **FB2B** (12-32), **FB3B** and **SB3A** (¼"-32) **SB4A** (6-40). GMV —0% to +100% tol.

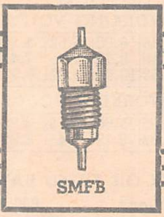
SMFO



SMFB

FCS-C

HIGH FREQUENCY LOW PASS FEED-THROUGH FILTERS

*Attenuation: Min. values from 100 MHz to 10 GHz when measured with a 50 series input resistor (except none for FCS-C) and at 0 volts DC and 0 amps. DC. All Types: RF current 0.25 amps max.; feed-thru terminal resistance 0.01 max.

Size: **SMFO** .8125" L. x .141 Dia., **SMFB** .8125" L. x .250 Hex. (12-32 thread), **FCS-C** .8125" L. x .3125 Dia. Types **SMFO-1, SMFO-2,** and **FCS-C** supplied with solder washer. Types**SMFB-A1, SMFB-2,** and **SMFB-A4** supplied with mtg. nut and lock washer.

Cornell-Dubilier Capacitors

DC PAPER-OIL CAPACITORS TYPE T-SIMILIAR TO MIL CP70 STYLE

For power supply filter specifications. Solder seam styles, rectangular cased. Operating temp.; −55°C to +85°C. CDE reserves the right to supply type T with a ⅛" variation in case height from that shown in the listing. Former styles TJU, TJH, and TJL were type T with bracket attached. Equivalent obtained by ordering T with universal bracket for type TJU, spade bracket for type TJH, and footed bracket for type TJL. Order brackets separately from table below, right column. *2 needed per unit. (†)CP7-OD1-.

TYPE DYR OIL FILLED BATHTUBS

Widely used in military, communications, and industrial electronic equipment. All types are drawn case "bathtub" configurations provided with integral drilled mounting flange. Available in F (−55°C to +85°C). All styles supplied with terminal style B, non-removable soldered lug. Single, dual and triple capacitance units available.

Cornell-Dubilier Capacitors

TYPE BBR AND BR "BLUE BEAVER" ELECTROLYTIC CAPACITORS

Compact aluminum cased, cardboard insulated electrolytics. Type BR section tabs and leads are rivited. Type BBR negative lead is rivited and positive lead is crimped. Voltage ratings up to and including 150 volts feature etched cathodes.

NON-POLARIZED ELECTROLYTICS

Suitable for use when no DC polarized voltage is present. Units are physically similar to the type BR-axial lead, hermetically sealed in aluminum cases with cardboard insulating sleeves. For use in crossover networks and in boot-strap filtering applications.

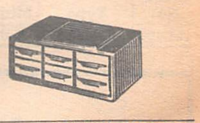
CAP-KIT



The type BR tubular electrolytic assortment is ideal for prototype shops,, laboratory work, and general maintenence. The kit includes one each of the most popular BR ratings.

CDE Cornell-Dubilier Capacitors

COMPUTER GRADE HIGH CAPACITANCE TYPE FAH

Designed for use in computer power supplies and other applications where banks of high capacitance filters are required. Low leakage current, minimum ESR, high 120cps ripple currents, molded terminal block with safety vent seal, provided with screw terminals, plastic insulating sleeve. Dual rated as shown, minimum operating temperature —40°C.

NLW ELECTROLYTIC CAPACITORS

Type NLW. Rugged physical construction. Hermetically sealed aluminum foil electrolytic capacitors. Low leakage currents; freedom from shorts. Long shelf and operating life. Suitable for printed circuits. Tinned copper leads with plastic sleeves. Temperature range, —40°C to +85°. Tol. —10% to +75%.

Cornell-Dubilier Capacitors

MYLAR DIELECTRIC FILM ENCASED

Type WMF. Mylar film wrapping. End sealed with a high density thermo-setting plastic. Miniscule in size. High resistance to humidity. Full rated voltage @ 85C, 50% rated voltage @ 125C. Temp. range: —55 C to +125 C. Tolerance: 10%. Excellent capacitance stability.

50 WVDC

TYPE WCR—POLYCARBONATE/FILM WRAP

± 10%
WCR 1P33
.33 MFD

Operating temp. range from —55 C to +85 C without derating and to +125 C with 50% voltage derating. Excellent capacitance stability. Tt 1000 Hz average capacitance charge is within —1%; within —3% of the +25 C value.

CDE Cornell Dubilier Capacitors

DPMS DIELECTRIC SIDE-LEAD TUBULARS CAPACITORS

Type DPMS has two dielectrics—Mylar Polyester Film and a film of high grade paper. Features a "dipped" rock-hard casing which holds wire leads rigidly at fixed spacings. High humidity resistance. Crimped side leads for uniform mounting. —55°C. to +125°C. Derate working voltage 25% for +125°C operation. Full rated @ 125°C.

200 VDCW ± 10% Tol.

TYPE MCR — POLYCARBONATE METALIZED FILM WRAP

Stability at high operating temp. Epoxy end seals for greater moisture resistance. Designed to minimize inductive characteristics. Temp. range: —55 to 125°C. Tolerance: ±20%.

TYPE MFP SPACE-SAVER FLAT-OVAL POLYESTER FILM CAPACITORS

Type MFP is similar to WMF. It is designed however, with an oval figure useful in many applications requiring its space saving characteristics. In ratings of 0.01 mfd. and above, the MFP is often used as an alternative to type WMF or the mil. type CTM. The unit is highly moisture and humidity resistant. Max. operating temp. range: —55° to 125°C—85°C at full rated voltage with deratings of 10% and 50% at 100°C and 125°C respectively. Standard tolerance is ±10%, 1½" min. copperweld leads. Thickness and width tolerances are: up to and incl. .484", ±.032"; .500" to and incl. 1.000", ±.062"; larger than 1.000", ±.093".

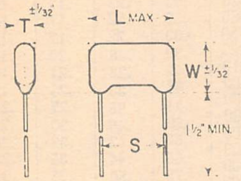
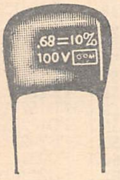
MINIATURE RADIAL-LEAD POLYESTER FILM CAPACITORS





Fix-fil-impregnated capacitor section—no impregnation leakage even at maximum operating temperatures. Uniform dip coating control assures protection of capacitor section—no possibility of shorts caused by contact of an uncoated case to chassis. Max. operating temperature is 125°C-85°C at full rated voltage. 10% derated at 100°C and 50% derated at 125°C. Leads are #22 AWG including 0.068/100V; 0.047/200V; 022/400V, and 0.068 at 600V. Above these ratings, leads are #20 AWG. Tol. ±10%. Wire lead spacing: 9⁄16" for ¾" dim. L and 5⁄16" for 1⅛" dim. L.

MPY METALIZED PAPER CAPACITORS

Metalized paper, solid resin impregnated unit designed for operation from —55C to +125C at full rated voltage. Solid resin impregnant insures maintenance of performance. Encased in exclusive CDE triclad case construction: outer cardboard tube bonded to aluminum foil which is bound to film interliner. Epoxy end seals are bound to tube and leads. Leads are minimum 1½" long. Average shipping weight: 3 oz.

Ceramic Capacitors NYTRONICS

"DECI-CAP"

Epoxy-molded subminiature ceramic capacitor. Operating range: —55°C to +125°C. High density cordwood packaging. Capacitance range: 4.7-27,000 pf. Size: all 0.100" dia. x 0.250" l. (¼ watt resistor). Tolerance: ±10%. Working voltage 4.7-470 pf: 200 volts DC. 560 pf to 27,000 pf: 100 volts DC. Meets MIL-C-11015C.

HY-CAP

The HY-CAP is a high capacity ceramic capacitor. For design application in coupling, by-pass, and filter circuits where temperature stability and high capacitance are mandatory. Capacitance range is .01 mfd. to 2.5 mfd. Less than ±15% capacitance change from —55°C to +125°C. Working voltage is 100 Volts D.C. with no derating to 125°C. Life test is 1000 hours at 125° under twice rated voltage. Tol: ±20%. This ceramic capacitor meets the requirements of MIL-C-11015.

HIGH STABILITY CERAMIC MOLDED & CHIP CAPACITORS

NYT-CAP. This ceramic capacitor has ultra-high stability. Capacitance range is 4.7pf. to 4700pf. Working voltage is 200 Volts D.C. Miniature molded epoxy case suitable for high component density applications. For use in oscillators, filters, and other critical circuitry. Tolerance ±10%.

CERAMIC

CHIP

NYT-CHIP. Provides in slug form high stability and low loss features of the epoxy molded NYT-CAP. Compatible with integrated cricuitry, thick and thin film circuitry, and printed circuitry. Capacitance range: 4.7pf. to 4700pf. Tolerance: ±10% standard. 200 VDC rating. With wrap-around terminals.

MINIATURIZED DISC TYPES FOR TRANSISTORIZED CIRCUITRY

Tiny ceramic capacitors for by-pass and coupling application. Low self inductance and flat plate construction permits higher self-resonant frequency and high by-pass efficiency in all TV and transistorized circuitry. Good performance under severe conditions of humidity and vibration. TH dia. .335 to .905, TG dia. .275 to .655.

HYPERCON CERAMIC DISCS

Ultra-miniature ceramic discs ideal for use in transistorized circuitry. Designed for bypass and coupling applications but particularly well-suited for any low voltage use where high capacitance and low power factor are important considerations. Superior to electrolytic capacitors of similar capacitance value because of the very low power factor of Hypercon Capacitors, Capacitance Tolerance: GMV.

CERAMIC CAPACITORS

Series 5 GA. Low self-inductance of silvered flat-plate design means very high by-pass efficiency in all TV circuits. Designed for 85° C (185°F) continuous operation. Higher self-resonant frequency than tubular ceramic or molded mica capacitors. Moisture proof coating. Tol. ±20%. 1000 WVDC. except (*) 500 WVDC.

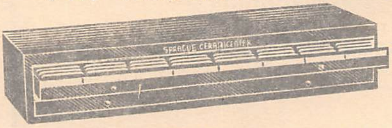
J-135 "CERAMICENTER" CERAMIC ASSORTMENT KIT



- **Handy metal drawers — Save Time and Effort**

710 capacitors of 57 different values in handy reusable "Kleer-Pak" plastic boxes. Kit includes: 290 Type 5 GA, 1000 WVDC ceramic disc capacitors in 31 different values from 5 mmf to 20,000 mmf; 145 Type 5HK "High K" bypass and coupling capacitors in 7 different values from .001 mfd. to .01 mfd. @ 1000 WVDC and .02 mfd. to .1 mfd. @ 500 WVDC; 100 Type 10 TS, 1000 WVDC temperature stable capacitors in 12 different values from 100 mmf to 20,000 mmf; and 175 Type TG, 50 WVDC disc capacitors in 7 different values from .005 to .1 mfd. Cabinet, 30¾ x5½x11¾". Ship. wt., 29 lbs.
80W415. NET **172.50**

HIGH-VOLTAGE DOORKNOB CERAMICS

Has female threads for interchangeable screw-in terminals. Molde plastic. Guard rings lengthen surface creepage path.
Type 20DK-T5. Complete with 7 terminals. 1" dia. x 31/32".
Type 30DK-T5. Complete with 2 terminals. 1 1/16" dia. x 1¼".

Stk. No.	Type	Term	Size	µµf	KV	NET

Ceramic and Electrolytic Capacitors

SPRAGUE
THE MARK OF RELIABILITY

POWERLYTIC ALUMINUM ELECTROLYTICS

Type 39D. End seals are made of molded phenolic, for operation at temperatures up to 85°C. Low effective series resistance and leakage current.

TYPE 600D HIGH GRADE ALUMINUM ELECTROLYTICS — PLASTIC INSULATING SLEEVE

Offer combination of extended temperature range and high voltage rating. Withstands 2000-hour life test at either temperature, and corresponding working voltage. Features excellent capacitance stability, dissipation factor and DC leakage current after high temperature shelf testing. Closely approximate electrical requirements of MIL-C-3965 tantalum foil capacitors, at about half the cost. Tolerance is —10%, +75% up to 75 WVDC; —10%. +50% for 100 WVDC up. Sizes shown in chart are for bare can only: add 1/64: to dia. and 1/16" to length for insulating sleeve. Avg. shpg. wt., 3 oz.

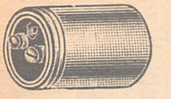
SPRAGUE
THE MARK OF RELIABILITY

Electrolytics and Capacitors

36D "POWERLYTIC" ALUMINUM ELECTROLYTICS



For applications requiring maximum capacitance in a given case size. Low ESR and leakage current; extremely long shelf life. Withstands military environmental conditions including —55°C storage tests. Tol. 3-50v, +75% to —10%; 75-450v, +50% to —10%. Av. shpg. wt., 4 oz. With plastic outer tube.

SIZES FOR 36D CAPACITORS

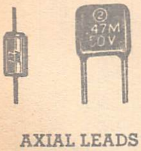
FORMULATION C-023 MONOLYTHIC CERAMIC CAPACITORS



Monolythic ceramic capacitors for transistorized circuitry. C-023 formulation insures high K—these units provide high capacitance in small physical size. Solid homogeneous blocks are protected against moisture and mechanical damage by a resin dip. Well suited for use in all frequency ranges through 1000 mc.

TVL TWIST-LOK ELECTROLYTICS

Withstand extremely high temperatures, ripple current and surge voltages. Self-mounting with twist-prong tabs that go through chassis or connect to washer for above-chassis mounting. For 85°C operation up to 450 Working Volts DC. Hermetically sealed in aluminum cans for long life and dependable performance in TV, radio, and Hi-Fi. Furnished complete with both phenolic and metal mounting plates on 1" and 1⅜" dia. cans only. Shpg. wt. 6 ounces.

SUBMINIATURE—TYPE 96P—VITAMIN Q

Insulated tab construction. Glass to metal hermetically sealed. Operates from —55°C to +125°C. Terminals are insulated from metal case. Impregnated with vitamin Q. Tolerance of ±10%. Meets MIL-C-25. Section insulated from can.

CASE SIZES FOR TYPE 96P

A: .175x¾"
B: .195x¾"
C: .235x¾"
D: .312x⅞"
E: .400x ⅞"
F: .400x1⅛"

SPRAGUE
THE MARK OF RELIABILITY

Miniature Capacitors

SPRAGUE TYPE TE LITTL-LYTICS (30D)

Ultra-small electrolytic capacitors made for transistor circuitry and other sub-min. applications. Temp. Range: —20°C to +85°C. Ultra-low leakage current. Clear Plastic Sleeves.

TVA Atom Electrolytics

SPRAGUE
THE MARK OF RELIABILITY

The only small size electrolytic especially designed for 85°C (185°F) operation on voltages to 450 working volts D.C. Unit is engineered to withstand extra high temperature, high ripple currents, plus high surge voltages. Metal case construction with outer insulating tube. Wt., 3 oz.

Type 150D and CS13 Solid Tantalums

STANDARD SERIES 150D & MILITARY TYPE CS13

Type CS13. Hermetically sealed solid tantalum capacitors to Mil-C-26655 Revision 2D. Plastic insulating sleeves. Extremely low leakage current and stability with both temperature and time. Temperature range: —80°C to +85°C; +125°C with 1/3 voltage derating. Type 150D same as above except commercial series.

HYPASS SUPPRESSION CAPACITORS

3-terminal Network-Feed-thru capacitors assure effective VHF current by-passing. Bypass VHF oscillation up to 150 MC. Suppress TVI from Short-Wave Transmitters, Diathermy Machines, Electronic Heating Apparatus, etc. Eliminate interefrence caused by Line-conducted radiation between neighboring TV sets. Temperatur eoperation: —40°C to +85°C. Currents up to 20 amps. (*) Have female screw terms. Bulkhead mounting. Shipping wt. 2 oz.

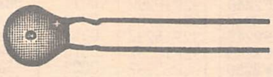
196D SOLID TANTALUM EPOXY DIPPED



Low-cost solid-electrolyte tantalum capacitors suitable for mounting printed wiring boards in transistorized commercial, and industrial electronic equipment. Furnished in sizes which permit coverage of a broad range of capitance ratings, from 0.1μF through 330μF. The standard capitance tolerance of these capacitors is ±20%. Operating temperature range —55° to +85°C low leakage current. The maximum dissipation factor is 10%. Standard capacitors are furnished with long straight leads. Leads are electro-tinned nickel for ease in soldering. Solid-electrolyte tantalum pellet construction allows plug-in mntg. on printed wiring boards.

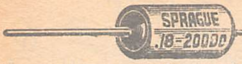
SPRAGUE® Capacitors

THE MARK OF RELIABILITY

TYPE 118P DIFILM METALIZED CAPACITORS



Unique dual dielectric rated for operation at 125°C without voltage derating. High insulation resistance and capacitance is 10 megohm-microfarads for 200 V units or 40 megohm-microfarads for 400 and 600 V units. Hermetically sealed, with glass to metal solder seal terminals. Tolerance: ±10%.

TYPE 2DF METALLIZED FILM ORANGE DROP CAPACITORS

Ideal for color TV replacement. Fits easily into tight spots because of their small size. Extremely High Insulation Resistance Insures Peak Performance At Temps. Up to +85. Radial leads are extra long for point-to-point wiring and crimped for printed board insertion. Double dipped in orange epoxy resin for protection against heat and humidity. Tolerance ±10%.

192P "PACER"—MINIATURE "FILMITE E" CAPACITORS

Nearly three times smaller than conventional paper-film tubulars. Sizes are the same as composition resistors. Entire unit insulated by heat shrinkable mylar sleeve. High insulation resistance. Operating temp. range —55°C to +85°C. Derate 50% @ 105°C. Tolerance ±10%. Average shipping wt. 2 oz.

121P METALIZED PAPER CAPACITORS

Designed to operate at 125°C without voltage derating. High insulation resistance—at 85°C minimum product of insulation resistance and capacitance is 20 megohms microfarads. Tol. ±10%. 150 WVDC.

MALLORY

HC CAPACITORS

Plastic case electrolytics for high-capacity, low-voltage applications such as dry disc rectifier filters, movie equipment, etc. All are polarized. Two screw terminals. 10 oz.

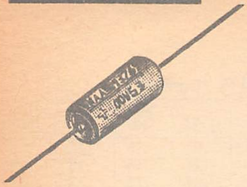
MALLORY Tantalum Capacitors

TYPE CSR SOLID ELECTROLYTE TANTALUM CAPACITORS



New solid electrolyte tantalum capacitors meet or exceed established reliability requirements of MIL-C-39003A for 2% (L) and 1% (M) failure rate levels. Rigid MIL specifications. Have hermetically sealed metal cases with insulating sleeves. WVDC is at +85°C. ±10% Tolerance. Av. shpg. wt. 2 oz.

Case Code	Dia. x Len.
A	.135 x .286″
B	.185 x .474″
C	.289 x .686″
D	.351 x .786″

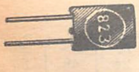
TIM TYPE



Mallory TIM capacitors are solid electrolytic tantalum types in rectangular cases. Tinned #24 AWG wire leads. Total lead length is 1½″ ±¼″.

TAC TYPE

Miniature solid electrolytic tantlum capacitors. Designed for high density applications. .105" x .290" long with #24 (.020") wire leads 1½" x ¼" long.

WET-SLUG TANTALUM CAPACITORS

Type TAP. Operating temp. —55° to +85°C. DC leakage is less than 1 microamp after 10 min. of rated voltage. Furnished in metal cases with precision formed epoxy end seals. Tol., —15% to +75%. Axial leads 1½" tinned for easy soldering.

MALLORY Electrolytic Capacitors

FP AND WP CAPACITORS

Vertical mounting dry electrolytics for all filter and audio by-pass circuits, and TV applications. All types include deep etched anodes and etched cathodes. All hermetically sealed in aluminum cases. Can is negative; separate positive terminals provided for each section. With mounting washers. Shipping weight, 6 oz.

METAL TUBULAR DRY ELECTROLYTIC CAPACITORS

TC Electrolytic with Mylar Sleeve. Single section capacitor with clear mylar insulating sleeve. Sizes shown are for base can, without sleeve. More capacitance and voltage in a smaller sized can. Tol. —10%+100%. Temp. rating up to 85°C. (*) includes mounting strap.

MOLDED ALUMINUM ELECTROLYTICS

Molded polypropelene cases provides excellent protection as well as positive electrotype seal. MTA has axial leads, MTV has two #20 AWG leads ½" long spaced 0.200" apart. Both types rated for operation from —30° to +65°C. Tolerance: —10%+100%. DCL: less than .03 ua/ mf—volt (4 ua. max.)

Computer Grade Capacitors have Capacity Tolerance: —10, +75% for 0-150 Volt Units; —10, +50% for 150-450 Volt Units. Supplied with 7/32" high post, Terminals with #10-32 Screws. Sizes do not include Terminals or Sleeve. Lug and Low Post Terminals, Specail Capacitances, Working Voltages, and Sizes Available on Special Orders.

TYPE CGS

- Low ESR
- Mylar Sleeved
- Maximum D.C. Leakage Current @ 25°C, 6 Milliamps

10 WORKING VOLTS D.C.

PLASTIC CAPACITORS, INC.

TYPE AM METAL CLAD MINIATURE CAPACITORS

Capacitors

Type AM metal clad miniature capacitors utilize metalized mylar film as the solid dielectric and are hermetically sealed. High performance exceeding the most rigid tests for humidity and temperature. Windings are extended foil (non-inductive) construction. The capacitors are self healing and non-sparking. Tolerance is 20%. Sizes shown are for diameter and length. Power factor is less than 1% at 25°C.

TYPE "OF" HIGH V. GLASS CAPACITORS

PLASTIC
CAPACITORS
INC.

Plastic film dielectric. Useful for high voltage power filter. Mount in any position. Temperature range —55°C. to +85°C. Tolerance ±10%. 3/8x8-32 screw terminals except * marked have tinned copper pigtails. Heavy wall, hard glass case.

SUBMINIATURE MONOBLOC CERAMIC CAPACITORS

Type 8003

Monobloc construction allows volumetric efficiency up to 20mf/cu. in. Tolerance within ±10% for capacitance from 10 pf to 100 pf when measured at 1mc with .5 to 1 VRMS across the capacitor including COG dielectric. For values greater than 100pf tolerance is within ±10% —when measured at 1kc with .5 to 1 VRMS across the capacitor. Maximum capacitance change ±15% of the 25°C value over temp. range —55°C to 125°C. Size: .260 max. lead length 1.5 min. Leads 22AWG solder coated copper.

TYPE 390-000 SUB-MINIATURE MOLDED CAPACITORS

Meets military specifications MIL-C-11015 with a cap. range up to 330 pf ±10%, 20%; 390-680 pf ±20%+100-0% (GMV); 820 and above +100-0% (GMV). Working voltage of 100 volts DC at 85°C, or 50 volts at 125°C. Constructed of high quality molded plastic to assure resistance against moisture and humidity. Dia., —.100; L—.260 Lead L—1.50 min. #22 AWG (.025) tinned copper leads.

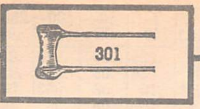
Capacitors ERIE

TYPE NPO CERAMICONS



Tubular capacitors for frequency determining applications. Also used as temp. compensating elements in circuits which must be temp. stabilized. Shpg. wt. 1 oz. Size: 301; D-.200, L-.400 Lead sp.-.250; 316 same as 315.

± .25 PF TOL.
